---

Page 25, Positive Site Characteristics, Item #2. This item awards points for number of jobs within a specified area based upon US Census Bureau On The Map. This data is dated 2017 - 3 to 4 years old by the time the apps will be submitted. Considering the job growth in SC and elsewhere, this data is grossly out dated. I respectfully and earnestly request that schousing consider eliminating this scoring criteria or at the very least, consider some other index that is more current. GA had this same scoring criteria in their QAP until this year but eliminated it because the data is so old.
