

Corey Singleton

Wetland Ecologist, Mapping Specialist

Mr. Singleton is a Conway native and has been a member of The Brigman Company for the past 5 years. Mr. Singleton has experience in all aspects of wetland, regulatory services and permitting. Mr. Singleton is the mapping specialist for The Brigman Company, integrating field reconnaissance with GIS and GPS platforms to create maps, figures, and images with sub-meter accuracy to maximize outcomes for every client.

Areas of Skill and Specialization

- Wetland Delineation
- Wetland Permitting
- Forest Management
- Threatened & Endangered Species Assessments
- Section 401 & 404 Permitting
- Permit Compliance & Inspection
- GIS, Sub-Meter GPS, AutoCAD Mapping

Key Projects and Related Experience

Georgetown County Government – Brick Chimney Road Extension

The Brigman Company worked in conjunction with project engineers, to provide wetland delineation and mitigation services for the extension of Brick Chimney Road in Georgetown County. The road extension project included biological assessments, wetland permitting, development of a mitigation plan, mitigation calculations and environmental alternative analysis.

Horry County Government – Riverstone Tract

The Brigman Company has assisted Horry County Government with the identification, proposal and permitting of the Riverstone Tract as a Wetland Mitigation Bank. The services consisted of a wetland delineation of the 3,600-acre tract to determine the location and distribution of wetlands, drainage improvements and other water resources occurring throughout the entire tract, preparing the prospectus and draft mitigation banking instrument documents to create a wetland mitigation bank to support Horry County Public Works infrastructure projects that require wetland impacts and mitigation.

Horry County Schools

Most recently, we have provided consulting services on Conway High School, District Office Site, NMB High School, NMB Middle School, Burgess Elementary, New St. James Intermediate, Green Sea Floyds High School, New MB Middle School, Alternative School Site, Loris High School, Green Sea Elementary, Ten Oaks Middle School and many others. Consulting services on these projects have included wetland determinations/delineations, 404/401 permitting, conducting biological assessments, wetland mitigation services and obtaining wetland regulatory approvals for a variety of needs.

- Longs Wastewater Treatment Plant
- Middle Ridge Avenue Extension
- City of Conway Force main and Substation
