Additional Intended Users:
South Carolina State Housing Finance and Development Authority

Subject: **Report of Phase I Environmental Site Assessment**
TMS #0152-16-18-001.000 (Shady Grove Tract)
1505 Broughton Street
Orangeburg, Orangeburg County, South Carolina
JPEG Project #3615-26

To Whom It May Concern:

J. N. Pease Environmental Group, LLC (JPEG) appreciates the opportunity to submit this Report of Phase I Environmental Site Assessment (ESA) for the above referenced site. The Phase I ESA was completed in accordance with the American Society for Testing and Materials (ASTM) *Standard Guide for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E1527-21.* The report and associated inquiry procedures meet the objectives and performance factors established by the Standards and Practices for All Appropriate Inquires (AAI), Final Rule published in 40 CFR Part 312.

This report has been prepared for the exclusive use of our client and may not be relied upon by any other person or entity, except those referenced above as additional intended users, without the express written permission from said users and JPEG. Any unauthorized use of this report is at the sole risk of the user/reader. Principal ASTM task dates associated with this project are summarized as follows:

Task	Date Completed	Plus 180-Days*
Regulatory Database Search	April 6, 2026	October 3, 2026*
Site Visit	April 20, 2026	October 17, 2026
Property Owner Interview	April 27, 2026	October 24, 2026
Date of Report/EP Declaration	April 29, 2026	October 26, 2026

*Report viable through October 3, 2026 per ASTM 1527-21 (earliest task completion date).

We appreciate your selection of JPEG for this project. Please direct any questions to Mr. James Pease. His direct number is (843) 345-4765.

Sincerely,
J. N. PEASE ENVIRONMENTAL GROUP, LLC

James N. Pease, IV

James N. "Jay" Pease, IV, REM #10923

Section 01 EXECUTIVE SUMMARY

PROPERTY NAME: TMS #0152-16-18-001.000 (Shady Grove)
LOCATION: 1505 Broughton Street, Orangeburg, South Carolina

This executive summary is provided for convenience and should not substitute for review of the complete report, including all attachments. Based on the data collected during the assessment, our findings and conclusions are summarized as follows:

Environmental Conditions	Acceptable	Further Research	Further Environmental Assessment
Present Site Use	**No**	**Not Recommended**	**Recommended (REC – discarded fluorescent light tubes)**
Site Regulatory Status	**No**	**Not Recommended**	**Recommended (REC)**
Site Use History	**No**	**Not Recommended**	**Recommended (REC)**
Off-Site Listed Facilities	**No**	**Not Recommended**	**Recommended (REC)**
Surrounding Land Use (Excludes Regulated Facilities)	Yes	Not Recommended	Not Recommended

Present Site Use: The subject property includes a single parcel of land located at 1505 Broughton Street in Orangeburg, South Carolina. The project parcel is defined by Orangeburg County tax map number 0152-16-18-001.000 and is referenced to comprise approximately 4.64 acres of land. Current property improvements include two buildings which are estimated to comprise approximately 23,000 square feet and 4,000 square feet, respectively. The larger property building fronts Broughton Street and is configured to include seven (7) tenant/suites and a large warehouse. The warehouse and tenant suites were vacant/unoccupied at the time of site reconnaissance. The smaller property building is located on the southwest portion of the subject property along Broad Street and currently serves as a church. An established waterbody/stream called Sunnyside Canal bisects the northeast corner of the subject property.

During the site reconnaissance approximately 50 (fifty) fluorescent light tubes were discarded behind the north side of the Broughton Street building. The tubes were discarded under a covered work bay and surrounding ground cover consists of concrete. The majority of tubes were observed intact; however, fluorescent light tubes typically contain mercury, a regulated hazardous substance that is subject to specific disposal requirements. **Therefore, the presence of the discarded light tubes represents a recognized environmental condition (REC).** Additional details regarding observations from the site reconnaissance are provided in Section 5 of this report.

Site Regulatory Status: The subject property was referenced on the State Leaking Underground Storage Tank (LUST) database under the name Broughton Street Shell (1505 Broughton Street). The facility is defined by UST Permit #12509. Available regulatory information indicates five (5) underground storage tanks were removed from the ground at this facility in June 1993. A petroleum release was reported in June 1993 and confirmed by State officials in July 1994. The facility was issued a Conditional No Further Action (CNFA) in June 2003. The CNFA designation indicates that the facility was closed with groundwater concentrations above State regulatory standards. As part of this assessment a Freedom of Information (FOI) request was filed with the South Carolina Department of Environmental Services (SCDES) on April 7, 2026 in an effort to obtain more specific regulatory details for the Broughton Street Shell facility such as previous groundwater sampling reports. As of the date of this report, no additional information has been received from the SCDES FOI office. The absence of site-specific assessment data represents a significant data gap and reduces the ability to make an informed conclusion regarding environmental conditions at the subject property, to include potential concerns related to vapor intrusion. **In summary, the subject property's regulatory status is considered a recognized environmental condition (REC).** Additional details are provided in Section 4 of this report.

Site Use History: Our review of historical data indicates the subject property has been developed for a combination of residential and/or commercial land uses at least since the early 1900s. Historical references confirm the subject property was formerly occupied by multiple environmentally sensitive businesses to include 1) a gas station from the approximate 1940s to 1970s, 2) a machine shop from the approximate 1940s to 1960s, and 3) an automotive repair facility from the approximate 1940s to 1990s. As noted above the gas station facility is defined by UST Permit #12509. Previous assessment work completed at gas stations and within the SCDES UST Program regulatory framework does not take into account contaminants commonly associated with auto repair facilities and machine shop activities such as solvents, metals, and polychlorinated biphenyls (PCBs). Available data indicate the existing building on Broughton Street was also occupied by an appliance store and video store during the 1980s and intermittently occupied during the 2000s by several retail businesses such as hair salons and thrift stores. Historical resources indicate the smaller building on Broad Street historically operated as a grocery warehouse, telephone warehouse, and an HVAC company. Several residential dwelling were located on portions of the subject property prior to the 1970s. **In summary the historical use of the subject property represents a recognized environmental condition (REC).** Additional information obtained from historical references is provided in Section 6 of this report.

Off-Site Listed Facilities: A query of Federal and State environmental databases was provided by Envirosite Corporation (Envirosite). Nine (9), discrete, off-site facilities were identified on the applicable regulatory lists and within the established search radii from the subject property. Regulatory information contained in the Envirosite report was reviewed for each of the identified facilities. The closest off-site facility represents a former gas station (CNC Service Center, Inc; 1493 Broughton Street) located on an adjacent property south and across Broad Street from the subject property. Area topography suggests this facility is potentially positioned in an upgradient direction from the subject property and historical references indicate a gas station operated under varying names at this location approximately from the 1960s through the 1980s. An FOI request was filed with the SCDES FOI Office on April 7, 2026 in an effort

to obtain more specific regulatory details for this facility such as previous groundwater sampling reports. As of the date of this report, no additional information has been received from the SCDES FOI office. Although this facility was issued a status of No Further Action (NFA) in January 2005, insufficient regulatory data (i.e., previous assessment reports) were available to develop an informed opinion regarding the environmental conditions at this facility. Based on proximity to the subject property, the absence of regulatory data represents a significant gap. **In summary, this facility represents a recognized environmental condition (REC) to the subject property due to proximity, presumed area gradient, and the potential for contaminant migration via groundwater.** The remaining off-sites facility were plotted greater than 950 feet from the subject property and do not represent an environmental concern to the subject property based on intervening distance and land use. Additional details regarding the regulatory database search are provided in Section 4 of this report and in Appendix C.

Surrounding Land Use: Property broadly surrounding the subject property is generally characterized by established mixed-use commercial and residential development. Proximate properties located to the east and south along Broughton Street and Broad Street are predominantly developed for commercial use. Proximate properties located to the north and west along Waring Street, Windsor Street, and other area secondary roads are largely characterized by residential development. Current surrounding land uses do not represent an environmental concern to the subject property. Additional details describing surrounding land use are provided in Section 7 of this report.

Conclusions & Recommendations: This assessment has revealed the following conclusions:

- *On-Site Conclusions:* This assessment has revealed evidence of RECs associated with historic use of the subject property, to include a gas station, machine shop, lacquer spraying, and automotive repair facilities. Historical resources indicate these facilities occupied the subject property at varying and overlapping timeframes between the 1940s to 1990s. Current conditions also represent a REC due to the presence of approximately fifty (50) improperly discarded fluorescent light tubes. **Further environmental assessment with respect to Phase I scope considerations is recommended at this time, to include proper removal and off-site disposal or recycling of the discarded fluorescent light tubes.**

- *Off-Site Conclusions:* This assessment has revealed evidence of RECs originating from an LUST facility (i.e., CNC Service Center) located south and across Broad Street from the subject property. **Further environmental assessment with respect to Phase I scope considerations and off-site sources is recommended at this time.**

(Note To Client: Please be advised that current State regulations (i.e., SCDES Regulation 61-86.1; "Standards of Performance for Asbestos Projects, effective May 23, 2025) require the completion of a comprehensive **asbestos survey** prior to future building demolition or renovation. Asbestos surveys are considered a non-scope activity with regards to standard Phase I Environmental Site Assessment (ESA) procedures. No asbestos sampling was performed as part of the Phase I ESA activities documented in this report. An asbestos survey will be required prior to demolition or renovation of the property buildings.

Please note the date of building construction does not exempt a facility from the State asbestos regulations.**)**

Section 02 INTRODUCTION

On behalf of Fitch Irick Corporation, J.N. Pease Environmental Group, LCC (JPEG) was retained by Gill Development, LLC to conduct a Phase I Environmental Site Assessment (ESA) for the subject property as documentation required for a potential real estate/financial transaction. The Phase I ESA was performed using procedures specified by the American Society for Testing and Materials (ASTM) Standard E 1527-21, and by Standards and Practices for All Appropriate Inquiries (AAI). Final Rule published in 40 CFR Part 312. In addition to satisfying potential lending requirements, completion of the Phase I ESA report is also intended to assist the client in qualifying for one of several CERCLA liability protection clauses by making "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined by 42 U.S.C § 9601 (35). The primary CERCLA liability protections are termed a) the bona fide prospective purchaser exception, b) the contiguous property exception, and/or c) the innocent landowner defense.

2.1 Background

The subject property includes a commercially developed parcel of land located at the intersection of Broughton Street and Broad Street in Orangeburg, South Carolina. This assessment was performed as outlined in JPEG's proposal #3271-26 and dated March 27, 2026. This Phase I ESA report was also completed to satisfy portions of the client's affordable housing development application to the South Carolina State Housing Finance and Development Authority, who is an intended and authorized user of this report.

2.2 Procedures

The purpose of our services was to identify recognized environmental conditions and obvious potential recognized environmental conditions in connection with the property, based on readily available information and site observations. The ASTM E1527-21 standard defines a "recognized environmental condition" as "(1) *the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment".* The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Similarly, the objective of an environmental investigation under the AAI Rule is to "*identify conditions indicative of releases and threatened releases of hazardous substances on, at, in, or to the subject property.* The following services were provided for the assessment:

- A qualitative hydrogeologic evaluation of the site and vicinity using both published topographic and geologic maps and area observations to characterize the area drainage.

- A review of selected available documents, maps, aerial photographs, and interviews with knowledgeable persons to evaluate present and past land uses.

- A review of selected environmental lists published by federal agencies, state agencies, recognized tribal groups, and/or local organizations to determine if the site or nearby properties are regulated by state or federal environmental regulatory agencies.

- A site reconnaissance for the purpose of identifying obvious indications of present or past activities/land uses of potential environmental concern.

- Visual observations of adjacent properties in order to evaluate operations, land uses, or other conditions of potential environmental concern.

- Preparation of this report that presents our findings and conclusions.

2.3 Qualifications

The assessment was designed to provide an objective, independent, and professional opinion of the potential environmental risks, if any, associated with the subject property. The report and associated inquiry procedures meet the objectives and performance factors of the Standards and Practices for All Appropriate Inquires (AAI), Final Rule published in 40 CFR Part 312. The findings and opinions presented are relative to the dates of our site work and should not be relied on to represent conditions at substantially later dates. If additional information becomes available which might impact our environmental conclusions, we request the opportunity to review the information, reassess the potential concerns, and modify our opinions, if warranted. Although this assessment has attempted to identify the potential for environmental impacts to the subject property, potential sources of contamination may have escaped detection due to: (1) the limited scope of this assessment, (2) the inaccuracy of public records, (3) the presence of undetected or unreported environmental incidents, (4) inaccessible areas, and/or (5) deliberate concealment of detrimental information. It was not the purpose of this study to determine the actual presence, degree, or extent of contamination, if any, at the site. This could require additional exploratory work, including environmental sampling and laboratory analysis.

Section 03 SITE SETTING

Understanding of a site's physical setting is important to the recognition of environmental impacts to the property:

3.1 General Site Description

The subject property includes a single parcel of land located at 1505 Broughton Street in Orangeburg, South Carolina (Figure 1, Appendix A). The project parcel is defined by Orangeburg County tax map number 0152-16-18-001.000 and is referenced to comprise approximately 4.64 acres of land. Current property improvements include two buildings which are estimated to comprise approximately 23,000 square feet and 4,000 square feet respectively. The larger property building fronts Broughton Street and is configured to include seven (7) tenant/suites and a large warehouse. The warehouse and tenant suites were vacant/unoccupied at the time of site reconnaissance. The smaller property building is located on the southwest portion of the subject property along Broad Street and currently serves as a church. An established waterbody/stream called Sunnyside Canal bisects the northeast corner of the subject property. Representative photographs of the subject property building are provided in Appendix B (see Photographs 1 to 15). Property surrounding the subject property is predominantly characterized by commercial development located to the east and south along Broughton Street and Broad Street and residential development located to the north and west along Waring Street, Windsor Street, and other area secondary roads.

3.2 Hydrogeology

A consideration of surface and subsurface drainage and geology are of interest since they provide an indication of the direction that contamination, if present on or off the site, could be transported. It was not the purpose of this study to evaluate the geotechnical conditions of the site or to assess engineering/geological concerns such as foundation conditions, faulting, or subsidence. JPEG reviewed the following information with regard to the development of the presumed local and regional geology and hydrogeology of the site and surrounding area:

- United States Geological Survey (USGS) Topographic Map, 7.5-minute series, Orangeburg South, South Carolina Quadrangle, dated 1982, (Figure 2, Appendix A);
- Geologic Map of South Carolina Coastal Plain, dated 1983, University of South Carolina, Department of Geology;
- Groundwater Atlas of the United States, Hydrologic Investigations Atlas 730-G, Segment 6, Alabama, Florida, Georgia, and South Carolina, dated 1990, published by the USGS;
- USDA On-Line Web Soil Survey for Charleston County, South Carolina.

3.3 Geologic Setting and Soil Survey Data

The site is situated in the Atlantic Coastal Plain Physiographic Province. The Atlantic Coastal Plain Physiographic Province generally extends seaward from the Fall Line, where it lies in contact with the Piedmont physiographic province, to the Atlantic Ocean. Sands, silts, and clays of recent geologic age immediately underlie the subject property. Surface soils are underlain at depth by much older marine

sediments consisting of the Cooper Formation, a relatively impervious marine silt or marl. Extensive deposits of very weakly consolidated silts and clays, often of great depth, border rivers and harbors along the coast.

The USDA Web Soil Survey for Orangeburg County, South Carolina classifies the soils at the subject property Faceville loamy fine sand with 2-6 percent slopes (FaB). Several additional soil series are mapped to lesser extents across the subject property.

3.4 Surface Drainage

Surface drainage patterns within the Atlantic Coastal Plain typically mimic the surface topography and indicate the direction contaminants would be transported by surface water or ground water. Based on a review of the area topographic map (refer to Figure 2), and our site reconnaissance, surface drainage on the subject property presumably flows north towards lower property elevations and Sunnyside Canal, which bisects the northwest corner of the subject property. Sunnyside Canal flows generally west towards the North Fork of the Edisto River. The average topographic elevation at the subject property is approximately 180 feet above mean sea level (MSL.)

3.5 Groundwater

In the Atlantic Coastal Plain Physiographic Province, ground water in the shallow aquifer generally occurs under water table conditions and is stored in the overlying mantle of alluvial and fluvial soils. Recharge to the water table is primarily by precipitation infiltrating the upper soils and percolating downward, under the influence of gravity, to the ground-water table. Typically, the water table is not a level surface, but a subdued reflection of the land surface. Also, the depth to the water table is variable, being dependent on many factors that include: the amount of rainfall, the permeability of the in-place soils, tidal fluctuations, and the amount of the ground water being pumped in the area.

Ground water generally flows in directions subparallel to the ground surface slopes and under the influence of gravity towards points of discharge such as creeks, swamps, drainage swales, or pumped ground water wells. Based on our review of the area topographic maps and our site reconnaissance, we interpret the overall natural ground-water flow direction on the site to be generally west towards the North Fork of the Edisto River. For the purposes of this report, areas to the general east are considered potentially up-gradient, areas to the general west are considered down-gradient, and areas to the general north and south are considered cross-gradient relative to the subject property. The direction and rate of ground-water flow cannot be accurately determined without on-site measurements, a task which is beyond the scope of this assessment.

Section 04 REGULATORY DATABASE SUMMARY

A query of Federal and State environmental databases was provided by Envirosite Corporation. The databases reviewed and minimum search distances applied are consistent with those required by the ASTM 1527 Standard. The regulatory records search is based on information published by Federal and State regulatory agencies and is used to evaluate if the site or nearby properties are listed as having a past or present record of actual or potential environmental impact. Please note that regulatory listings include only those sites, which are known to the regulatory agencies at the time of publication to be 1) contaminated, 2) in the process of evaluation for potential contamination, or 3) regulated.

The Envirosite database report dated April 6, 2026 identifies ten (10), discrete, facilities, to include the subject property, which were referenced on the databases prescribed by the ASTM 1527-21 Standard and located within the applicable search radii. The regulatory information provided by Envirosite was reviewed for each of the identified facilities. A tabular summary is provided in Appendix C for those facilities plotted within ¼ mile (1,320 feet) of the subject property. The tabular summary provided in Appendix C was limited to facilities within ¼ mile (a total of 4) because facilities located at greater distances are unlikely to pose an environmental concern to the subject property based on relative distance and intervening land use. The complete Envirosite database report is provided in Appendix C. The sections below summarize the database results for Federal, State and Tribal/Indian databases, respectively.

4.1 Federal Databases

The table below summarizes the Federal databases reviewed for this assessment:

REGULATORY LIST	NUMBER IDENTIFIED (Distance from Site)	DATE PUBLISHED	SEARCH DISTANCE
NPL/NPL-AOC	0	November 2025	One mile
DELISTED NPL	0	November 2025	One-half mile
SEMS (former CERCLIS)	0	November 2025	One-half mile
SEMS Archive	0	November 2025	One-half mile
RCRIS CORRACTS	0	October 2025	One mile
RCRIS GENERATORS	0	October 2025	Subject Property and adjacent
RCRIS NON-COR TSD	0	October 2025	One-half mile
PFAS (Spills/Manifests)	0	September 2025	One-half mile
ERNS	0	May 2025	Subject Property Only
EC/IC REGISTRIES	0	March 2026	Subject Property Only

No facilities were identified on the Federal databases reviewed for this assessment.

4.2 State Databases

The table below summarizes the State databases reviewed for this assessment:

REGULATORY LIST	NUMBER IDENTIFIED*	DATE PUBLISHED	SEARCH DISTANCE
SHWS (Active & Inactive)	0	August 2021	One mile
LANDFILL	0	January 2026	One-half mile

REGULATORY LIST	NUMBER IDENTIFIED*	DATE PUBLISHED	SEARCH DISTANCE
LUST (Underground)	6 (5 NFA)*	February 2025	One-half mile
UST (Registered)	0	February 2025	Subject Property and Adjacent
LAST (Aboveground)	0	November 2025	One-half mile
Drycleaners (DCRTF)	4 (over 950 feet)*	June 2023	One mile
AULs (Land Use Controls)	0	April 2024	Subject Property Only
VCC-VCP/BROWNFIELDS	0	April 2024	One-half mile

*Note: some facilities were associated with duplicate listings in the Envirosite report.

Ten (10), discrete, facilities, to include the subject property, were identified on the State environmental databases reviewed for this assessment. The identified facilities are summarized below according to database:

- State Leaking Underground Storage Tank (LUST): Six (6) facilities, to include the subject property, were referenced on this database within the search radius of one-half mile. The off-site facilities were plotted at distances ranging from 107 feet (adjacent) to over 2,500 feet from the subject property. Details are provided below for the identified LUST facilities:

  - **Subject Property** - Broughton Street Shell (1505 Broughton Street): This facility corresponds to the subject property and is defined by UST Permit #12509. Available on-line regulatory information indicates four (4) 2,000-gallon tanks and one (1) 4,000-gallon tank were removed from the ground at this facility in June 1993. A petroleum release was reported in June 1993 and confirmed by State officials in July 1994. As documented by information provided by the property owner, the facility was issued a Conditional No Further Action (CNFA) in June 2003. The CNFA designation indicates that the facility was closed with groundwater concentrations above State regulatory standards. CNFA designations are commonly issued when repeated groundwater monitoring has verified that natural attenuation is occurring, the extent(s) of the petroleum contaminant plume has been defined, and the remaining contamination is not likely to result in a negative impact to human health or the environmental *based on guidance in place at the time of the evaluation.*

    An FOI request was filed on April 7, 2026 with the SCDES FOI office located in Columbia, South Carolina in an effort to obtain more specific regulatory details for the Broughton Street Shell facility such as previous groundwater sampling reports. As of the date of this report, a return response has not been received from the FOI office. The absence of site-specific assessment data represents a significant data gap and reduces the ability to make an informed conclusion regarding environmental conditions at the subject property, to include potential concerns related to vapor intrusion. **In summary, the subject property's regulatory status is considered a recognized environmental condition (REC).** Limited documentation associated with LUST facility was provided by

the property owner (i.e., CNFA letter) and is included in Appendix C. Officials with SCDES UST Program stated that based on a CNFA date from 2003, it is unlikely that any additional file documentation is available because this timeframe preceded the digitization of records, and it was standard practice at the time to dispose of older files.

- CNC Service Center, Inc. (1493 Broughton Street): This facility was plotted on an adjacent property south and across Broad Street from the subject property which currently operates as a State Farm Insurance office (Photograph 16, Appendix B). Area topography suggests this facility is potentially positioned in an upgradient direction from the subject property. The facility is defined by UST Permit #11385. Available on-line information indicates a petroleum release was reported at this facility in December 1991 and confirmed by State officials in March 1992. Three (3) USTs were removed from the ground in 1998. The facility was issued an NFA or CNFA status in January 2005 (exact status not available). An FOI request was filed on April 7, 2026 with the SCDES FOI office located in Columbia, South Carolina in an effort to obtain more specific regulatory details for the Broughton Street Shell facility such as previous groundwater sampling reports. As of the date of this report, a return response has not been received from the FOI office. The absence of site-specific assessment data represents a significant data gap and reduces the ability to make an informed conclusion regarding environmental conditions at the this facility, to include potential concerns related to vapor intrusion. **In summary, based on proximity to the subject property this facility represents a REC to the subject property due to the potential for contaminant migration via groundwater**. As with the Broughton Shell facility, officials with the UST Program indicated that file documents associated with this facility were likely discarded based on the timeframe of when the NFA designation was issued.

- An additional four (4) LUST facilities were identified on the Envirosite database report. The remaining facilities were plotted at distances ranging from 917 feet to 2,556 feet from the subject property. Three of the remaining facilities have been issued an NFA status. An NFA designation indicates that site-specific contaminant concentrations do not exceed established regulatory limits, the extent of petroleum contamination has been defined, and/or that state regulators generally acknowledge the site conditions do not pose a threat to human health or the environment. NFA designations were issued between 1995 and 2015. The single facility which remains under assessment was plotted 1,575 feet from the subject property, a distance which does not represent an environmental concern. In summary none of the remaining LUST facilities represent a REC to the subject property based on reported regulatory status and/or intervening distance and land use.

- State Drycleaners: Four (4), discrete facilities were referenced on this database within the search radius of 1-mile. The facilities were plotted at distances ranging from 974 feet to 3,900 feet from

the subject property. None of these facilities represent an environmental concern to the subject property based on intervening distance and land use.

4.3 Tribal/Indian Databases

The table below summarizes the Tribal/Indian databases reviewed for this assessment:

REGULATORY LIST	NUMBER IDENTIFIED	DATE PUBLISHED	SEARCH DISTANCE
Tribal LUST	0	March 2026	One-half mile
Tribal UST (Registered)	0	March 2025	Site and Adjacent
Tribal Brownfields	0	December 2017	One-half mile

No facilities were identified on Tribal/Indian environmental databases reviewed for this assessment.

4.4 Orphan Sites

Orphan sites (also termed "unmappable" sites) represent facilities which are not plotted on the radius search maps due to insufficient information regarding the facility location (i.e., no street address). No orphan sites were identified in Envirosite report.

Section 05 CURRENT SITE INFORMATION (Site Reconnaissance)

JPEG performed a site and vicinity reconnaissance, conducted interviews, and reviewed readily available records in order to evaluate the current use of the site and identify activities of potential environmental concern. JPEG personnel conducted site and area visits on April 20, 2026. The site reconnaissance consisted of a walk-through of the subject property buildings and grounds. The area reconnaissance consisted of a walking tour conducted on public access routes. Representative site photographs are provided in Appendix B. The following conditions were specifically assessed during the site reconnaissance:

5.1 Date of Construction
Orangeburg County tax records indicate the building fronting Broughton Street was constructed in 1968 and the building located along Broad Street was constructed in 1969.

5.2 Description of Tenant Operations
The building fronting Broughton Street is currently vacant. The building located along Broad Street serves as a church.

5.3 Storage Tanks
Underground Storage Tanks: No visible indications of existing USTs were observed on the subject property. Disturbed concrete indicative of a former dispenser island and possible UST basin, and a former monitoring well were observed on the southeast corner of the subject property near the intersection with Broad Street (Photograph 17, Appendix B). The current property owner, Mr. John Brailsford, III, reported "there were USTs at the property years ago. Unsure if still there". It is noted a gas station formerly operated at the subject property from at least the late 1940s to the 1970s. Regulatory records indicate five (5) tanks associated with the former gas station were removed from the property in June 1993. Additional details regarding the former gas station facility are provided in Section 4.2 of this report.

Aboveground Storage Tanks: No visible indications of existing or former aboveground storage tanks (ASTs) were observed on the subject property. Mr. Brailsford was not aware of ASTs currently or historically used at the subject property.

5.4 Hazardous and/or Petroleum Product Containers
During the site reconnaissance approximately fifty (50+/-) fluorescent light tubes (mostly 48-inch) were improperly discarded behind the north side of the Broughton Street building (Photograph 18, Appendix B). The approximate location is depicted on Figure 4 (see Appendix A). The tubes were discarded under a covered work bay and surrounding ground cover consists of concrete. The majority of tubes were observed intact; however, fluorescent light tubes typically contain mercury, a regulated hazardous substance that is subject to specific disposal requirements. **The presence of the improperly discarded light tubes represents a REC to the subject property due to the material threat of a release of mercury.** The paraphrased definition of a REC is *"the presence or likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment*".

Six (6) 5-gallon paint buckets and a single 1-gallon paint can were observed within a small maintenance room located between the tenant suites in the Broughton Street building (Photograph 19, Appendix B).

The paint containers ranged from full to near empty. The integrity of the paint containers appeared sound presence of these containers does not represent a REC to the subject property.

5.5 Heating and Cooling
Electrical heating and cooling equipment was observed at the property buildings. No indications of heating oil tanks were observed nor reported by the current property owner.

5.6 Solid Waste
Minor quantities of abandoned/improperly discarded solid waste debris were observed at the subject property. The observed materials were observed in the same area as the light tubes and generally consisted of wood/construction debris, beverage containers, and weathered clothing and bedding indicative of former use by homeless persons (Photograph 20, Appendix B). The observed materials do not represent a REC to the subject property.

A small trash dumpster operated by the City of Orangeburg and serviced weekly was observed on the south portion of the subject property adjacent to Broad Street.

5.7 Sewage Disposal/Septic Tanks
The current property owner confirmed the subject property is connected to the municipal sewer system. No septic systems are known to be associated with the subject property.

5.8 Water Supply/Water Wells
The current property owner confirmed the subject property is connected to and served by the municipal water system. No private drinking water wells or irrigation wells are known to be associated with the subject property.

5.9 Hydraulic Equipment
No aboveground or underground hydraulic equipment was observed on the subject property.

5.10 Chemical Drains/Sumps
No chemical drains or sumps were observed on the subject property.

5.11 Electrical Transformers/PCBs
Electrical transformers are a potential source of recognized environmental conditions due to the potential presence of polychlorinated biphenyls (PCBs) contained in dielectric fluids used in some units. An estimated eleven (11) pole-mounted transformers affixed to eight separate telephone poles were observed at the subject property. The majority of telephone poles were positioned on the periphery of the subject property. A NON-PCB label was observed on one of the transformers. The transformers are owned and operated by a local electric cooperative called Orangeburg Department of Public Utilities (DPU). It is our understanding that DPU maintains responsibility for their equipment to include repairs and clean up resulting from any damage, spills, leaks, or other transformer problems. Although the transformer unit was not labeled for PCB content, based on the compliance policies adhered to by electrical cooperatives, the transformer units believed to be “Non-PCB” containing. The transformers do not represent a REC to the subject property. DPU should be contacted prior to redevelopment of the subject property in order to arrange for the removal of transformers which obstruct future building construction.

Fluorescent lighting units were observed within the warehouse area. Based on the building’s reported construction date of 1968, further environmental consideration with regards to fluorescent light ballasts is warranted prior to future demolition of this building. Prior to 1978, ballasts were commonly

manufactured with PCBs in the capacitor oil and in a tar-like substance that surrounds ballast components called "potting compound." Ballasts made after 1978 are usually marked "Non-PCB". If the ballasts are not marked as "NON-PCB" then the owner must assume the ballasts are PCB containing. (Note: If the ballasts are not marked, the PCB status of the ballasts can occasionally be determined by tracing the serial number through the manufacturer.) It is JPEG's understanding that non-leaking PCB ballasts should be recycled at a facility with EPA approval for recycling PCB ballasts, and by a transporter with a PCB activity identification number from EPA to transport ballasts to a recycling facility. Non-leaking PCB ballasts that are not recycled must be managed and disposed as hazardous waste. Leaking PCB ballasts must be managed as PCB waste and disposed at a licensed and permitted facility. Prior to demolition of the property buildings, JPEG recommends that the light ballasts are inventoried to determine the proper waste management, handling, and disposal requirements.

5.12 Contracted Maintenance Services
Information regarding third-party maintenance services which are performed at the subject property was provided by Mr. Brailsford and summarized as follows:

- Janitorial: In-house (as needed)
- HVAC: Ricky Padgett (as needed)
- Trash Pick-up: City of Orangeburg trash dumpster (weekly)
- Pest Control: Ariel Pest Control (monthly)
- Landscaping: In-house (as needed)

Third-party maintenance contractors do not store bulk quantities of equipment or hazardous materials at the subject property.

5.13 Pits, Ponds, Lagoons and/or Surface Waters
No pits, ponds, lagoons, or surface water bodies indicative of industrial waste processes were observed at the subject property. It is noted an established waterbody called the Sunnyside Canal bisects the northeast corner of the subject property adjacent to the intersection with Waring Street (Photograph 15, Appendix B). The canal flows generally west and daylights into the North Fork of the Edisto River which is located approximately 2,300 feet west.

5.14 Stressed Vegetation
No signs of stressed vegetation resulting from chemical spills or releases were observed during the site reconnaissance.

5.15 Odors
There were no obvious strong, pungent, or noxious odors noted during the site reconnaissance.

5.16 Other Observations/Non-Scope Services
No other environmental related observations were observed during the site reconnaissance.

Additional services for lead-based paint (LBP) testing and wetlands were completed as part of this assessment to satisfy portions of the client's application requirements to the South Carolina State Housing Finance and Development Authority. Limited LBP testing was performed by XRF in both property buildings. A total of five (5) positive XRF readings were recorded during testing procedures, primarily from small area/trim components. A literature review and field evaluation for wetlands was completed. The

stream (i.e., Sunnyside Canal) which bisects the northeast corner of the subject property adjacent to Waring Street is considered jurisdictional. Documentation of the LBP and wetland services were provided to the client under separate cover.

Section 06 HISTORICAL SITE INFORMATION

The ASTM 1527-21 standard lists the mandatory physical setting sources and specifies that the historical review should be conducted using as many sources as are practically reviewable from the initial development of the subject property or back to 1940, whichever is earlier. To comply with the ASTM standard, a reasonable attempt was made to obtain historical data from physical setting and historical sources that were publicly available, obtainable within reasonable time and cost restraints, and practically reviewable as defined in the ASTM standard. JPEG personnel reviewed aerial photographs, topographic maps, tax records, city directories, Sanborn Maps, and conducted interviews to gather historical information about the site and surrounding area. Information obtained from each of these sources is summarized below:

6.1 Aerial Photographs

Historical aerial photographs were obtained from Envirosite and covered the years 1958 through 2023. Aerial photographs obtained from Google Earth covered the years 1994 through 2024. The subject property is depicted as partially developed land in the aerial photographs reviewed for this assessment. Two (2) structures are consistently depicted on the subject property, the location, size and orientation of which are near identical to the present-day structures. The balance of the subject property is depicted as a grassed lot with minimal/sparse tree cover. Please note exact building use cannot be determined from aerial photographs. The subject property and approximate parcel boundaries are depicted on a 2020 aerial photograph provided in Appendix A (see Figure 3). No specific environmental concerns can be inferred solely from the aerial photographs. Historical aerial photographs obtained from Envirosite are provided in Appendix D.

6.2 USGS Topographic Map(s)

Topographic maps were reviewed on-line at the United States Geologic Survey (USGS) TopoView website. The subject property is depicted on the 7.5 Minute Topographic Quadrangles for Orangeburg and Orangeburg South, South Carolina. Three (3) historic versions of the Orangeburg quadrangle were reviewed and dated 1920, 1921 and 1943. The Orangeburg South quadrangle was dated 1982. The subject property is depicted with isolated residential development on the 1920 and 1921 maps. The subject property is tinted gray on the 1943 and 1982 maps indicating the area is characterized by established, urban development. No specific environmental concerns can be inferred solely from the topographic maps. The subject property is depicted on a recent topographic map in Appendix A (see Figure 2).

It is noted more recent versions of the Orangeburg South quadrangle are dated 2011, 2014, 2017, 2020 and 2024. The more recent maps are printed at a scale which only depict primary features such as roadways, water bodies, contour lines and occasionally prominent building features such as schools and churches. No structures are depicted at the subject property on these recent topographic maps and based on the area roadway network, the subject property is located within an urban area.

6.3 County Tax Records

The subject property includes a single parcel of land defined by Orangeburg County tax parcel number 0152-16-18-001.000. County tax records obtained through the qpublic.net website indicate the project parcel is currently owned by Shady Grove Plantation & Nursery, Inc. The date of acquisition is not referenced and no additional property owners were listed. (Note: the current owner reported the property was acquired in 1984.) Tax records indicate the parcel is improved with two structures. The larger structure is referenced to comprise 22,939 square feet with a construction date of 1968. The building use is listed as "general retail". The smaller structure is referenced to comprise 4,000 square feet with a construction date of 1969. The building use is listed as "warehouse storage". The project parcel is referenced to comprise 4.64 acres of land and is associated with a street address of 176 Broad Street. No specific environmental concerns can be inferred solely from the on-line tax records. Copies of on-line property records are provided in Appendix E. Please note this review of on-line tax records does not represent a formal title search.

6.4 City Directories

City directories were provided by Envirosite. City directories were generally reviewed in 5-years increments and available volumes covered the years 1964 through 2023. County tax records indicate the subject property is associated with a street address of 176 Broad Street. Orangeburg County GIS depict twelve addresses on the project parcel to include 110, 120, 164, and 176 Broad Street and 1505, 1517, 1529, 1531, 1541, 1545, 1549, and 1553 Broughton Street. The above referenced addresses include the street numbers observed on tenant suites during the site reconnaissance. The subject property street address was previously listed as 505 Broughton Street in volumes dated 1964 to 1993, an address which was verified from Sanborn Maps and references to cross streets. City directory listings are summarized below by address:

- 110 Broad Street: This address was not listed in the directories reviewed for this assessment.

- 120 Broad Street: This address was not listed in the directories reviewed for this assessment.

- 164 Broad Street: Primary business occupants referenced at this include Roadway Express (1969 and 1973), Orangeburg Heating & Cooling (1978 and 1983-84), SMI Medi-Serv (1988). This address is referenced as "Vacant" in directories dated 1964, 1993 and 1997 and as a residence in 2008. This street address was not listed in directories dated 2013 through 2023.

- 174 Broad Street: This address is associated with residential occupancy in directories dated 1964 through 1997. An entry of "NCL" (no current listing) appears in directories dated 2003 through 2013 and the address is not listed in the 2018 and 2023 directories.

- 1505 Broughton Street: This address was not listed in directories dated 1964 through 2003. Business listings include Quick Print Printers (2008) and Page Plus of Orangeburg (2013, 2018, 2023). This address changed to 505 Broughton Street beginning with the 1993 directory. Business listings associated with 505 Broughton Street are summarized as follows:

DATE	OCCUPANTS AT 505 BROUGHTON STREET
1993	505: Bozard Auto Service 505a: Vacant
1988	505: Bozard & Wilkinson Auto Service, Appliance City 505a: Video City
1983-84	505: Bozard & Wilkinson Auto Service 505a: Appliance City
1978	505: Bozard & Wilkinson Auto Service, Appliance City 505a: Yongue Paint Co.
1973	505: Broughton Street Shell, Bozard Martin Garage 505a: Morehouse-Huber, Inc. (plumbing supply)
1969	505: Altman Motors, Inc.
1964	505: Jefford's Machine Shop

- 1517 Broughton Street: This address was not listed in directories dated 1964 through 1993 and 2018 and 2023. Business listings were limited to Lavern's Total Hair Care (1997). Potential residential occupancy is referenced in the 2013 directory.

- 1529 Broughton Street: This address was not listed in directories dated 1964 through 1993. A reference to three (3) vacant houses (1529 to 1549) is listed at this address in the 1997 directory. Business listings were limited to Ginny's Pretty Thrift Shop (2003) and Hong Alterations (2008)

- 1531 Broughton Street: This address was not listed in the city directories reviewed for this assessment.

- 1539 Broughton Street: This address was listed in the 2003 and 2008 city directories with a referenced occupant of Linda's Awards & Gifts. This address was not listed in additional directories and is referenced because it fall within the range of odd-numbered addresses associated with larger subject property building

- 1541 Broughton Street: This address was not listed in the city directories reviewed for this assessment.

- 1545 Broughton Street: This address was not listed in directories dated 1964 through 1997 and 2013 and 2023. Business listings were limited to Beautiful Beginnings Salon (2003) and Blessed by God Salon (2008).

- 1549 Broughton Street: This address was not listed in the city directories reviewed for this assessment.

- 1549 Broughton Street: This address was not listed in the city directories reviewed for this assessment.

- 1553 Broughton Street: This address was not listed in the city directories dated 1964 through 1997 and 2006. Business listings include Adams Outdoor Advertising (2003), Ricky's Auction Outlet (2013), and Leylas Retail Wholesale (2018 and 2023).

Occupants of environmental concern were identified in the city directory listings (i.e., gas station, automotive repair facility, and a machine shop) and support the conclusion that historic use of the subject property represents a REC. Copies of city directory listings are provided in Appendix E.

6.5 Interviews
Interviews were performed as follows:

- **Property Owner:** Interviews are commonly performed with the current property owner(s) in an effort to obtain or confirm information about property use and/or facility operations. An ownership questionnaire was completed by Mr. John Brailsford, III, President of Shady Grove Plantation & Nursery and dated April 27, 2026. Mr. Brailsford confirmed his company acquired the subject property in 1984 as a rental property. A rent roll identifying past building tenants was not provided. Mr. Brailsford reported that the large warehouse operated as Cash & Carry Grocery for approximately five (5) years after his purchase of the property with subsequent use consisting of "storage". No additional tenant information was provided for the larger property building. Mr. Brailsford stated the church has occupied the smaller property building for at least 5 years, but he did know the exact dates. Mr. Brailsford reported the current ownership has not been contacted by SCDES for the purpose of executing a property access agreement so that a groundwater monitoring well could be installed on the subject property. To the best of his knowledge Mr. Brailsford was not aware of (1) any pending, threatened, or past litigation relevant to hazardous substances, or petroleum products in, on, or from the subject property, (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in or on or from the subject property, or (3) any notices from any governmental entity regarding any possible violations of environmental laws or possible liability relating to hazardous substances or petroleum products. Additional information provided by Mr. Brailsford is provided in other sections of this report. A copy of the ownership questionnaire completed by Mr. Brailsford and dated April 27, 2026 is provided in Appendix E.

- **Property Occupants/Tenants:** Not applicable.

- **Fire Department:** Local fire departments are contacted in an effort to obtain information regarding local knowledge of spill incidents or other environmental incidents (i.e., HAZMAT) that may have occurred at the subject property or in the immediate surrounding area. A FOI Request was submitted via email to the City of Orangeburg Department of Public Safety on April 26, 2026. A return response has not been received as of the date of this report. JPEG personnel attempted to contact the City of Orangeburg Fire Department via telephone (803) 533-6040 on April 28 and 29, 2026. A return call has not been received from the fire department as of the date of this report. This circumstance does not represent a significant limitation to this report because it is highly unlikely that information provided by the fire department would alter the conclusions of this report.

- **Local Officials:** No local officials were contacted as part of this assessment because it is highly unlikely that information provided by local officials would alter the conclusions of this report.

- **Client/Prospective Purchaser:** User information addressing the respondent's knowledge of the potential presence of environmental concerns at the subject property was documented by the completion of the ASTM User Questionnaire. The ASTM User Questionnaire was completed by a phone interview with Mr. Josh Gill on April 24, 2026. Responses by the client did not reveal any specialized knowledge of environmental concerns at the subject property, to include environmental cleanup liens and activity and use limitations or provide information to suggest that the land value of the subject property deviates from reasonable market values because of the presence of environmental contamination. A copy of completed ASTM questionnaire is provided in Appendix E.

6.6 Sanborn Maps

Sanborn Maps were obtained from Envirosite and dated between 1922 and 1958. The table below summarizes information depicted at the subject property location:

DATE OF MAP	DESCRIPTION AT SUBJECT PROPERTY (SP)
1922*	Five (5) structures depicted on SP; each labeled "D" for dwelling: 2 structures depicted on along Broad street (southwest portion) 3 structures depicted Windsor Street (west portion) Balance of property undeveloped *Note: Eastern most portion of SP not depicted
1931	Same structures as 1922
1947	SP developed with commercial and residential structures: Commercial structure fronting Broughton Street labeled as "Machine Shop & Auto Repair", "Lacquer Spraying", "FILLING STA.", and "Auto Sales"; Commercial structure fronting Broad Street labeled as "GRO WHO" for grocery warehouse. Four additional structures labeled as dwellings;
1958	SP developed with commercial and residential structures: Commercial structure fronting Broughton Street labeled as "Machine Shop & Auto Repair", "Lacquer Spraying", "FILLING STA.", and "Auto Sales"; Commercial structure fronting Broad Street labeled as "TEL WHO" for telephone warehouse. Two additional structures labeled as dwellings;

Sanborn Maps confirm the subject property has been developed for a combination of commercial and/or residential uses since the early 1920s. Environmental concerns were depicted on Sanborn Maps to include past use and occupancy of subject property a gas station, machine shop, auto repair and lacquer spraying facilities. **Information obtained from Sanborn Maps support the conclusion that historic use of the subject property represents a REC.** Copies of the Sanborn Maps are provided in Appendix F.

6.7 Previous Environmental Reports

No previous environmental reports were provided by the property owner.

6.8 Environmental Lien Search

JPEG was not requested to complete an environmental lien search because this documentation is commonly obtained through title work completed through lending and legal channels associated with the transaction.

6.9 Data Gaps/Data Failure

The absence of a formal response from the SCDES FOI Office and lack of previous regulatory assessment data for the former Broughton Street Shell (UST Permit #12509) and CNC Service Center (UST Permit #11385) facilities represents a data gap. The absence of previous regulatory assessment data represents a significant data gap and supports the conclusion for the identification of RECs associated with both on-site and off-site sources. However, previous regulatory assessment data obtained through SCDES FOI would not be sufficient to alter the conclusions of this report. The former gas station was only one of several previous occupants of environmental concern at the subject property. Assessment work generated through the SCDES UST Program would not be sufficient in scope to address all historical site use concerns identified during this assessment

Data failure, which is also a type of data gap, was encountered during this assessment because historical resources were not available prior to the initial development of the subject property. The oldest available historical resource is a topographic map dated 1920 on which several residential-sized structures are depicted on the subject property. This data failure is not significant because it is highly unlikely that resources dated prior to 1884 would provide information that would alter the conclusions of this report. This data failure does not affect the quality of the report and associated conclusions.

Section 07 SURROUNDING LAND USE

Nearby property usage could potentially impact the surface and subsurface conditions of a property depending on area topography and gradient. Evaluating the history of past and present uses or occupancies of surrounding properties can provide an indication of the likelihood of recognized environmental conditions. An area land use map is provided as Figure 5 (see Appendix A). Information regarding surrounding land use is noted in the following sections (Photographs 21 to 26, Appendix B):

7.1 North

Present: Property to the north is considered to be topographically cross-gradient in relation to the subject property. The subject property is currently bordered to the general north by Waring Street across which exists established residential land use, to include a small multi-family property called Waring Street Townhomes. Property located further north is generally characterized by commercial development located along Broughton Street and additional residential development located along other area secondary roads.

Past: Property located north of the subject property is generally characterized by residential development in aerial photographs dated 1958 and 1964. Property to the north is generally developed to an extent similar to present day conditions since 1972, to include the existing townhome development.

- Sanborn Maps: No structures are depicted on the adjacent property north and across Waring Street on the 1922 and 1931 maps. Several structures labeled "D" for dwelling are depicted across Waring Street and at the intersection of Broad Street on maps dated 1947 and 1958. The maps provided by Envirosite did not encompass areas further north.

- City Directories: Adjacent property north and across Waring is associated with intermittent odd numbered street addresses ranging from 1003 to 1093. These addresses were consistently associated with residential occupancy in directories dated 1997 through 2023. This series of addresses changed in directories dated 1964 through 1993 with consistent listings for residential occupancy. It is noted Regency Apartments (i.e., possible the current Waring Street Townhomes) was referenced in directories dated 1978 and 1988.

- Topographic Maps: Property to the north is depicted with isolated residential development on the 1920 and 1921 maps. Surrounding property north is extensively tinted gray on maps dated 1943 and 1982 indicating the surrounding area is characterized by established urban development.

7.2 South

Present: Property to the south is considered to be topographically cross-gradient in relation to the subject property. The subject property is currently bordered to the general south by Broad Street, across which exists mixed-use commercial and residential development located along Broad Street, Bull Street and other area secondary roads.

Past: Property located south of the subject property is generally characterized by residential development in aerial photographs dated 1958 and 1964. Property to the south is generally developed to an extent similar to present day conditions since 1972.

- Sanborn Maps: Adjoining and adjacent structures located south of the subject property and along Broad Street are limited to dwellings. The former adjacent gas station at 1493 Broughton Street was not depicted on the Sanborn Maps, the most recent of which is dated 1958.

- City Directories: County tax records indicate adjacent properties south and across Broad Street are associated with a street addresses of 1493 Broughton Street and 139, 151, 155, 159, 165 and 182 Broad Street and 1510 Windsor Street. City directory listings are summarized below by street address:

  - 1493 Broughton Street: Kieth Hewitt State Farm Insurance is referenced at this address in directories dated 2008 through 2023. This address was not listed in 2003 and referenced as Texaco Wrecker Service in the 1997 directory. This address changes to 493 Broughton Street in directories dated 1964 through 1993. Texaco Wrecker Services is referenced at this address in 1993. Lee's Exxon or Lee's Eso is referenced at this address in directories dated 1969 through 1988. A residence is referenced in the 1964 directory.

  - 139 Broad Street: This address is associated with residential occupancy in directories dated 1964 through 1988. The address is listed as "Vacant" in the 1993 and not listed in directories dated 1997 through 2023.

  - 151 Broad Street: This address is associated with residential occupancy in directories dated 1964 through 1978. The address is not listed in directories dated 1983-84 through 2023

  - 155 Broad Street: This address is associated with residential occupancy in directories dated 1964 through 1973. The address is listed as "Vacant" in the 1978 and not listed in directories dated 1983-84 through 2023.

  - 159 Broad Street: This address is associated with residential occupancy in directories dated 1964 through 1973. The address is not listed in directories dated 1978 through 1988. S&D Automotive is referenced at this address in directories dated 1993 through 2023. This facility was not referenced on the environmental regulatory databases reviewed as part of this assessment.

  - 165 Broad Street: This address is associated with residential occupancy in the 1964 directory and listed as "Vacant" directories dated 1969, 1973, and 1978. This address is not listed in directories dated 1983-84 through 2023.

  - 182 Broad Street: This address is listed as "Vacant" directories dated 1964 through 1988 and as a residence in 1993 and 1997. This address is not listed in directories dated 2003 through 2023.

- 1510 Windsor Street: This address was not listed in the city directories reviewed for this assessment. This address is associated with a corner parcel located at the intersection of Broad Street and Windsor Street. Residential listings consistently appear at this intersection in the available directories.

Occupants of environmental concern were identified on an adjacent property south located at 1493 Broughton Street (also formerly 493 Broughton Street) and represent a REC to the subject property.

- Topographic Maps: Property to the south is depicted with limited residential development on the 1920 and 1921 maps. Surrounding property south is extensively tinted gray on maps dated 1943 and 1982 indicating the surrounding area is characterized by established urban development.

7.3 East

Present: Property to the east is considered to be topographically up-gradient in relation to the subject property. The subject property is currently bordered to the general east Broughton Street, across which exists limited green space, basketball court associated with a municipal recreation center/park, a cemetery, and limited commercial development fronting Broad Street to include a Sherwin Williams store and insurance agency. Property further east is characterized by established mixed used residential and commercial development located along Middleton Street and other area secondary roads.

Past: Property located east of the subject property and across Broughton is depicted as limited undeveloped land followed by established residential development in aerial photographs dated 1958 and 1964. Property to the east is generally developed to an extent similar to present day conditions since 1972.

- Sanborn Maps: Property to the east includes a structure labeled "Armory: SC National Guard, 118th Infantry" followed by a cemetery on maps dated 1947 and 1958. Property to the east is labeled as a cemetery on maps dated 1922 and 1931.

- City Directories: Adjacent properties east and across Broughton Street are associated with street addresses 1420 and 1546 Broughton Street and 1130 Waring Street. Listings associated with these addresses are summarized as follows:

  - 1420 Broughton Street: Signage at this property references City of Orangeburg Parks & Recreation Department. This address was not listed in directories dated 1998 through 2023. This address changed to 395 Broughton Street in 1993. The City of Orangeburg Parks & Recreation Department is referenced at this address in the 1993 directory and the address is listed as "Vacant" in directories dated 1973 to 1988. A residence is listed at the address in the 1964 and 1969 directories.

  - 1546 Broughton Street: Sherwin Williams is the referenced occupant of this address in directories dated 1997 through 2023. This address is not referenced in previous directories.

  - 1130 Waring Street: Referenced occupants of this address include Edward L. Reed & Associates (1988 to 2003) and Taylor Insurance Agency (2008 to 2023). This address was not referenced in previous directories.

- Topographic Maps: Property to the east is depicted with limited residential development on the 1920 and 1921 maps. Surrounding property east is extensively tinted gray on maps dated 1943 and 1982 indicating the surrounding area is characterized by established urban development.

7.4 West

Present: Property to the west is considered to be topographically down-gradient in relation to the subject property. The subject property is currently bordered to the general west by Windsor Street across which exists established residential development located along Waring Street, Shuler Street, and other area secondary roads.

Past: Property located west of the subject property is generally characterized by limited residential development in the 1958 aerial photograph with an increase in density in the 1964 aerial photograph. Property to the west is generally developed to an extent similar to present day conditions since 1972.

- Sanborn Maps: Adjacent structures located west of the subject property and along Windsor Street are limited to dwellings.

- City Directories: Adjacent properties located west and across Windsor Street are associated with odd-numbered street addresses (not consecutive) within the range of 1523 to 1595 Windsor Street. These addresses are intermittently referenced in city directories dated 1964 through 2023 and referenced occupant are limited residential use.

- Topographic Maps: Property to the west is depicted with isolated residential development on the 1920 and 1921 maps. Surrounding property west is extensively tinted gray on maps dated 1943 and 1982 indicating the surrounding area is characterized by established urban development.

Section 08 CONCLUSIONS & RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of the ASTM E1527-21 standard and 40 CFR Part 312 (AAI Rule) for Orangeburg County tax parcel number 0152-16-18-001.000 located at 1505 Broughton Street in Orangeburg, South Carolina. This assessment has revealed the following conclusions with regards to environmental conditions:

- *On-Site Environmental Conditions:* This assessment has identified RECs associated with current and past uses of the subject property. The REC associated with current property use is due to the presence of approximately fifty (50) fluorescent light which have been improperly discarded behind the north portion of the Broughton Street building. RECs associated with historical property use are associated with former property use and operation as a gas station, machine shop, automotive repair, and lacquer spraying facilities. Historical resources indicate these facilities occupied the subject property at varying and overlapping timeframes between the 1940s to 1990s.

- *Off-Site Environmental Conditions:* This assessment has revealed evidence of a REC originating from an off-site source, specifically a former gas station and service center (i.e., CNC Service Center) which operated on an adjacent property south and across Broad Street from the subject property.

- *Historical/Controlled Recognized Environmental Conditions:* No historical RECs or controlled RECs were identified during the course of this assessment.

- *De Minimis Conditions:* No *de minimis* conditions were identified during the course of this assessment.

- *Non-ASTM Scope Findings:* Additional services for limited lead-based paint (LBP) testing and wetlands were completed as part of this assessment to satisfy portions of the client's application to the South Carolina State Housing Finance and Development Authority. Limited LBP testing was performed by XRF in both property buildings. A total of five (5) positive XRF readings were recorded during testing procedures, primarily from small area/trim components. A literature review and field evaluation for wetlands was completed. The stream (i.e., Sunnyside Canal) which bisects the northeast corner of the subject property adjacent to Waring Street is considered jurisdictional. Documentation of the LBP and wetland services were provided to the client under separate cover. No additional tasks associated with non-ASTM scopes of work such as asbestos surveys were completed nor requested as part of this assessment.

- ***Recommendations:*** **Further environmental assessment with respect to Phase I scope considerations is recommended at this time, to include proper removal and off-site disposal or recycling of the discarded fluorescent light tubes.**

Section 09 PROFESSIONAL STATETMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in §312.10.10 of 40CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40CFR Part 312.

Qualifications for JPEG personnel are provided in Appendix G.

Section 10 REFERENCES

JPEG has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM E 1527-21 and 40 CFR Part 312 (AAI Rule). Information sources used to complete this assessment include the following:

- Envirosite Corporation Government Records Report dated April 4, 2026; reference Order #116753;
- United States Geological Survey (USGS) Topographic Map, 7.5-minute series, Orangeburg South, South Carolina Quadrangle, dated 1982;
- Aerial Photographs dated *1958, 1964, 1972, 1974, 1981, 1983, 1989, 1994, 1999, 2005, 2006, 2009, 2011, 2013, 2015, 2017, 2019, 2021, and 2023* obtained from Envirosite (see Appendix D);
- Aerial Photographs dated *1994, 2005, 2006, 2011, 2012, 2014, 2015, 2017, 2019, 2022 and 2024* reviewed on Google Earth;
- On-line property tax records obtained from Orangeburg County/Qpublic website;
- City Directories dated *1964, 1969, 1973, 1978, 1983-84, 1988, 1993, 1997, 2003, 2008, 2013, 2018, and 2023* and obtained from Envirosite (see Appendix E);
- Historical topographic maps dated *1920, 1921, and 1943* reviewed on-line at USGS TopoView website;
- Property ownership questionnaire completed by Mr. John Brailsford, III, President with Shady Grove Plantation & Nursery, Inc. and dated April 27, 2026 (see Appendix E);
- Sanborn Fire Insurance Maps obtained from Envirosite and dated *1922, 1931, 1947 and 1958* (see Appendix F);
- Freedom of Information Request submitted to the City Orangeburg Department of Public Safety on April 26, 2026;
- Freedom of Information Request submitted to the South Carolina Department of Environmental Services on April 7, 2026.

Photo 25: Adjacent land use south across Broad Street (S&D Automotive).

Photo 26: Adjacent residential land use west across Windsor Street.

APPENDIX C

REGULATORY RECORDS SEARCH

APPENDIX C

Table 1. Listed Facilities Within ¼ Mile (1,320 feet) of the Subject Property

Facilities located closest to the subject property have the greatest potential to pose an environmental concern to the subject property via contaminant migration. If facilities located within ¼ mile of the subject property do not represent an environmental concern to the subject property, then one may reasonably conclude that facilities located at greater distances also do not pose an environmental concern to the subject property simply due to intervening distances and land uses.

SITE NAME (MAP ID)	APPX. DISTANCE (DIRECTION)	DATABASE	REC (Yes/No) REASON
*Broughton Street Shell 1505 Broughton Street Orangeburg, SC (1)	Subject Property	LUST Permit # 12509 CNFA: 6/20/2003	Yes (CNFA means facility closed with groundwater contamination remaining; insufficient regulatory data creates a significant data gap to include inability to evaluate potential vapor intrusion concerns)
*CNC Service Center Inc 1493 Broughton Street Orangeburg, SC (2)	Adjacent Southeast	LUST Permit #11385 NFA:1/24/2005	Yes (Insufficient regulatory data creates a significant data gap to include inability to evaluate potential vapor intrusion concerns)
Kirklands Inc 193 Henley Street Orangeburg, SC (3)	917 feet Southeast	LUST Permit #06856 NFA: 3/27/1995	No (NFA status, distance, intervening land use)
Kirkland Cleaners 1193 Henley Street Orangeburg, SC (4)	974 feet East	Drycleaners BLWM #52563 Priority Group: Third Priority	No (Distance, intervening land use, low priority regulatory status)
An additional six (6), discrete, facilities were identified greater than ¼ mile from the subject property. Based on intervening distance and land use, reported regulatory information and/or area topography and presumed gradient, none of these facilities are believed to represent an environmental concern to the subject property.			

Notes: Complete Envirosite Database Report is attached.
*FOI request filed with SCDES.
LUST – Leaking Underground Storage Tank
NFA – No Further Action
BLWM – Bureau of Land & Waste Management

FEDERAL CERCLIS LIST

SEMS_8R_ACTIVE SITES: The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. NPL sites include latitude and longitude information. For non-NPL sites, a brief site status is provided.

SCDES UST PERMIT #12509

C. Earl Hunter, Commissioner

JUL 27 2004

SHADY GROVE PLANTATION & NURSERY INC
3030 CHARLESTON RD SW
ORANGEBURG SC 29115

Re: Former Broughton Street Shell, 1505 Broughton Street, Orangeburg, SC
UST Permit # 12509
Release reported June 30, 1993
Orangeburg County

Dear Sir or Madam:

On June 20, 2003, the Underground Storage Tank (UST) Program issued a Conditional No Further Action letter to the owner of the Former Underground Storage Tanks, Travel Mart, Inc. It has come to my attention that you may not a received a copy of this letter (enclosed).

The attorney for Travel Mart, Inc. has indicated that they no longer want the monitoring wells. As the current property owner, the UST Program is also requesting a decision from you regarding whether you want to keep the monitoring wells for additional monitoring or if you want the Department to abandon the monitoring wells at the referenced facility at this time.

The following options are offered:

Option 1: You may choose to abandon some or all of the monitoring wells at this time. Upon approval and proper abandonment of the wells in accordance with South Carolina Well Standards and Regulations (R. 61-71), a final payment for cleanup actions associated with this release will be issued from the SUPERB Account. If you choose to have they monitoring wells abandoned at this time, there will be no cost to you.

Option 2: You may choose to keep some or all of the wells for future monitoring in order to verify that the natural attenuation process has been successful in reducing all CoC concentrations below RBSL. The SUPERB Account will not be responsible for the future maintenance, monitoring, and abandonment of these wells. Additionally, the SUPERB Account will not provide compensation for future soil and/or groundwate sampling and/or laboratory analysis to document further natural attenuation to RBSL

Please complete the attached option letter and return it to my attention on or before August 10, 2004. On all correspondence related to this facility, please reference the UST Permit #12509. Should you have any questions, please feel free me at (803) 896-6584 or (800) 826-5435 (within South Carolina only).

Sincerely,

Read S Miner

enc: Options letter
June 20, 2003 correspondence

cc: Technical File (without enclosures)

Option

UST Permit # 12509 Facility Name Broughton St Site 11

Facility Address: 1505 Broughton St

City and Zip Code: Orangeburg SC 29115 County: ORG

No additional cleanup efforts are required for the June 30, 1993 UST release at the above referenced facility. Public notice is required as there are residual levels of Chemicals of Concern (CoC). Therefore, its existence is being highlighted on a registry of releases in the SCDHEC Freedom of Information office. The release will remain on this registry until all petroleum CoC have attenuated by natural and biological means to the Risk-Based Screening Level (RBSL). The following options are offered:

Option 1:

You may choose to abandon some or all the monitoring wells at this time. With your permission, the UST Program can procure the services of a contractor for well abandonment at no cost to you.

Option 2:

You may choose to keep some or all of the wells for future monitoring in order to verify that the intrinsic remediation process has been successful in reducing all CoC concentrations below RBSL. The SUPERB Account will not be responsible for the future maintenance, monitoring, and abandonment of these wells. Additionally, the SUPERB Account will not provide compensation for future soil and/or groundwater sampling and/or laboratory analysis to document further natural attenuation to RBSL.

At this time I choose (Please mark one): ✓ Option One.
_____ Option Two. Keep Monitoring Wells

J.N. PEASE ENVIRONMENTAL GROUP

Project #3615-26 (Broughton Street)

PROPERTY OWNER QUESTIONNAIRE
(Page 1 of 3)

Answer all questions or check the appropriate box
(Do not leave blanks, write "NA" if not applicable)

OWNER NAME: John F Brailsford III		EMAIL: shadygrove@sc.rr.com
PHONE: 8037079084	TITLE: President	COMPANY: Shady Grove Plantation & Nursery

ARE YOU AWARE OF THE FOLLOWING WITH REGARDS TO THE SUBJECT PROPERTY?

1. Any pending, threatened, or past **litigation** relevant to hazardous substances or petroleum products in, on, or from the subject property? (YES or NO) no

2. Any pending, threatened, or past **administrative proceedings** relevant to hazardous substances or petroleum products in, on, or from the subject property? (YES or NO) no

3. Any notices from governmental agencies regarding possible violations of environmental laws or possible liability relating to hazardous substances or petroleum products originating from the subject property? (YES or NO) no

4a. Any underground or aboveground storage tanks (UST or AST) currently ***or historically*** located on the subject property? (YES or No) If yes include numbers of tanks, volume, content and date of removal.

There were underground tanks years ago. Unsure if still there

5. How long have you owned property? (enter purchase date if known)

1984

5a. Provide square footage and date of construction for both property buildings.

22939 and 4000

5b. Describe property use and building occupancy under your ownership. (Provide rent roll if available)

Rental Property

To the best of my knowledge, the information presented is true and correct. This questionnaire was completed by:

Name:(Print) John F Brailsford III Title: President

Signature: Date: 4/27/26

PREVIOUS INVESTIGATIONS

1. Has a Phase I Environmental Site Assessment, asbestos survey, tank closure/removal report or other environmental study of the subject property ever been performed? DHEC did a report. I email 4/15/26 - Yes - No

2. If yes, what concerns were noted or recommendations made?_____
Please provide report dates and copies of all previous report(s).

PAST & PRESENT USAGE

1. To the best of your knowledge, has the subject property or any adjoining property been used for industrial purposes? - Yes - No
no

2. To the best of your knowledge, has the subject property or any adjoining property been used as a gasoline station, auto repair facility, dry cleaners, junkyard, landfill, waste treatment/storage/disposal facility, or recycling facility? - Yes - No

If yes, provide dates of operation: no

3. To the best of your knowledge, have any hazardous substances, petroleum products, or unidentified waste materials been dumped above grade, buried and/or burned, on the property? - Yes - No
no

4. Are there currently, or to the best of your knowledge have there historically been. any pits, ponds, or lagoons located on the property in connection with waste treatment or disposal activities? no - Yes - No

SITE CONDITIONS

1. Is subject property served by public water? Y - Yes - No

2. Is the subject property served by the municipal sewer system? Y- Yes - No

3. Are there any known septic systems or private/irrigation wells located on the property? - Yes N No

4. Are you aware of any groundwater monitoring wells located on the property? - Yes N No

5. Have you ever been contacted by SCDES for the purpose executing an access agreement for a groundwater monitoring well to be installed on the property? - Yes N No

6. Have any buildings been removed from the property under your ownership? - Yes N- No

4a. If yes, provide dates of removal and past use of the building(s) which was/were removed.

7. Provide company names that perform contract maintenance services, if any, at the property and frequency of service.

SERVICE	PROVIDER/CONTRACTOR	FREQUENCY
Janitorial	In house	as needed
Pest Control	ariel pest control	monthly
Landscaping	in house	as needed
Trash Collection	Dumpster provided	weekly
HVAC Maintenance	Ricky Padgett	as needed
Other		

8. What type of businesses operated within the large warehouse area in the primary building? See attached map and comment on building use as a "machine shop", to include date(s) of operation and specific activities.

Cash and Carry Grocery for about 5 years after purchase then has been used as storage since.

9. Were any aboveground tanks (i.e., waste oil, solvents, etc.) or other chemicals used or stored at the machine shop?

I have no information on machine shop.

10. When were machine shop operations discontinued?

Prior to purchase so no records

11. List other businesses which occupied the warehouse after the machine shop closed?

see question 8

12. Did the finishing of furniture or other wood products take place in the warehouse building?

NA

13. When did renovations occur in street-front suites along Broughton Street?

2025

14. How long has the church occupied the current building?

over 5 years I can check with property manager and see if they have exact dates

15. List previous occupants/uses and corresponding dates for the current church building.

Unsure

Initials: JTH

To be completed by the buyer; not the property owner

ASTM PHASE I ESA USER QUESTIONNAIRE

**Answer all questions; do not leave blank.* *Return To: jpegllc@comcast.net* *Questions? Call (843) 345-4765*

USER PROVIDED INFORMATION

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *"Brownfields Amendments"),* the *user* must provide the following information (if available) to the *environmental professional.* Failure to provide this information could result in a determination that *"all appropriate inquiry"* is not complete. [Reference: ASTM International Designation: E1527-13, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process"]

(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law? **Client Response: No, not to my knowledge**

(2.) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).

Are you aware of any Activity and Use Limitations (AULs) for the *property*, such as *engineering controls,* land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? **Client Response: No, not to my knowledge**

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

As the *user* of this *ESA* do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business? **Client Response: No, not to my knowledge**

(4.) Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property?* If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property?*

Client Response: Purchase price is consistent with real estate appraisal and/or "market area" value.

(5.) Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user,*

(a.) Do you know the past uses of the *property?* **Client Response: No**

(b.) Do you know of specific chemicals that are present or once were present at the *property?* **Client Response: No**

(c.) Do you know of spills or other chemical releases that have taken place at the *property?* **Client Response: No**

(d.) Do you know of any environmental cleanups that have taken place at the *property?* **Client Response: No**

(6.) The degree of obviousness of the presence of likely presence of contamination at the *property,* and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the *user* of this *ESA,* based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property?* **Client Response: No, not to my knowledge**

COMMENTS (*If you answered yes to any of the above, please provide details below or attach appropriate documentation.)*

To the best of my knowledge, the information presented is true and correct. This questionnaire was completed by:

56 Broome Corporate Parkway
Conklin, NY

HIG Project #
2097271
Client Project #
116753
Date Created
04/08/2026

This Research Summary identifies the products and services provided by Historical Information Gatherers, Inc. (HIG) for the above referenced site location. All products are provided as PDFs unless otherwise noted.

City Directory Pages/Abstracts

Research Methodology: A search was conducted for city directories that include coverage of the site area using HIG's City Directory Collection and other sources, if needed. Directories for the following years were identified for the site area. A comma between date ranges indicates a gap of 10 years or more in available city directories:

Orangeburg: (1964-2023)

The above listed directories were reviewed at approximate 5 year intervals to determine if the street(s) specified in the order were included in the directories and had listings for the site area. HIG attempted to identify former street names and aliases and if identified, these were also included in the review.

Research Results: City directory information, when provided, was used to create a multi-page file(s) named CD- followed by the street name. When City Directory Pages are provided, the publication name and date are shown at the top of each page. When a City Directory abstract is provided, the first page of the abstract includes the relevant publication information. The years of coverage identified for each street and any identified historical street names are as follows:

Broad Street: (1964-2023)
Broughton Street: (1964-2023)
Waring Street: (1964-2023)
Windsor Street: (1964-2023)

FIM+ Maps

The HIG Historical Map Collection and the United States Library of Congress Map Collection were searched for fire insurance maps (FIMs), real estate atlases and similar maps for the site location and adjoining properties. These maps were used to create a multi-page file named FIM+Maps. The maps have title blocks that include the map publisher, year the map was created and, if applicable, the year the map was last updated. The years provided are:

1922, 1931, 1947, 1958

Disclaimer & Limitation of Liability

This Research Summary and the related documents and images provided by Historical Information Gatherers (hereafter referred to as the “Site Specific HIG Data”) contain information obtained from a variety of public and private sources. Additional information for the site and surrounding properties may exist. Accordingly, there can be no guaranty or warranty that the information provided is complete for its particular intended purpose. No warranty expressed or implied, is made whatsoever in connection with the Site Specific HIG Data. Historical Information Gatherers specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular purpose. Historical Information Gatherers, its officers, employees and independent contractors cannot be held liable to anyone for any loss or damage, whether arising out of errors or omissions, negligence, accident or any other cause, resulting directly or indirectly from any information provided or any information not provided in the Site Specific HIG Data. Any liability on the part of Historical Information Gatherers is strictly limited to a refund equal to the amount paid for the Site Specific HIG Data.

PROFESSIONAL CERTIFICATIONS

NREP Registered Environmental Manager (REM) - #10923 **(Member Since 2001)**
Certified Lead Based Paint Risk Assessor and Inspector #LBP-R-7570-3
SCDHEC Licensed Asbestos Inspector #BI-01136

CAREER SUMMARY

Mr. Pease is the President of J. N. Pease Environmental Group, LLC (JPEG), a consulting firm that offers expertise in environmental due diligence projects. Executed projects include Phase I and Phase II site assessments, HUD/NEPA Environmental Reviews, HOME Environmental Assessments, lead-based paint inspections/risk assessments, asbestos surveys, underground storage tank assessments, and Brownfields assessments/negotiations. During his tenure as an environmental consultant, *Mr. Pease has personally completed over 2,500 Phase I projects* and worked extensively on the following aspects of environmental investigations: site investigation, data collection and analysis, client and legal interface, corrective action plan preparation, receptor surveys, project management, budget control, conceptual exposure model development, regulatory interface, third party access negotiations, records review, permitting, chain-of-title searches and report preparation. His previous project management experience included the direction of approximately 160 petroleum-contaminated sites located in the Carolinas, Georgia, and Tennessee for two major oil companies and a build-out of over 400 telecommunications towers throughout South Carolina. Mr. Pease also formerly worked for Georgia EPD and US EPA Region IV (under contract) and for Law Engineering where he served as a senior level project manager and environmental department head in the Charleston, SC office.

PROJECT EXPERIENCE

Phase I and II Environmental Site Assessments: Mr. Pease's primary area of expertise is in conducting Phase I and Phase II environmental site assessments. Mr. Pease has personally completed *over 2,500* Phase I projects located across South Carolina, North Carolina and Georgia. JPEG has contracted with regional developers, residential home builders, commercial lenders, commercial attorneys, municipalities, non-profit groups, conservation trusts, and area engineering firms to execute Phase I assessments prior to sales, purchases, and/or refinancing of real estate. Properties assessed include industrial facilities, commercial facilities, roadway corridors, brownfields, large acreage tracts (largest site assessed is 12,460 acres), beachfront hotels, restaurants, gasoline stations, dry cleaners, retail developments and wireless telecommunications towers. Assessment methodologies include AAI and ASTM protocols and non-mandatory client protocols. Phase I scopes are routinely expanded to address client concerns such as lead-based paint, asbestos, wetlands, and mold.
