Yes, that is okay to strike through.

Subject: [External] Question re CCA

Kim,

I am preparing to certify the Construction Cost Addendum for two pending 9% applications, and I have a question for you. The CCA certification states that "I have been provided and have reviewed the geotechnical reports and the estimated costs for all recommendations have been incorporated...". This appears to be a carryover from previous years in which a geotechnical report was required at application. Since this is no longer a requirement, our clients have not yet conducted a geotechnical report. Is it alright to strike through this provision?

Thanks,
Thompson
