Reference: **Phase I Environmental Site Assessment**
Dogwood Senior Village II
Greenwood, Greenwood County, South Carolina
S&ME Project No. 26610169

Dear Mr. Thomason:

S&ME, Inc. (S&ME) has completed a Phase I Environmental Site Assessment (Phase I ESA) on the approximately 14.5-acre parcel located at 1375 Mathis Road in Greenwood, Greenwood County, South Carolina (i.e., "subject property"). The attached report presents the findings of S&ME's Phase I ESA which was performed in accordance with ASTM E 1527-21 and S&ME Proposal No. 26610169 dated March 23, 2026. The purpose of this Phase I ESA was to identify, to the extent feasible, *recognized environmental conditions* in connection with the subject property.

ASTM E 1527-21 states that a Phase I ESA "meeting or exceeding" this practice and completed less than 180 days prior to the date of acquisition or intended transaction is presumed to be valid if the report is being relied on by the User for whom the assessment was originally prepared and the following components were completed: interviews, the regulatory review, site visit, and the declaration by the Environmental Professional responsible for the assessment. Please refer to Section 1.5 of this report for the viable start date for this Phase I ESA.

S&ME appreciates the opportunity to provide our services on this project. Please contact us at your convenience if there are questions regarding the information contained in this report.

Sincerely,

S&ME, Inc.

Edward Brantley

Phase I Environmental Site Assessment

DOGWOOD SENIOR VILLAGE II SITE
GREENWOOD, GREENWOOD COUNTY, SOUTH CAROLINA

Executive Summary

S&ME, Inc. (S&ME) has completed a Phase I Environmental Site Assessment (Phase I ESA) located at 1375 Mathis Road in Greenwood, Greenwood County, South Carolina (the "subject property"). The following executive summary is intended as an overview of the Phase I ESA, for the convenience of the reader. The complete report should be reviewed in its entirety prior to making decisions regarding this site.

The subject property is estimated to contain approximately 14.5 acres and is identified as Greenwood County tax parcel number 6846-016-831, currently owned by PHG Greenwood Land Holdings LLC. The subject property consists of wooded land and secondary growth. Ingress and egress to the subject property are via Mathis Road east of the subject property.

According to information reviewed by S&ME, the subject property has consisted of wooded land or open land since at least 1892. Adjoining properties consist of Dogwood Senior Village, residential structures, a powerline easement, cleared land, a pond, and wooded land.

S&ME contracted Lightbox to conduct an environmental database search of the subject property and the surrounding area, and Lightbox provided the EDR Radius Map Report with Geocheck® (EDR Report) as the environmental database report. The subject property was not identified in the EDR Report. The EDR Report identified three off-site listing of potential environmental concern within the applicable search radii of the subject property. Due to distance from subject property, regulatory status, and/or topographic groundwater flow, the listed facilities are not considered Recognized Environmental Conditions (RECs) to the subject property.

Mr. Edward Brantley of S&ME, under the guidance of Mr. Chris Daves, P.W.S., conducted a site reconnaissance of the subject property on March 25, 2026. The site reconnaissance was performed by walking accessible areas of the subject property.

No on-site findings of environmental concern were identified.

This assessment did not identify RECs, controlled environmental conditions, or significant data gaps in connection with the subject property. In addition, a Vapor Encroachment Condition (VEC) in connection with the subject property does not exist.

1.0 Introduction

S&ME conducted a Phase I ESA located at 1375 Mathis Road in Greenwood, Greenwood County, South Carolina (the "subject property") (**Appendix I, Figures 1-3**). The subject property is estimated to contain approximately 14.5-acre. The Phase I ESA was conducted using the ASTM International (ASTM) E 1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* and in accordance with S&ME Proposal No. 26610169 dated March 23, 2026.

1.1 Purpose

The goal of the Phase I ESA process is to identify, pursuant to ASTM E 1527-21, *recognized environmental conditions* in connection with the subject property. It is S&ME's understanding that the Phase I ESA is being conducted as part of due diligence activities for the future transfer of title.

The following pertinent definitions to this Phase I ESA are provided in ASTM E 1527-21:

- *Recognized Environmental Condition* (REC) - (1) the presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* due to a *release* to the *environment*; (2) the likely presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* due to a *release* or likely *release* to the *environment*; or (3) the presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* under conditions that pose a *material threat* of a future *release* to the *environment*.
- *Controlled Recognized Environmental Condition* (CREC) - a *recognized environmental condition* affecting the *subject property* that has been addressed to the satisfaction of the applicable regulatory authority or authorities with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *activity and use limitations* or *other property use limitations*).
- *Historical Recognized Environmental Condition* (HREC) - a previous *release of hazardous substances* or *petroleum products* affecting the *subject property* that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted user criteria established by the applicable regulatory authority or authorities without subjecting the *subject property* to any controls (for example, *activity and use limitations* or other *property use limitations*). A *historical recognized environmental condition* is not a *recognized environmental condition*.
- *Business Environmental Risk* (BER) - a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of *commercial real estate*, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope-of-services considerations, some of which are identified in Section 13 of ASTM E1527-21.
- *De minimis condition* - a condition related to a *release* that generally does not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a *de minimis condition* is not a *recognized environmental condition* nor a *controlled recognized environmental condition*.

1.2 Detailed Scope of Services

1.2.1 ASTM E 1527-21

S&ME's approach to performing this Phase I ESA consisted of four major tasks in accordance with ASTM Standard Practice E 1527-21.

Task 1 - A review of reasonably ascertainable public records for the subject property and the immediate vicinity was conducted. This review was performed to characterize environmental features of the subject property and to identify past and present land use activities, on or in the vicinity of the subject property, which may indicate a potential for RECs. The review of the reasonably ascertainable public records included:

1. Review of federal, state, tribal, and reasonably ascertainable local public records for the subject property and immediate vicinity.
2. Review of the standard historical sources: aerial photographs, fire insurance maps, local street directories, topographic maps, building and tax department records, interviews, and other relevant standard historical sources for the subject property and adjoining properties for evidence indicating the presence of RECs in connection with the subject property.
3. Review of land title records, including a copy of the current deed, back to 1940 or first developed use, whichever is earlier, if the documents are provided to S&ME by the Phase I ESA User.

Task 2 - A site reconnaissance was performed to identify visible signs of past or existing contamination on or adjacent to the subject property as visually observed from the subject property or public right-of-way. This reconnaissance was also performed to evaluate evidence found in our public record review that might indicate activities resulting in hazardous substances or petroleum products being used or deposited on the subject property. The site reconnaissance included the following activities:

1. A reconnaissance of the subject property and adjacent properties was performed to look for evidence of current and past property uses, signs of spills, stressed vegetation, buried waste, underground or above ground storage tanks (USTs or ASTs), subsidence, transformers, or unusual soil discoloration which may indicate the possible presence of contaminants on the properties.
2. The site reconnaissance involved a viewing of the periphery of the subject property and a walk-through of accessible areas of the site interior.
3. Areas of the subject property were photographed to document the current use(s) of the subject property, as well as conditions such as unusually discolored soil, stressed vegetation, or other significant features associated with the subject property.

Task 3 - Interviews with past and present property owners (if available), operators, occupants and appropriate local officials were conducted to consider any local knowledge of hazardous substances or petroleum products on the subject property or on adjacent properties.

Task 4 - Report preparation.

1.2.2 Exclusions from and Additions to Scope of Services

Unless specifically authorized as an addition to the Phase I ESA work scope, the assessment does not include sampling of environmental media (i.e., soil, surface water, soil gas, groundwater or air). In addition, unless specifically authorized, the Phase I ESA scope of services does not include ASTM E1527-21 non-scope considerations, including but not limited to:

- assessment of business risk issues such as asbestos-containing materials (ACMs).
- biological agents, cultural/historic resources.
- ecological resources.
- endangered species.
- health/safety.
- regulatory compliance.
- indoor air quality including any assessment of vapor intrusion, with the exception of the Vapor Encroachment Screening as discussed in Section 4.6.
- industrial hygiene; lead-based paint (LBP).
- lead in drinking water.
- mold, fungi or bacteria in buildings.
- polychlorinated biphenyls (PCBs).
- naturally occurring radon.
- substances not defined as hazardous substances per 40 CFR 312.
- or wetlands.

1.3 Significant Assumptions

Information obtained from the Client, the Client's representatives, individuals interviewed, and prior environmental reports was considered to be accurate unless S&ME's reasonable inquiries clearly revealed otherwise.

The groundwater within the local geologic province is typically contained in an unconfined (water table) aquifer. The slope of the water table under static conditions (no pumping interference) often approximates the land surface topography. Thus, the interpreted groundwater flow direction is assumed to be approximately the same as the topography of the ground surface. Perennial surface waters (creeks, streams, rivers, ponds, etc.) are assumed to act as discharge features for groundwater flow.

1.4 Limitations and Exceptions of Assessment

The Phase I ESA was conducted using ASTM E 1527-21. The findings of this report are applicable, and representative of conditions encountered at the subject property on the date of this assessment and may not represent conditions at a later date. The review of public records was limited to that information which was available to S&ME at the time this report was prepared. Interviews with local and state government authorities were limited to those people whom S&ME was able to contact during the preparation of this report. Information was derived from "reasonably ascertainable" and "practically reviewable" sources in compliance with our understanding of the standards set forth by ASTM E 1527-21.

Unless provided by the User, land title and judicial records were not reviewed for environmental liens or activity and use limitations (AULs) by S&ME.

1.5 User Reliance

The User of this report is Dogwood Senior Village II, LP. Use of this report by third parties will be at such party's sole risk except when granted under written permission by S&ME. Any such authorized use or reliance by third parties will be at the sole discretion of S&ME and subject to the same Agreement under which the work was conducted for the User.

The additional party's use and reliance on the report will be subject to the same rights, obligations, and limitations imposed on the User by our Agreement, unless otherwise agreed; however, the total liability of S&ME to all parties of the Phase I ESA shall be limited to the remedies and amounts as provided in the Agreement as a single contract. The additional party's use and reliance on the report shall signify the additional party's agreement to be bound by the proposal and contract that make up the Agreement between S&ME and the User.

According to standards set forth by ASTM E 1527-21, certain components of the Phase I ESA will expire 180 days from the date of initiation of that component and will therefore require updating if the date of use exceeds these time periods. The following table lists the dates of initiation for pertinent components on this assessment:

Table 1-1 – Dates of Initiation for Phase I ESA Components

Component	Date of Initiation
Environmental Database Search	March 25, 2026
Site Reconnaissance	March 25, 2026
Interviews	March 23, 2026
Environmental Lien Search	Not Provided
Environmental Professional Declaration	Date of Report

2.0 General Site Description

2.1 Site Location

The approximate 14.5-acre subject property is located at 1375 Mathis Road in Greenwood, Greenwood County, South Carolina. The location of the subject property is shown on **Figures 1-3** in **Appendix I**.

The following table summarizes the information associated with the tax parcels that comprise the subject property:

Table 2-1 – Tax Parcel Information

Parcel ID	Acreage	Street Address	Owners
6846-016-831	14.5	1375 Mathis Road Greenwood, SC	PHG Greenwood Land Holdings LLC

2.2 Site and Vicinity Characteristics

The subject property is located at 1375 Mathis Road in Greenwood, Greenwood County, South Carolina. The subject property consists of wooded land and secondary growth.

Property usage in surrounding areas of the subject property includes Dogwood Senior Village, residential structures, a powerline easement, wooded land, a pond, and cleared land.

3.0 User-Provided Information

Certain information identified in ASTM E 1527-21 is to be provided by the User of this report. S&ME provided a User Questionnaire with our proposal, and the questionnaire was completed on March 23, 2026, by Mr. Josh Thomason, at Piedmont Housing Group. A copy of the completed User Questionnaire is included in **Appendix VI**.

3.1 Title Records

The User did not provide S&ME with title records for review.

3.2 Environmental Liens or Activity and Use Limitations

Review of AULs and environmental liens by the Environmental Professional can help in determining if a REC is associated with the subject property. AULs can include both institutional and engineering controls and are often recorded in land title records in the restrictions of record rather than a typical chain-of-title or title abstract. According to ASTM E 1527-21, the User is responsible for providing land title (federal, state, tribal, and local) records that describe environmental liens or AULs back to 1980.

Mr. Thomason indicated on the User Questionnaire that he was not aware of AULs or liens against the subject property.

3.3 Specialized Knowledge

The User did not provide specialized knowledge that is material to potential RECs identified in connection with the Property.

3.4 Commonly Known or Reasonably Ascertainable Information

No commonly known or reasonably ascertainable information about the subject property within the local community that was material to RECs in connection with the subject property was reported to S&ME on the User Questionnaire by Mr. Thomason.

3.5 Valuation Reduction for Environmental Issues

Mr. Thomason indicated on the User Questionnaire that this Phase I ESA was being conducted as due diligence to aid the development of affordable multifamily new construction. He indicated the purchase price for the subject property reflects fair market value.

3.6 Owner, Property Manager, and Occupant Information

According to Greenwood County property records, the owner of the subject property the PHG Greenwood Land Holdings LLC. The subject property is currently wooded land and secondary growth. The subject property does not currently have occupants.

3.7 Reason for Performing the Phase I ESA

This Phase I ESA is being conducted as due diligence for purchasing and financing. The purpose of the Phase I ESA is to identify, pursuant to ASTM E 1527-21, RECs, CRECs, and HRECs in connection with the subject property.

3.8 Other

Other information was not provided by the Client.

4.0 Records Review

This section summarizes records obtained and reviewed to help identify RECs, HRECs, and CRECs in connection with the subject property.

4.1 Standard Environmental Record Sources

S&ME reviewed selected federal and state regulatory lists within an *approximate minimum search distance* of the subject property, as defined by ASTM E 1527-21. The reviewed lists were compiled by LightBox into the EDR Report, which is included in **Appendix II**. The EDR Report includes a listing of the databases, search distances, an explanation of each database, and figures depicting the approximate locations of regulated facilities identified in the vicinity of the subject property. Regulatory listings are limited and include only those facilities or incidents that are known to the federal and state agencies at the time of publication of various agency databases, as indicated in the EDR Report.

The subject property was not identified in the database searches presented in the EDR Report. Three off-site listings of potential environmental concern were noted in the EDR Report.

Table 4-1 Database Search Results Summary (Standard Records Sources)

Facility	Location Direction/ Distance Topographic Relationship	Record	Comment
Budweiser of Anderson Inc	630 Cobb Road 1,050 ft. southeast Down-gradient	UST	Former Underground Storage Tank (UST) facility. One 1,000-gallon diesel UST abandoned in 1990. Release reported in 1994. Received No Further Action (NFA) status in 1995.
Murphy USA 7723	1112 Woodruff Road 2,600 ft. south Down-gradient	UST, LUST, and Financial Assurance	Active UST facility. Two 12,000-gallon USTs abandoned in 2018. Two 25,000 and 26,000-gallon gasoline and diesel USTs currently in use. One release reported in 2018. Cleanup initiated in 2019. Based on USGS topo mapping, groundwater appears to flow southeast away from subject property
Greenwood One Hour Cleaners 2	916 Montague Street 4,500 ft. SE Down-gradient	RCRA-VSQG, SHWS, FINDS, ECHO, DRYCLEANERS	Active dry-cleaning facility. Very small quantity generator of hazardous waste. Based on USGS topo mapping, groundwater appears to flow southeast away from subject property.

Based on spatial distance, apparent direction of groundwater flow, and regulatory status, the listed facilities do not appear to pose a material threat of contamination to the subject property.

The EDR report contains an Orphan Summary which are sites that cannot be located by EDR due to incomplete address information. Two additional facilities were identified that are believed to be within the specified search radius. Due to distance from the subject property, regulatory status, and/or groundwater flow, these facilities do not pose a material threat to the subject property.

4.1.1 Regulatory File Review

Based on current information and nearby regulated facilities the Environmental Professional in charge of this Phase I ESA determined a state agency file review was not necessary for off-site facilities.

4.2 Additional Environmental Record Sources

4.2.1 EDR Supplementary Sources

The EDR Report includes additional environmental records not listed among the standard federal, state, and tribal databases, such as historical auto stations, historical dry cleaners and manufactured gas plants.

No additional or supplementary environmental records were listed in the EDR Report.

4.2.2 Tribal Record Sources

The EDR Report did not reveal listings of tribal environmental records.

4.2.3 Other Record Sources

- A search of the Environmental Protection Agency (EPA) Envirofacts database (https://enviro.epa.gov/) was conducted. No other information was available.
- South Carolina Department of Environmental Services (SCDES) Underground Storage Tank (UST) Registry Search: (https://apps.dhec.sc.gov/Environment/USTRegistry).
- A search of SCDES Bureau of Land and Waste management Public Records Locator Tool: (https://sc-dhec.maps.arcgis.com/apps/webappviewer/index.html?id=1b0f291a19d14159a143c8a738673fbc) was conducted. No further information was available.
- S&ME, Dogwood Senior Village II, May 3, 2022 Phase I ESA

S&ME is familiar with the subject property, having conducted a Phase I ESA on May 3, 2022. The previous Phase I did not identify RECs, CRECs, HRECs, or VECs in connection to the subject property.

Polyfluoroalkyl Substances (PFAS)

On May 8, 2024, the United States Environmental Protection Agency (EPA) published a final rule designating two per- and polyfluoroalkyl substances (PFAS) – perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) – as CERCLA hazardous substances. The final rule became effective on July 8, 2024. Based on this action by EPA, Phase I ESAs completed in accordance with ASTM E1527-21 after July 8, 2024, must include PFOA and/or PFOS during the evaluation of RECs.

Potential sources of PFAS can include (but not limited to) chrome plating facilities, textile and leather production, electronics manufacturing, automotive and machinery maintenance, oil refineries, and aerospace facilities.

The following internet sources were reviewed regarding PFAS:

- EPA: https://www.epa.gov/pfas.
- SCDES: Ambient Surface Water PFAS Monitoring: https://gis.dhec.sc.gov/gisportal/apps/webappviewer/index.html?id=162b8d1e7fdf459db7ff6b251671651f.

- EWG – Suspected Industrial Discharges of PFAS: https://www.ewg.org/interactive-maps/2021_suspected_industrial_discharges_of_pfas/map/.
- EWG – Tap Water Database: https://www.ewg.org/tapwater/.
- City of Greenwood: 2025 Water Quality Report: https://greenwoodcpw.com/wp-content/uploads/2025/05/2025-Annual-Drinking-Water-Quality-Report.pdf.

During our review of available resources, consideration for the potential impact of PFOA and PFOS to the subject property was assessed. It is the opinion of the Environmental Professional that based on the current and historical uses of the subject property, adjoining and surrounding properties, the likelihood of PFOA and PFOS impacts to the subject property is low and therefore does not constitute a REC.

No additional records were reviewed during this Phase I ESA

4.3 Physical Setting Sources

Physical setting sources were reviewed to provide information about the geology and hydrogeology of the area of the subject property.

Surface Drainage and Soil

Based upon a review of the topographic map, it appears that the subject property is generally flat with slopes slightly downward towards the on-site tributaries (see **Figure 2,** United States Geological Survey [USGS] Topographic Map, **Appendix I**). The subject property has an estimated surface elevation of approximately 590-620 feet above mean sea level.

The United States Department of Agriculture (USDA) Soil Survey website was reviewed to identify the soil type underlying the subject property. A review of the information presented on the website indicated that the majority of the subject property as being underlain by the following soils:

Table 4-3 – Site Soils

Soil Series	Drainage	Runoff Class	Typical Depth to Water
Cecil Sandy Loam (CdB) 2-6 percent slopes	Well	Low	>80 inches
Cecil Sandy Loam (CdC) 6-10 percent slopes	Well	Medium	>80 inches
Enon Sandy Loam (EnB) 2-6 percent slopes	Well	High	>80 inches
Enon Sandy Loam (EnC) 6-10 percent slopes	Well	Medium	>80 inches

Depth to a restrictive feature is typically greater than 80 inches. These depths can vary significantly as the result of past site grading activities on the subject property.

Bedrock

Bedrock was not observed on the subject property.

Hydrogeology

According to the *Geology of the Carolinas,* (Horton, Jr. J. Wright and Zullo A. Victor, University of Tennessee Press, 1991), the subject property lies in the Piedmont Physiographic Province. The Piedmont is characterized by rolling relief drained by numerous creeks. Generally, soils in the Piedmont formed by the weathering of the underlying rock. Parent material is felsic/mafic residuum weathered from metamorphic and igneous rocks, including gneiss, schist, and granite. In the general area of the subject property, the soils are gently sloping or sloping sandy loams or loamy sands with red, brown, or yellow subsoil.

In the Piedmont Province, the soils typically have moderate to rapid permeability; thus, readily transmitting groundwater. The movement of groundwater through the sands and clays is strongly influenced by topography which generally controls the location of recharge and discharge zones. Groundwater within the Piedmont generally moves from topographically high areas (recharge zones) to topographically low areas within and along stream valleys (discharge areas).

4.4 Historical Use Information on the Subject Property

S&ME reviewed historical use information from LightBox and other sources as part of this Phase I ESA. The following documents were reviewed:

- Aerial Photographs for the years 1936, 1939, 1949, 1951, 1961, 1964, 1972, 1981, 1985, 1989, 1994, 1999, 2005, 2006, 2011, 2013, 2016, 2017, 2019, 2022, 2023, 2024, and 2025.
- Historical Sanborn Fire Insurance Maps were not available for the subject property.
- Local Street Directories for the years 1992, 1995, 2000, 2005, 2010, 2014, 2017, 2022, and 2024.
- Topographic maps for the years 1892, 1949, 1978, and 2014.
- Building Records.
- Zoning/Land Use Records.
- Land Title Records.
- Property Tax Files.

Historical information is included in **Appendix III**. S&ME's historical document review findings for the subject property are presented in the following table.

Table 4-4 – Historical Use Summary Table (On-site)

Listing/Observed Feature	Years Found for this Listing	Source(s)
The subject property consists of wooded and open land.	1892-1951	Aerial Photographs and Topographic Maps
The subject property consists of a wooded land.	1961-2019	Aerial Photographs and Topographic Maps
The subject property consists of wooded and open land.	2022-2025	Aerial Photographs and Topographic Maps

4.5 Historical Use Information on Adjoining Properties

Historical information including the above-referenced resources were reviewed to assess off-site historical land uses. S&ME's historical document review findings for adjoining properties are presented in the following table.

Table 4-5 – Historical Use Summary Table (Adjacent Properties)

Listing/Observed Feature	Years Found for this Listing	Source(s)
North Adjacent Properties North adjacent properties consisted of undeveloped land in 1892. Since approximately 1936, north adjacent properties have consisted of wooded land and residential structures.	1892-2025	Aerial Photographs, Topographic Maps, and City Directories
South Adjacent Properties South adjacent properties consisted of undeveloped land in 1892. From approximately 1936 to approximately 2019 south adjacent properties consisted of wooded land. Residential structures were first observed in 1999. Clearing and construction for the present day Dogwood Senior Village began in approximately 2022.	1892-2025	Aerial Photographs, Topographic Maps, and City Directories
East Adjacent Properties East adjacent properties consisted of undeveloped land in 1892. From approximately 1936 to approximately 1972, east adjacent properties consisted on undeveloped land. Apparent trailers were observed from approximately 1981 to approximately 2006. Since approximately 2011, east adjacent properties have consisted of open land.	1892-2025	Aerial Photographs, Topographic Maps, and City Directories
West Adjacent Properties West adjacent properties consisted of undeveloped land in 1892. From approximately 1936 to approximately 1939, west adjacent properties	1892-2025	Aerial Photographs, Topographic Maps, and City Directories

Listing/Observed Feature	Years Found for this Listing	Source(s)
consisted of wooded land. From approximately 1949 to approximately 1989, a powerline easement is observed to the west. Since 1994, west adjacent properties have consisted of a pond, powerline easement, wooded land, and residential structures.		

4.6 Vapor Encroachment Screening

A Vapor Encroachment Screening (VES) of identified potential contaminant sources was performed as part of this Phase I ESA. The conclusions of the VES indicate that a Vapor Encroachment Condition (VEC) does not exist in connection to the subject property. The VES completed by S&ME is provided in **Appendix IV**.

5.0 Site Reconnaissance

The site reconnaissance was performed by Mr. Edward Brantley of S&ME under the guidance of Mr. Chris Daves, P.W.S., on March 25, 2026. Representative photographs of the subject property and the Site Reconnaissance Checklist are included in **Appendix V**.

5.1 Methodology and Limiting Conditions

The purpose of the site reconnaissance is to obtain information indicating the likelihood of identifying RECs in connection with the subject property. The site reconnaissance was performed by walking accessible areas of the subject property.

5.2 General Site Setting

5.2.1 Current Use(s) of the Subject Property

The subject property currently consists of wooded land and secondary growth (Photographs 1-4).

5.2.2 Past Use(s) of the Subject Property

No obvious past uses of the subject property were observed.

5.2.3 Current Use(s) of Adjoining and Surrounding Properties

The current uses of the adjoining properties were identified to the extent that they were visually observed from the subject property during our field reconnaissance or during interviews or in the records review. Descriptions of adjoining properties are provided below:

- **North**: Wooded land and residential structures (Photograph 5).
- **East**: Cleared land (Photograph 6).
- **South**: Dogwood Senior Village and residential structures (Photographs 7-8).

- **West:** Wooded land, powerline easement, a pond, and residential structures (Photograph 9).

5.2.4 Past Use(s) of Adjoining and Surrounding Properties

No indications of the previous use of adjoining and surrounding properties were noted during the site reconnaissance.

5.2.5 Geologic, Hydrogeologic, Hydrologic, and Topographic Conditions

The subject property is slightly rolling with downward slopes towards the on-site drainages. Observable surface soils consisted of sandy loams and loamy clays. Three tributaries and two wetland areas were observed on the central and southern portions of the subject property (Photographs 10-13).

5.2.6 Description of Structures and Roads

No structures or roads were observed on the subject property. Ingress and egress to the subject property are via Mathis Road to the east of the subject property.

5.2.7 Potable Water Supply and Sewage Disposal System

Multiple sanitary sewer manholes and piping were observed on the subject property (Photograph 14).

5.3 Exterior Observations

Exterior observations from the site reconnaissance are summarized in the following table.

Table 5-1 – General Exterior Observations

Description	Reported or Observed On-site (Y/N)	Comments (Noteworthy observations are further discussed below the table.)
Hazardous Substances and Petroleum Products	N	
Underground Storage Tanks (USTs)	N	
Aboveground Storage Tanks (ASTs)	N	
Oil/Water Separators	N	
Strong, Pungent, or Noxious Odors	N	
Drums, Barrels and/or Containers > 5 Gallons	N	
Unidentified Substance Containers	N	
Potential Polychlorinated Biphenyls (PCB)-Containing Equipment	N	

Description	Reported or Observed On-site (Y/N)	Comments (Noteworthy observations are further discussed below the table.)
Hydraulic Equipment	N	
Utilities and Stormwater Management	Y	Multiple sanitary sewer manholes and piping observed throughout the subject property (Photograph 14).
Pits, Ponds, Lagoons, and Surface Waters	Y	Three tributaries were observed on the central and the southern portions of the subject property (Photographs 10-12). Two wetland areas were also observed adjacent to an on-site tributary (Photograph 13).
Surface Water Discoloration, Sheen or Free Product	N	
Stained Soil or Pavement	N	
Stressed Vegetation	N	
Solid Waste	N	
Process/industrial Wastewater Discharges	N	
Wells	N	
Septic Systems	N	
Heating/Cooling	N	
Drains and Sumps	N	
Other	N	

5.4 Interior Observations

No structures were present on the subject property. As such, there were no interior observations.

6.0 Interviews

S&ME contacted individuals and local authorities that may have information concerning existing conditions, activities, and history of the subject property and off-site facilities. Brief summaries of the information from those interviews are discussed below. Copies of interview documentation are included in **Appendix VI**.

6.1 Interview with Past and Present Owners

Mr. Josh Thomason completed a questionnaire as a part of this report. Mr. Thomason is a representative of the current owner (Piedmont Housing Group) and User of this report. Mr. Thomason provided the following information regarding the subject property:

- Mr. Thomason was not aware of AULs or environmental liens on the subject property.
- The purchase price of the subject property did not reflect suspected environmental contamination.

- Mr. Thomason was not aware of contamination on the subject property.
- Mr. Thomason was not aware of past or present USTs or land use of residual biosolids located on the subject property.
- Mr. Thomason noted the subject property is vacant and that water, sewer, and power are available.

6.2 Interview with Key Site Manager

See Section 6.1.

6.3 Interview with Occupants

The subject property is currently not occupied.

6.4 Interview with Local Government Officials

S&ME attempted to interview the Greenwood Fire Department Station #2, via phone call, to request information concerning fire and hazardous material responses at the subject Property (March 30-31, 2026). At the time of this report, no responses had been received from the agency.

6.5 Interviews with Others

No other interviews were performed for this Phase I ESA.

7.0 Findings and Opinions

The results of the Phase I ESA are summarized in the following sections.

7.1 On-Site Findings

No on-site findings of environmental concern were observed on the subject property.

7.2 Off-Site Findings

The following off-site findings were identified during this assessment:

- Multiple off-site listings of potential environmental concern were identified in the EDR Radius Report.

7.3 On-Site Opinions

No on-site findings of environmental concern were observed; thus, S&ME has no opinions to render.

7.4 Off-Site Opinions

The following opinion is provided concerning the off-site findings of this assessment:

- The off-site EDR listings **are not considered RECs** in connection with the subject property due to their regulatory listing, distance from the subject property, the information in the EDR Report, and/or the

topographic relationships with the subject property. In addition, a VEC in connection with the subject property does not exist.

7.5 Data Gaps

The following data gaps were identified during this assessment:

- Land title and judicial records were not reviewed for environmental liens or AULs; however, the Client reported no knowledge of environmental liens or AULs.
- Lack of local government official review.

These data gaps **are not considered significant** to our ability to identify RECs in connection with the subject property.

8.0 Conclusions

S&ME has performed a Phase I ESA in conformance with the scope and limitations of ASTM E 1527-21 of the subject property located at 1375 Mathis Road in Greenwood, Greenwood County, South Carolina. Exceptions to or deletions from this practice are described in **Section 1.4** and **Section 9** of this report.

This Phase I ESA did not identify any RECs, CRECs, or significant data gaps in connection with the subject property. Based on the information obtained and the findings of this assessment, it is the opinion of the Environmental Professional that further assessment is not warranted.

9.0 Deviations

No deviations from the standard were made.

10.0 Additional Services

No additional services were performed by S&ME.

11.0 References

Material references are cited within the report text, unless listed below.

12.0 Signature(s) of Environmental Professional(s)

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312, and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Chris Daves, P.W.S.
Principal Scientist/Senior Reviewer

13.0 Qualification(s) of Environmental Professional(s)

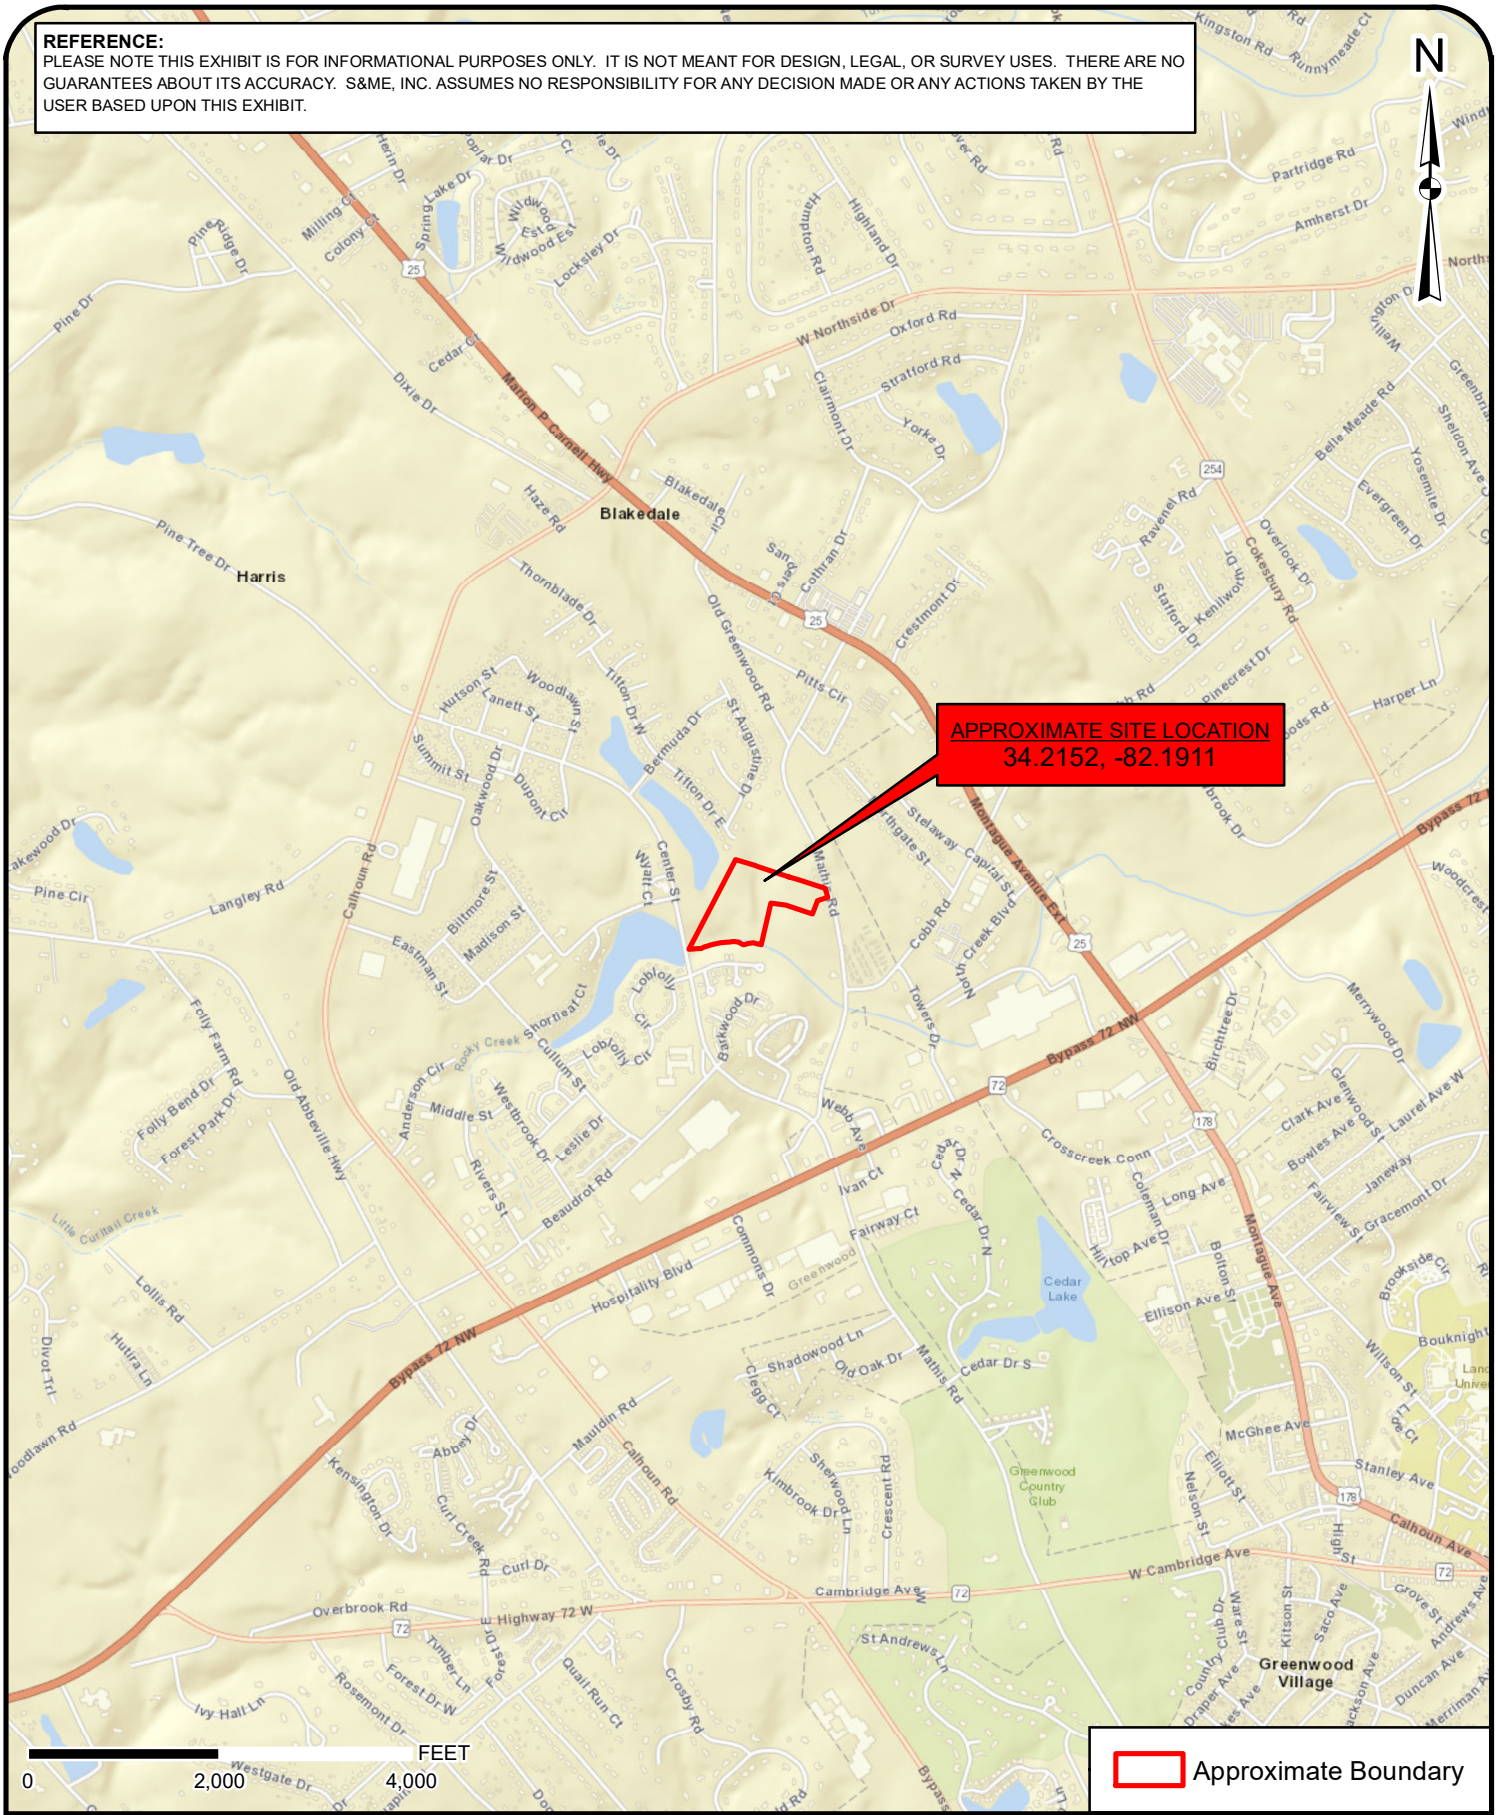

S&ME delivers engineering, design, planning, environmental, and construction services for the built environment. Founded in 1973, we have grown to an 1,100-person corporation operating from 34 offices across the United States.

Qualifications of the Environmental Professionals and staff who contributed to this Phase I ESA are included in **Appendix VIII**.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of state- and tribal hazardous waste facilities

SHWS: State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

A review of the SHWS list, as provided by EDR, and dated 03/04/2025 has revealed that there is 1 SHWS site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
GREENWOOD ONE HOUR C	***916 MONTAGUE ST***	***ESE 1/2 - 1 (0.846 mi.)***	***5***	***12***
EPA ID: SCDRY0053127				

Lists of state and tribal leaking storage tanks

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Health & Environmental Control's Leaking UST list.

A review of the LUST list, as provided by EDR, and dated 10/15/2025 has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Health & Environmental Control's list: Comprehensive Underground Storage Tanks.

A review of the UST list, as provided by EDR, and dated 10/07/2024 has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

Facility Id: 04798				
Status: Abandoned				

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER RELEASE site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
MURPHY USA 5369	***508 A BY PASS 72 NW***	***S 1/4 - 1/2 (0.345 mi.)***	***B3***	***9***

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER site within approximately 0.25 miles of the target property.

GREENWOOD ONE HOUR CLEANERS 2 (Continued) **1000209012**

Environmental Interest/Information System:
The South Carolina Department of Health and Environmental Control (DHEC) Environmental Facility Information System (SC-EFIS) integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

SHWS: Site Assessment Section Project List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

State and tribal institutional control / engineering control registries

RCR: Registry of Conditional Remedies

The Bureau of Land and Waste Management established this Registry to help monitor and maintain sites that have conditional remedies. A Conditional Remedy is an environmental remedy that includes certain qualifications. These qualifications are divided into two major categories: Remedies requiring Land Use Controls and Conditional No Further Actions.

Date of Government Version: 10/01/2024

AUL: Land Use Controls

The term Land Use Controls or "LUCs" encompass institutional controls, such as those involved in real estate interests, governmental permitting, zoning, public advisories, deed notices, and other legal restrictions. The term also includes restrictions on access, whether achieved by means of engineered barriers (e.g., fence or concrete pad) or by human means (e.g., the presence of security guards). Additionally, the term includes both affirmative measures to achieve the desired restrictions (e.g., night lighting of an area) and prohibitive directives (e.g., restrictions on certain types of wells for the duration of the corrective action). Considered altogether, the LUCs for a facility will provide a tool for how the property should be used in order to maintain the level of protectiveness that one or more corrective actions were designed to achieve.

VCP: Voluntary Cleanup Sites

Sites participating in the Voluntary Cleanup Program. Once staff and a non-responsible party have agreed upon an approved scope of work for a site investigation and/or remediation, the party enters into a voluntary cleanup contract. Staff oversees the cleanup efforts to ensure that activities are performed to our satisfaction. Upon completion of the negotiated work in the voluntary cleanup contract, the non-responsible party receives State Superfund liability protection.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

ALLSITES: Site Assessment & Remediation Public Record Database
The South Carolina Department of Health and Environmental Control is pleased to have the Public Record for your review. The purpose of this database is two-fold. First, it will provide to communities another form of notice of cleanup activity, allowing them to have more information about assessment and cleanup activities in their area and in the State. Second, it can assist those seeking to redevelop brownfield properties within South Carolina.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by S&ME, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

EXECUTIVE SUMMARY

DESCRIPTION

The LightBox City Directory Report is designed to assist environmental professionals in evaluating potential liabilities on select properties resulting from past activities. The report includes a search of available business directory data at approximately five-year intervals.

SOURCES

Through agreements with major city directory publishers, including Cole Information, InfoUSA, and Bresser, as well as our own collections (Haines & Stewart), the LightBox City Directory Report offers comprehensive national coverage.

LightBox is authorized to reproduce and redistribute all works featured in this report. The purchaser of this LightBox City Directory Report may include it in their final report(s).

This report includes a search of the following sources:

SCHEDULE B–SECTION II
COMMITMENT EXCEPTIONS
FILE NO: 016999–00207 DATE: 1/31/2022

Items 1 thru 10 , are not matters of survey.

11) These matters as shown on a plat for Piedmont Housing Group by Piedmont Surveying, Inc. dated January 29, 2022 and recorded on 2/11/2022 in Plat Book 158 Page 100 to include the following: overhead power line. (see survey as shown).

12) Right of way Easement to the South Carolina department of Highways and Public Transportation as recorded in Book 357 at page 875 in the Greenwood County Records. (not on this tract).

13) Easement to the county of Greenwood as recorded in Book 289 at page 640 in the Greenwood County Records. (not on this tract).

14) Right of Way to the Commissioners of Public Works in the City of Greenwood as recorded in Book 388 at Page 180 in the Greenwood County Records. (not on this tract).

15) Right of Way Easement to the South Carolina Department of Highways and Public Transformation as recorded in Book 341 at page 886 in the Greenwood County Records. (not on this tract).

16) Easement to Duke Power as recorded in Book 279 at Page 804 in the Greenwood County Records. (not on this tract).

17) Easement to Greenwood Telephone Co. as recorded in Book 76 at Page 241 in Greenwood County Records. (not on this tract).

18) Easement to Greenwood Telephone Co. as recorded in Book 76 at Page 487 in the Greenwood County Records. (not on this tract).

19) Easement to Greenwood Telephone Co. recorded in Book 114 at Page 283 in the Greenwood County Records. (not on this tract).

20) Right of Way Easement to Greenwood County as recorded in Book 140 at Page 253 in the Greenwood County Records. (not on this tract).

21) Right of Way to the Commissioners of Public Works of the City of Greenwood as recorded in Book 169 at Page 128 in the Greenwood County Records. (not on this tract)

22) Right of Way to the Commissioners of Public Works of the City of Greenwood as recorded in Book 169 at Page 130 in the Greenwood County Records. (not on this tract).

23) Easement to Greenwood Telephone Co. as recorded in Book 195 at Page 523 in the Greenwood County Records. (not on this tract).

24) Right of Way to the City of Greenwood as recorded in Book 195 at Page 261 in the Greenwood County Records. (not on this tract).

25) Right of Way to the Commissioners of Public Works of the City of Greenwood as recorded in Book 203 at Page 524 in the Greenwood County Records. (as shown on survey).

26) Right of Way to the Commissioners of Public Works of the City of Greenwood as recorded in Book 209 at Page 395 in the Greenwood County Records. (not on this tract).

27) Easement to Duke Power Company as recorded in Book 222 at Page 212 in the Greenwood County Records. (as shown on survey).

28) Right of Way to the Greenwood Metropolitan District of the County of Greenwood as recorded in Book 231 at Page 501 in the Greenwood County Records. (not on this tract).

LEGAL DESCRIPTION
TRACT B
THE SURVEY LEGAL DESCRIPTION
AND THE TITLE LEGAL DESCRIPTION
INCLUDE THE SAME PROPERTY
PID NO: 6846–016–831

All that certain piece, parcel or tract of land lying and being in the County of Greenwood, State of South Carolina and being more particularly shown and described as Tract B, 14.50 acres, as shown on plat prepared for Piedmont Housing Group, by Piedmont Surveying, Inc. dated January 2, 2022 and recorded on February 11, 2022 in Plat Book 158 at Page 100 in the Greenwood County Records.

Beginning at a new # 4 rebar, having South Carolina State Plane Coordinates N: 868491.6, E: 1640765.7, and being a corner common with the Right of Way Mathis Road, property of Central Trust Company, and the herein described tract; thence along the property of Central Trust Company and the herein described tract the following metes and bounds; thence S 76°28'52 W a distance of 119.61'to an new # 4 rebar; thence S 18°55'10 W a distance of 143.35'to an new # 4 rebar; thence N 71°16'19 W a distance of 288.53'to an new # 4 rebar; thence N 81°13'25 W a distance of 156.19'to an new # 4 rebar; thence S 14°10'32 W a distance of 419.03'to an new # 4 rebar; thence S 14°10'32 W a distance of 7.17'to a point in the center of Rocky Creek, being a corner common with property of Central Trust Company, property of Beattie Development, LLC, and the herein described tract; thence along the center line of Rocky Creek, the property of Beattie Development, LLC, and the herein described tract the following metes and bounds; N 85°47'07 W a distance of 17.74'to a point in the creek; thence N 72°36'50 W a distance of 17.21'to a point in the creek; thence S 84°57'18 W a distance of 76.75'to a point in the creek; thence N 64°07'01 W a distance of 56.89'to a point in the creek; thence S 86°21'55 W a distance of 55.14'to a point in the creek; thence N 87°24'49 W a distance of 102.80'to a point in the creek; thence S 80°52'48 W a distance of 107.81'to a point in the creek; thence S 73°19'52 W a distance of 62.38'to a point in the creek; thence S 64°38'43 W a distance of 43.41'to a point in the creek; thence N 85°26'05 W a distance of 32.01'to a point in the creek; thence S 76°52'48 W a distance of 55.81'to a point in the creek; thence S 68°30'22 W a distance of 43.50'to a point in the creek; thence S 88°54'31 W a distance of 101.95'to a point in the creek, being a corner common with property of Beattie Development, LLC, Right of Way Center Street, property of GMI Holdings, Inc. and the herein described tract; thence along property of GMI Holdings, Inc., and the heroin described tract N 27°36'28 E a distance of 1024.14'to an old # 4 rebar, being a corner common with GMI Holdings, Inc. property of George B. Wilson, and the herein described tract; thence along the property of George B. Wilson, and the herein described tract S 73°05'49 E a distance of 581.27'to an old 1" pipe, being a corner common with property of George B. Wilson, property Of Allen Ware, and the herein described tract; thence along property of Allen Ware, and the herein describe tract S 73°04'19 E a distance of 120.21'to an old ½" pipe, being a corner common with Allen Ware, property of Renita B. Coleman, and the herein described tract; thence along property of Renita B. Coleman, and the herein described tract S 73°38'18 E a distance of 288.00'to an old ¾" pipe, being a corner common with the property of Renita B. Coleman, Right of Way Mathis Road and the herein described tract; thence along the Right Of Way of Mathis Road and the herein described tract S 13°52'23 E a distance of 109.38'to a the point of Beginning and containing 14.50 acres.

Appendix IV – Vapor Encroachment Screening

Attachment - Tier 1 Vapor Encroachment Screening Report

♦ Introduction

S&ME has conducted a Phase I Environmental Site Assessment (ESA) for the subject property located at 1375 Mathis Road in Greenwood, Greenwood County, South Carolina. The Phase I ESA was performed in accordance with American Society for Testing and Materials (ASTM) E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM 2021), which requires the consideration of confirmed or potential releases of hazardous substances and/or petroleum products that may pose a threat of contamination to the subject property, including an evaluation of the potential migration of vapors. The evaluation of potential migration of contaminant vapors for this Phase I ESA, herein referred to as a Tier 1 Vapor Encroachment Screening (VES), was accomplished utilizing procedures described as Tier 1 Screening in ASTM E2600-22, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (ASTM 2022) and, if applicable, using the refined search distances presented by Buonicore (2009), as described below.

♦ Purpose

The purpose of this VES is to assist in evaluating the existence of Vapor Encroachment Conditions (VECs) at the subject property. The VES was performed to identify releases or potential releases of chemicals of concern on or near the subject property and to evaluate the likelihood of vapors migrating from the releases via the subsurface to the subject property. The presence or likely presence of vapors containing chemicals of concern in the subsurface of the subject property constitutes a VEC and may also constitute a *recognized environmental condition* (REC), as defined by ASTM E1527-21.

♦ Evaluation Process

The following information was reviewed during the Tier 1 VES to identify releases or potential releases of chemicals of concern on or near the subject property and to evaluate the likelihood of vapors migrating from the releases via the subsurface to the subject property:

- The type of contaminant (petroleum product vs. non-petroleum product known or suspected to have been stored on-site or at identified off-site sources.
- The distance between identified off-site sources and the nearest subject property boundary.
- Information of known or assumed groundwater flow directions(s) with respect to the subject property.
- The potential for preferential pathways or barriers to exist between the identified off-site sources and the subject property boundary.
- Physical setting and other information sources.

The ASTM E 2600-22 Tier 1 Screening process recommends initial screening distances to estimate contaminant plume length and width with no empirical plume data. In cases where the direction of groundwater flow is known or can be reasonably assumed, those distances were refined under a conservative scenario using calculations presented by Buonicore (2009). The resulting vapor screening distances (*i.e.*, distances from a potential off-site contaminant source to the nearest boundary of the subject property) are presented in Table 1 with respect to the type of contaminant and the known or presumed direction of groundwater flow.

Table 1 - VES Area of Concern (AOC) Screening Distances

Contaminant Type	Source Location with respect to the nearest Subject Property boundary and considering known or assumed groundwater flow direction[3]		
	Up-gradient	Cross-gradient	Down-gradient
Non-petroleum COC[1] (see ASTM E 2600-15, Appendix X6)	1,760 feet (1/3rd mile)	365 feet	100 feet
Petroleum COC NAPL [2]	528 feet (1/10th mile)	165 feet	100 feet
Petroleum COC Dissolved	528 feet (1/10th mile)	95 feet	30 feet

Notes: (1) COC – Chemicals of Concern
(2) NAPL – Non-Aqueous Phase Liquid (*i.e.*, free product)
(3) Groundwater Flow Direction – if not known or assumed, use search distance of 1,760 feet for up-gradient, cross-gradient, and down-gradient

♦ Results

Based on our review of information collected as part of the Phase I ESA process, the subject property was not identified as a potential vapor contaminant source. Potential off-site contaminant sources were evaluated with respect to the process, screening distances, type of contaminant, and known or assumed groundwater flow direction. No off-site facilities were identified within the AOC.

♦ Conclusions

Based on the processes described herein, the following conclusions were drawn from this VES: a VEC with respect to the subject property does not exist.

SITE RECONNAISSANCE CHECKLIST
Phase I Environmental Site Assessment

Site and Project Information

Site Name: Dogwood Senior Village II

Job Number: 26610169

Site Address: 1375 Mathis Road, Greenwood, Greenwood County, South Carolina

Date: 2026-03-25

Site Reconnaissance performed by: Edward Brantley

Accompanied by: N/A Representing whom: S&ME

General Property Description:

Structures (# and use of buildings, type of construction, # of stories, approx. age, current source of heating fuel, apparent age of current heating system, evidence of former heating system, presence of floor drains, sumps, elevators, chemical storage, current/past septic systems): no structures

Site Manager (name, title, affiliation, period on-site): N/A

Occupants (name, title, affiliation, period of occupancy): None

Pavements (type, general condition): None

Limitations (locked doors, unsafe conditions, ground cover, low light, excluded areas): None

Inaccessible areas (location, size, why inaccessible): None

Topography: Drainage towards on-site tributaries

Soil Type: Sandy loams and loamy clays

Rock Outcrops: None

Apparent direction of G/W flow: Towards on-site tributaries

On-Site Observations:

SITE FEATURES	OBSERVED (Y/N)	DESCRIPTION
USTs	No	
ASTs	No	
Drums	No	
Staining/Spills	No	
Solid Waste Storage / Disposal	No	
Unusual or Noxious Odors	No	
Transformers/Other PCB Equipment	No	
Drums, Barrels and/or Containers > 5 Gallons	No	
Stressed vegetation	No	
Discolored or Disturbed Soil	No	
Mounding or Piles of Soil	No	
Evidence of Land Filling	No	
Depressions	No	
Pits, Ponds, or Lagoons	No	
Railroad Spurs	No	
Monitor Wells	No	
Municipal Water/Sewer	Yes	Multiple sanitary sewer manhole and piping observed throughout the subject property.
Water Supply Wells/Septic Tanks	No	
Other	No	

Are MSDS's available for stored chemicals: N/A

Non-hazardous waste disposal by: N/A

Hazardous waste disposal by: N/A

Off-Site Observations:

Property to the **north** is at an **higher** elevation than subject property	Describe observations: Wooded land and residential structures.
Property to the **east** is at a **equal** elevation than subject property	Describe observations: Cleared land.
Property to the **south** is at an **lower** elevation than subject property	Describe observations: Dogwood Senior Village and residential structures.
Property to the **west** is at a **equal** elevation than subject property	Describe observations: Wooded land, powerline easement, a pond, and residential structures.

Appendix VI – User Questionnaire and Interview Documentation

PHASE I ENVIRONMENTAL SITE ASSESSMENT
USER QUESTIONNAIRE

To qualify for Landowner Liability Protections (LLPs), ASTM E1527-21 specifies that the Phase I ESA User must provide the following information, if available, to the Environmental Professional. Failure to provide this information could make the Phase I ESA incomplete and the User unable to qualify for LLPs.

1. As the User of this Phase I ESA, do you have knowledge of any environmental clean-up liens against the subject property that are filed or recorded under federal, tribal, state, or local laws?

   No

2. As the User of this Phase I ESA, do you have knowledge of any Activity and Use Limitations (AULs) such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, state, or local laws?

   No

3. As the User of this Phase I ESA, do you have any specialized knowledge or experience related to the subject property or nearby properties?

   No

4. Does the purchase price being paid for this property reasonably reflect the fair market value of the subject property? If not, is the lower purchase price attributable to known or suspected contamination?

   Yes

5. As the User of this Phase I ESA, do you have knowledge of information about the subject property that would be helpful in identifying conditions indicative of contaminant releases, such as: a) past use of the subject property; b) presence of specific chemicals (past or present); c) spills or chemical releases at the subject property; or d) environmental cleanups that have taken place at the subject property?

   No

6. As the User of this Phase I ESA and based on your knowledge and experience of the subject property, are there any obvious indicators that point to the presence or likely presence of contamination on the subject property?

   No

7. What is the purpose of the Phase I ESA (i.e., why is it needed)?

   Purchase / Financing

User Questionnaire (continued)

In addition, certain other information should be provided, although not necessarily to qualify for *LLPs,* including contact information for past and current property owners, operators, and key occupants; the reason for performing this ESA; and documentation showing the property address, location, and boundaries.

8. Is the subject property on city utilities? If so, how long has the subject property been on the city system?
   ___ No ✓ Yes (please explain below) The site is vacant. Water, sewer and power are available

9. Is there or was there previously a septic system present at the subject property?
   ✓ No ___ Yes (please explain below)

10. If there are buildings on the subject property, how are the buildings heated?
    ✓ No ___ Yes (please explain below)

11. Have the buildings always been heated this way? If not, what was the prior heat source(s)?
    ___ Yes ___ No (please explain below) N/A

12. Are you aware of past or present land application of residual biosolids at the subject property? If so, what is (or was) the source of the residual biosolids? No

13. Are you aware of underground and above-ground storage tanks on the subject property?
    No

14. If available, **provide contact information for past and current property owners, operators, and key occupants.**

15. If not previously presented to S&ME, please provide documentation showing the subject property address, location, and boundaries.

Printed Name Josh Thomason Signature [signature] Date 3/23/26

USER-FURNISHED INFORMATION

The following is a list of documents and information that could be useful to S&ME in preparing your Phase I ESA. Appendix VII – User/Owner Provided Information and File Review Documents

2025 Annual Drinking Water Quality Report

This report includes data collected from January 1 to December 31, 2024

Commissioners of Public Works
*** P.O. Box 549 * Greenwood, SC 29648**

GREENWOOD CPW DRINKING WATER SURPASSES ALL STANDARDS

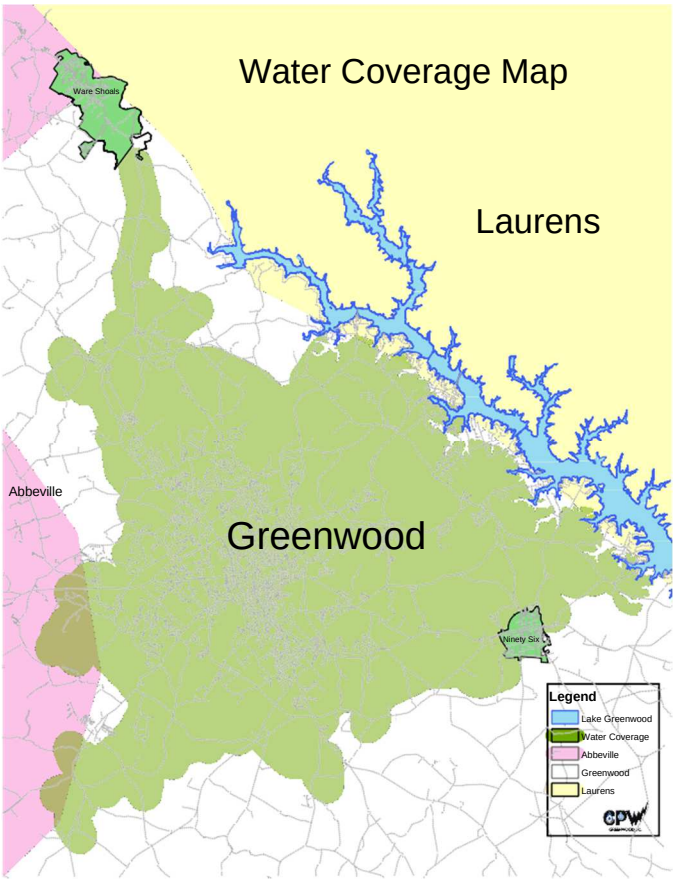

Greenwood CPW is pleased to present our 2025 Annual Drinking Water Quality Report. We are proud to announce that our water continues to meet and surpass all state and federal water quality standards under the Safe Drinking Water Act.

This report is designed to provide information concerning the water quality we deliver daily. To protect you, our valued customer, the United States Environmental Protection Agency (EPA) and the South Carolina Department of Environmental Services (SCDES) have established strict standards for drinking water. These standards protect consumers from waterborne disease organisms and harmful chemicals. On an annual basis, the EPA requires all public water systems to provide customers with information about water quality and compliance with environmental standards through Water Quality Reports.

Our goal is to provide you with a dependable supply of drinking water that meets all State and Federal Drinking Water Regulations. We want you to understand our efforts to continually improve the water treatment process and protect our water resources. Greenwood CPW meets standards significantly higher than current regulations. This notable performance is partly due to our participation in the South Carolina Area Wide Optimization Program (AWOP). The W.R. Wise Water Treatment Plant was recognized by SCDES for achieving the AWOP goals. Greenwood CPW continues to partner with EPA and the American Water Works Association (AWWA) as a Partnership for Safe Water member. The W.R. Wise Water Treatment Plant has received both the Director's Award and the Excellence in Water Treatment Award for this program annually since 2001 and 2006, respectively. Greenwood CPW is the first water supplier in South Carolina to have achieved the Excellence in Water Treatment Award.

Where does your water come from?

Our water source is Lake Greenwood, which is located in the Saluda River Basin of South Carolina. The W.R. Wise Water Treatment Plant is located on Lake Greenwood at 202 Water Plant Road, off Puckett's Ferry Road. The South Carolina Department of Environmental Services prepared the source water assessment plan for our water source. This plan is available for your review at the W.R. Wise Water Treatment Plant. Please call the water treatment plant superintendent at 864-953-2411 to make arrangements to review this document.

Source Water Assessment Summary

This report contains the completed source water susceptibility assessment for Greenwood CPW, System No. 2410001. The system includes public supply intakes S24101. The system is located in Greenwood County and serves a primary population of 55,875. The system is located in the Saluda-Edisto basin. Of the 781 potential contamination sources (PCS) in this initial inventory, 506 PCS had more than one category of contaminants. The inventory includes volatile organic compounds (VOC), petroleum products, metals, nitrates, pesticides/herbicides, pathogens, and radio nuclides. Potential sources of these contaminants include gas stations, dry cleaners, agricultural areas, automobile repair shops, septic systems, and facilities where potential contaminants are stored. For more information about the state's source water, assessment program and about watersheds visit https://greenwoodcpw.com/wp-content/uploads/2025/03/SCDES-Watershed-Water-Quality-Assessment-Saluda-River-Basin-2011.pdf

How is your water treated?

The conventional water treatment process (disinfection, coagulation, flocculation, sedimentation and filtration) contains many barriers to safeguard our customers from the transmission of water borne diseases, which were very prevalent in our nation just a little over 100 years ago. Our treatment facility has an approved treatment maximum capacity of 33 million gallons of water per day. The water from Lake Greenwood is pumped from the lake via two raw water intakes located in the lake. Powdered activated carbon is added seasonally for taste & odor control. Several disinfectants, free chlorine, chlorine dioxide and chloramines are added throughout the treatment process for pathogen inactivation and oxidation of trace metals with minimum disinfection byproduct formation.

Alum is added to remove the turbidity (particles) from the water, and lime and carbon dioxide are added for pH control. The water is then allowed to settle through the sedimentation basins. The settled water is filtered through conventional dual-media filter beds made up of anthracite coal and sand to remove most of the remaining particles. After filtration, additional chlorine is added along with ammonia to form chloramines as the final disinfectant for the distribution system. Lime is added for final pH and corrosion control.

How is your water tested?

Greenwood CPW routinely monitors more than 150 substances in our drinking water according to federal and state laws in our state certified laboratories. Most of the results show that contaminants are not present in our drinking water, but some exceptions exist. The tables below show the results of our monitoring for regulated drinking water contaminants that were detected during the 2024 calendar year, with exceptions noted. Most samples were taken at the water treatment plant at a point just before the water enters our distribution system, but trihalomethanes, haloacetic acids, total coliform & Ecoli, and lead and copper compliance samples were monitored from customer taps throughout the distribution system. State and federal regulations do not require us to examine the water for all contaminants during each calendar year. The information provided in these tables represents the most recent samples taken in accordance with the applicable regulations.

Where do contaminants come from?

As water travels over the land or through the ground, it can pick up substances and end up in our lakes and rivers. These substances or "contaminants" include microbes, such as viruses and bacteria, inorganic chemicals, such as metals and salts, organic chemicals, which can be synthetic or volatile, radioactive substances, which are naturally occurring, and pesticides and herbicides from agricultural activities. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some contaminants. It's important to remember that the presence of these contaminants does not necessarily pose a health risk. To ensure that tap water is safe to drink, EPA and SCDES prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. The Food and Drug Administration (FDA) regulations establish limits for contaminants in bottled water, which should provide the same protection for public health.

Important Health Information

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons, such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their healthcare providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

What do the Tables Mean?

As you will see in the following tables, our system had no violations. We're proud that your drinking water meets or exceeds all Federal and State requirements. We have learned through our monitoring and testing that some substances have been detected. Please see the tables below for that information.

FINISHED DRINKING WATER/DISTRIBUTION SYSTEM

(Samples collected and analyzed at the W.R. Wise Water Treatment Plant unless otherwise stated)

Substance	Unit	MCL	MCLG	Range of Levels	Highest Level Detected	Typical Sources	VIOLATION
*Nitrate [measured as Nitrogen] (SCDES)	ppm	10	10	NA	0.064	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits.	NO
Selenium (SCDES)	ppb	50	50	3.90-3.90	3.90	Discharge from petroleum and metal refineries; Erosion of natural deposits; Discharge from mines.	NO
Combined Radium 226/228	pCi/L	5	0	0.568-0.568	0.568	Erosion of natural deposits	NO
Turbidity Highest Single Measurement	NTU	1	NA	0.02-0.09	0.09	Soil runoff.	NO
Turbidity Lowest monthly % meeting limit	NTU	0.3	NA	NA	100.00%	Soil runoff.	NO
+Total Organic Carbon	ppm	TT = removal ratio of 1.0 (35%) or greater	NA	1.30 - 2.01	Removal Ratio 1.11 (35.38%)	Occurs naturally in the environment.	NO

***Nitrates** - physicians and health care providers in the area will be notified if there is ever a higher than normal level of nitrates in the water supply.

****Turbidity** measurements reported above are based on individual filter effluents and the combined filter effluent prior to post chemical additions. Turbidity compliance is based on a treatment technique (TT) of removing turbidity to levels below 0.30 NTU in 95% of samples collected.Turbidity is a measurement of the cloudiness of the water caused by suspended particles. We monitor it because it is a good indicator of water quality and the effectiveness of our filtration.

+**Total Organic Carbon** (TOC) compliance is based on a treatment technique (TT) of removing total organic carbon from the source water to a level greater than a removal ratio of 1.0 (35%). The percentage of Total Organic Carbon (TOC) removal was measured each month and the system met all TOC removal requirements set.

DISINFECTANTS AND DISINFECTION BYPRODUCTS MEASURED IN THE DISTRIBUTION SYSTEM

Parameter	Unit	MRDL MCL	MRDL G MCLG	Range	Highest Average	Typical Sources	Violation
Chlorine	Ppm	4	4	3.00-3.00	3.00	Water additive used to control microbes.	NO
Chloramines (DS)	ppm	4	4	2.36 - 2.85	2.77 Qtrly.	Added for disinfection	NO
Chlorite (DS)	ppm	1	0.8	0.34 - 0.65	0.61 Qtrly.	By-product of disinfection	NO
Chlorine Dioxide (POE)	ppm	0.8	0.8	0.0 - 0.06	0.003	Added for disinfection	NO
Total Trihalomethanes	ppb	80	No Goal for Total	19.39-40.44	31.0 LRAA	By-product of disinfection	NO
Total Haloacetic Acids	ppb	60	No Goal for Total	16.08-57.44	37.0 LRAA	By-product of disinfection	NO

POE = Point of Entry into the distribution system.
DS = Distribution System.

COLIFORM BACTERIA MEASURED IN THE DISTRIBUTION SYSTEM

Substance	MCLG	MCL	Results	Typical Sources	Violation
Total Coliform	NA	TT	No positive E. coli	Occurs naturally in the environment	NO

A total of 936 samples collected from the distribution system in 2024 were negative for E. coli bacteria. Results based on treatment technique (TT) under the Revised Total Coliform Rule (RTCR) April 1, 2016.

OTHER SUBSTANCES MONITORED IN DRINKING WATER

Substance	Secondary MCL	Average Value	Range of Levels	Unit	Typical Sources	Violation
Sodium (SCDES)	NA	17	NA	ppm	Naturally Occurring	NO
Iron	300	10	7 - 18	ppb	Naturally Occurring	NO
Manganese	50	9	4 - 12	ppb	Naturally Occurring	NO

CORROSION CONTROL TREATMENT WATER QUALITY PARAMETERS IN DISTRIBUTION SYSTEM

The following table shows the 2024 water quality results of the corrosion control treatment (CCT) implemented in 2018 in response to more stringent lead and copper regulations. The CCT comprises of lime and carbon dioxide feed systems that adjust pH, alkalinity and calcium hardness in the finished drinking water. By adjusting these water quality characteristics, the finished drinking water will become more stable. Stable water will be less vulnerable to pH swings. These swings may lead to the leaching of metals, such as lead, copper and iron, from the distribution system's pipe materials into the drinking water. Continuous study of the CCT is being performed as the new Lead and Copper Rule gets promulgated and finalized for compliance in 2024.

Substance	Secondary MCL	Average Value	Range of Levels	Unit	Typical Sources	Violation
pH	6.5 - 8.5	8.7	7.9 - 9.3	Standard Unit (SU)	Naturally occurring; adjusted in finished water for corrosion control	NO
Ca-Hardness	NA	41	32 - 56	ppm	Naturally occurring	NO
Alkalinity	NA	24	11 - 42	ppm	Naturally occurring	NO

LEAD AND COPPER MEASURED IN THE DISTRIBUTION SYSTEM

Substance	Sample Year	MCLG	Action Level (AL)	Range	Unit	90^{TH} Percentile	No. Sites Over AL	Typical Sources	Violation
Lead-Customer Plumbing	2023	0	15 ppb	0 to 41	ppb	4.00	1	Corrosion of household plumbing systems; Erosion of natural deposits.	NO
Copper-Customer Plumbing	2023	1.3	1.3	0 to 0.178	ppm	0.024	0	Erosion of natural deposits; Leaching from wood preservatives; Corrosion of household plumbing systems.	NO

Lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Greenwood CPW is responsible for providing high quality drinking water and removing lead pipes if they exist in our system, but we cannot control the variety of materials used in plumbing components in your home. You share the responsibility for protecting yourself and your family from the lead in your home plumbing. You can take responsibility by identifying and removing lead materials within your home plumbing and taking steps to reduce your family's risk. Before drinking tap water, flush your pipes for several minutes by running your tap, taking a shower, doing laundry or a load of dishes. You can also use a filter certified by an American National Standards Institute accredited certifier

to reduce lead in drinking water. If you are concerned about lead in your water and wish to have your water tested, contact the Greenwood CPW Water Plant at 864-953-2411. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available at http://www.epa.gov/safewater/lead.

Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can lead to new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney or nervous system problems.

CPW is committed to meet all state and federal drinking water regulations. CPW encourages customers to have plumbing inspected by a qualified plumber in homes, businesses, and schools. If lead components are found during the inspection, customers are strongly encouraged to replace the components.

Greenwood CPW has prepared a service line inventory. To access an interactive map of this inventory, please visit https://pws-ptd.120wateraudit.com/Greenwood-CPW-SC

Information on PFAS (per and polyfluoroalkyl substances)

**Per- and polyfluoroalkyl substances (PFAS) are a group of thousands of man-made chemicals. PFAS have been used in a variety of industrial and consumer products around the globe, including in the U.S., for decades. Due to their widespread use and environmental persistence, most people in the United States have been exposed to certain PFAS. PFAS have been used to make coatings and products that are used as oil and water repellents for carpets, clothing, paper packaging for food, and cookware (examples-nonstick cookware (e.g. Teflon™), stain repellant (e.g. Scotchgard™) waterproofing (e.g., GORE-TEX™). They are also used in industrial applications such as in firefighting foams and electronics production.

EPA issued the final rule on PFAS in 2024, this rule set MCL's and MCLG's for PFAS. In anticipation of this EPA drinking water regulation and to account for emerging science that shows potential health effects of PFAS at levels above the MCL and MCLG, CPW is evaluating its efforts to address PFAS in drinking water, and what actions we can take to be prepared to incorporate this standard, such as reviewing our current data and exploring treatment options to address PFAS levels in drinking water. CPW is committed to meet all state and federal drinking water regulations. Public water systems have until 2029 to meet these new requirements.

WATER QUALITY TERMS AND ABBREVIATIONS:

Water Quality Test Results Definitions: The tables above contain scientific terms and measures, some of which may require explanation.

Avg: Regulatory compliance with some MCLs are based on running annual average of monthly samples.

Level 1 Assessment: A Level 1 assessment is a study of the water system to identify potential problems and determine (if possible) why total coliform bacteria have been found in our water system.

Level 2 Assessment: A Level 2 assessment is a very detailed study of the water system to identify potential problems and determine (if possible) why an E. coli MCL violation has occurred and/or why total coliform bacteria have been found in our water system on multiple occasions.

mrem: millirems per year (a measure of radiation absorbed by the body)

ppt = (parts per trillion): This is the same as nanograms per liter (ng/L) or one ounce in 7,000,000,000 gallons of water.

ppb: micrograms per liter or parts per billion - or one ounce in 7,350,000 gallons of water.

ppm: milligrams per liter or parts per million - or one ounce in 7,350 gallons of water.

Treatment Technique or TT: A required process intended to reduce the level of a contaminant in drinking water.

NTU = (Nephelometric Turbidity Units): Units of measure to indicate clarity of water.

SU = (Standard Units): Unit of measure to indicate how acidic or basic water is on the pH scale.

pCi/L= picocuries per liter: The unit used to measure radon levels.

AL (Action Level): The concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must

follow.

MCL (Maximum Contaminant Level): The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

MCLG (Maximum Contaminant Level Goal): The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

MRDL (Maximum Residual Disinfectant Level): The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

MRDLG (Maximum Residual Disinfectant Level Goal): The level of a disinfectant in drinking water below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contamination.

LRAA (Locational Running Annual Average): The average concentration at a particular location for four consecutive quarters.

NA (Not Applicable): Does not apply.

ND (Not Detected): Not detected or below detection limits.

TT (Treatment Technique): A required process intended to reduce the level of a contaminant in drinking water.

Who do you call for questions?

If you have any questions about this report or your water quality, please call the W.R. Wise Water Treatment Plant and Laboratory Superintendent at 864-953-2411.

We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the second and fourth Thursday of each month at 10:00 a.m. at CPW main office, 121 Court Ave., Greenwood, SC 29646

Call CPW Customer Service at 864-942-8100 if you have questions about rates and your water service connection.

Feel free to call for a tour of the **W.R. Wise Water Treatment Plant** at 202 Water Plant Road. With advance notice, we welcome school and civic groups to tour the plant Monday through Friday, except holidays, from 9:00 a.m. to 3:00 p.m., weather permitting. Call the Water Treatment Plant Superintendent at 864-953-2411 for appointments.

Take Action

Overview

EWG's drinking water quality report shows results of tests conducted by the water utility and provided to the Environmental Working Group by the South Carolina Department of Health & Environmental Control, as well as information from the U.S. EPA Enforcement and Compliance History database (ECHO). For the latest quarter assessed by the U.S. EPA (April 2024 - June 2024), **tap water provided by this water utility was in compliance with federal health-based drinking water standards.**

LEARN ABOUT LEAD IN THIS UTILITY →

Legal does not necessarily equal safe.

- Getting a passing grade from the federal government does not mean the water meets the latest health guidelines.
- Legal limits for contaminants in tap water have not been updated in almost 20 years.
- The best way to ensure clean tap water is to keep pollution out of source water in the first place.

Contaminants Detected

EXCEED GUIDELINES | OTHER DETECTED

Bromodichloromethane
Potential Effect: Cancer

This Utility: 4.77 ppb | No Legal Limit

79x EWG's Health Guideline: 0.06 ppb

Chloroform
Potential Effect: Cancer

This Utility: 17.4 ppb | No Legal Limit

43x EWG's Health Guideline: 0.4 ppb

Chromium (hexavalent)
Potential Effect: Cancer

This Utility: 0.0958 ppb | No Legal Limit

4.8x EWG's Health Guideline: 0.02 ppb

Dibromochloromethane
Potential Effect: Cancer

This Utility: 0.906 ppb | No Legal Limit

9.1x EWG's Health Guideline: 0.1 ppb

Dichloroacetic acid
Potential Effect: Cancer

This Utility: 17.7 ppb | No Legal Limit

89x EWG's Health Guideline: 0.2 ppb

Haloacetic acids (HAA5)
Potential Effect: Cancer

This Utility: 21.9 ppb | Legal Limit: 60 ppb

219x EWG's Health Guideline: 0.1 ppb

Haloacetic acids (HAA9)
Potential Effect: Cancer

This Utility: 21.3 ppb | No Legal Limit

354x EWG's Health Guideline: 0.06 ppb

Perfluorooctane sulfonate (PFOS)
Potential Effect:

This Utility: 1.48 ppt | Proposed Legal Limit: 4 ppt

4.9x EWG's Health Guideline: 0.3 ppt

Perfluorooctanoic acid (PFOA)
Potential Effect: Cancer

This Utility: 0.860 ppt | Proposed Legal Limit: 4 ppt

9.6x EWG's Health Guideline: 0.09 ppt

Total trihalomethanes (TTHMs)
Potential Effect: Cancer

This Utility: 23.0 ppb | Legal Limit: 80 ppb

154x EWG's Health Guideline: 0.15 ppb

Trichloroacetic acid
Potential Effect: Cancer

This Utility: 3.91 ppb | No Legal Limit

39x EWG's Health Guideline: 0.1 ppb

Includes chemicals detected in 2021-2023 for which annual utility averages exceeded an EWG-selected health guideline established by a federal or state public health authority.

† HAA5 is a contaminant group that includes monochloroacetic acid, dichloroacetic acid, trichloroacetic acid, monobromoacetic acid and dibromoacetic acid. HAA9 is a contaminant group that includes the chemicals in HAA5 and bromochloroacetic acid, bromodichloroacetic acid, chlorodibromoacetic acid and tribromoacetic acid. TTHM is a contaminant group that includes bromodichloromethane, bromoform, chloroform and dibromochloromethane.

OTHER CONTAMINANTS TESTED +

Find A Filter

UTILITY: GREENWOOD CPW

Carbon Filters

FILTERS 10 CONTAMINANTS EXCEEDING GUIDELINES (+8 OTHERS)

Can reduce the levels of many common contaminants.

PROS	CONS
Lower upfront cost	Does not remove all contaminants
Reduced maintenance	

Reverse Osmosis

FILTERS 11 CONTAMINANTS EXCEEDING GUIDELINES (+11 OTHERS)

Can reduce the levels of many common contaminants.

Other Considerations

Ion Exchange

PROS: Softens hard water, Reduces some contaminants

CONS: Doesn't remove all contaminants

Whole-House Filters

PROS: Useful for reducing radiologicals and TCE

CONS: Expensive to install and maintain, Risk of bacterial contamination

PROS	CONS
Most effective	Higher upfront cost
	Requires more maintenance
	Wastes water

KEY FINDINGS

1. PFAS compounds are a class of nonstick, waterproof, stain-resistant compounds used in consumer products and industry. Among the best known are PFOA, formerly used to make DuPont's Teflon, and PFOS, formerly an ingredient in 3M's Scotchgard.
2. Very low exposure to some PFAS chemicals has been linked to cancer, thyroid disease, weakened childhood immunity and many other health problems.
3. The history of the industrial use of PFAS chemicals and knowledge of its dangers.

Details 24141

Facility: GREENWOOD FABRICATING & PLATING LLC

Location: Greenwood, SC

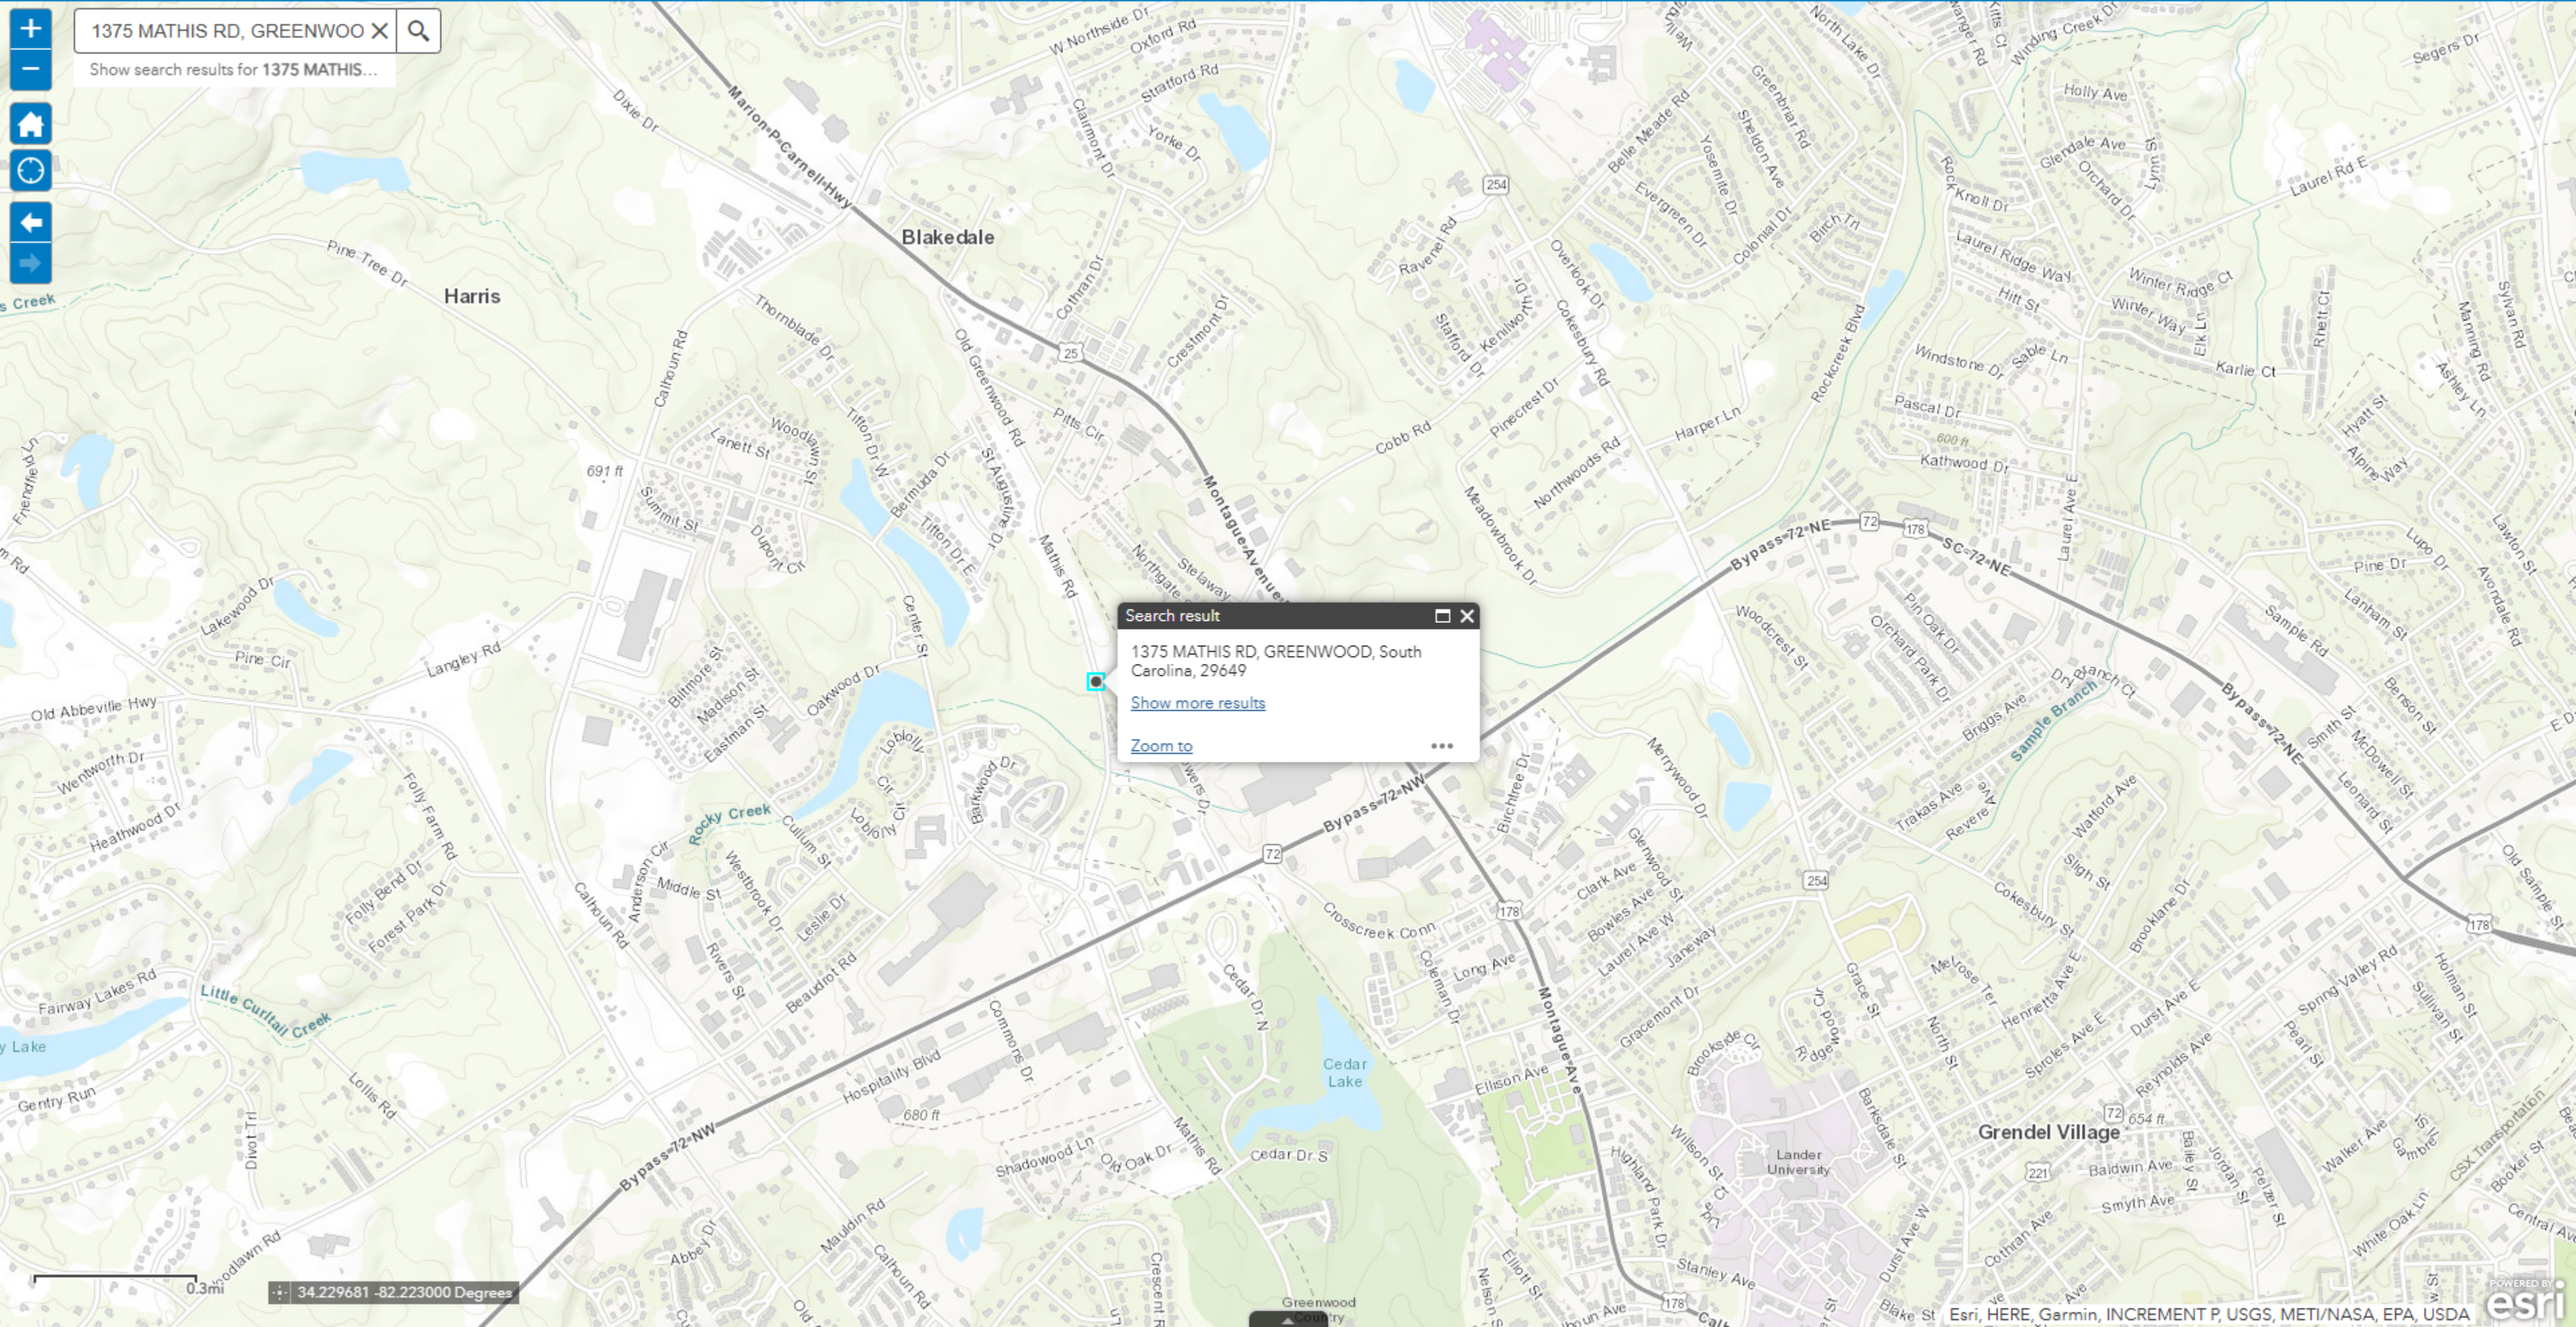

Type: Electroplating, Plating, Polishing, Anodizing, and Coloring, All Other Miscellaneous Fabricated Metal Product Manufacturing, Electroplating, Plating, Polishing, Anodizing, and Coloring

PFAS Chemical: N/A

Risk category: Suspected releaser of PFAS

Appendix VIII – Qualifications of Environmental Professional and Staff

Chris Daves, PWS

Technical Principal, Principal Scientist

PROJECT ROLE
Technical Principal, Principal Scientist

LOCATION
Columbia, SC

EDUCATION
- BS, Biology, 1995, Wofford College
- Graduate Studies, 1995-1997, Medical University of South Carolina
- MS, Earth & Environmental Resources Management, 2001, University of South Carolina

YEARS OF EXPERIENCE
Joined S&ME in 2001

CERTIFICATIONS
- Professional Wetland Scientist (PWS), 2006, #1620
- Environmental Professional (EP) per ASTM/EPA
- HUD NEPA Env. Review Procedures, 2008
- Midlands Master Naturalist, 2012

Mr. Daves is a Technical Principal/Principal based in S&ME's Columbia, SC Office with 24 years of experience performing ecological and environmental studies. His project management experience includes National Environmental Policy Act (NEPA) documentation and compliance including Federal Communications Commission (FCC) reviews, U.S. Housing and Urban Development (HUD) Environmental Assessments (including noise studies), wetland/stream delineations and functional assessments, Nationwide/Individual Clean Water Act permit acquisition, expert witness testimony, GPS mapping, state and federal regulatory agency coordination, protected species/habitat surveys, U.S. Fish and Wildlife (USFWS) Section 7 Consultation and Biological Assessments, and Phase I Environmental Site Assessments (ESAs).

Mr. Daves has provided professional services for industrial, governmental (federal, state, county, municipal), transportation, residential, commercial developers, and pipeline projects. He is also a Professional Wetland Scientist (PWS), an Environmental Professional (EP), and an S&ME Senior Reviewer.

Key Projects and Assignments

South Carolina Certified/Palmetto Sites (Industrial Parks) Program

Various Counties in South Carolina

Project Manager for ecological surveys for more than 75 sites in the South Carolina Department of Commerce's Certified Site Program/Palmetto Sites for industrial parks. Sites ranged from 20 acres to 4,000 acres Services included Phase I ESAs, jurisdictional wetland/waters determinations, protected species assessments, and cultural resources surveys.

HUD Environmental Reviews

Various Counties in South Carolina

Project Manager for over 150 HUD environmental reviews regarding in-fill single-family and multi-family housing and commercial projects for SC State Housing Authority, and Historically Black Colleges & Universities projects. Reviews consisted of completion of categorical exclusion documents, statutory checklists, environmental assessments, Phase I ESAs, noise studies, coordination with federal, state, and local governments, mitigation strategies, and alternatives analysis.

Airport Projects

Various Counties in South Carolina, North Carolina, and Georgia

Project Manager for over 30 airport projects in South Carolina, North Carolina, and Georgia. Projects included Phase I ESAs, protected species assessments, jurisdictional wetland/waters delineations, GPS data collections, and 404/401 regulatory permitting. Project sizes ranged from two to 200 acres.

**Experience with previous employer.*

Edward Brantley

Staff Scientist

PROJECT ROLE
Staff Scientist

LOCATION
Columbia, South Carolina

EDUCATION
- Bachelor of Arts in Environmental Studies, Wofford College, 2021

YEARS OF EXPERIENCE
Joined S&ME in 2024 with one year of experience.

CERTIFICATIONS
- 40-hour HAZWOPPER
- Wilderness First Aid & Safety

Mr. Brantley is a Staff Scientist for S&ME's Columbia, South Carolina location. Typical projects include jurisdictional determination requests for state and federal agency coordination, protected species assessments including U.S. Fish and Wildlife Service (USFWS) Section 7 Consultation and Biological Assessments, Phase I ESAs, and NEPA HUD Reviews.

Mr. Brantley has performed dozens of soil and groundwater contamination investigations associated with UST, Industrial, and Commercial sites throughout the state, and various kinds of Environmental Remediation events such as AFVR extraction events. Mr. Brantley has also assisted in Asbestos surveying, vapor pin installation, monitoring well installation and removal, site surveying, Phase II/VCC field work, and seismic surveying.

Project Experience

Environmental Site Assessments
Various counties in SC, NC, and GA (2023-present)

Performed multiple Phase I ESAs for commercial property transactions in South Carolina, North Carolina, and Georgia. Conducted work for NEPA HUD reviews in South Carolina.

Environmental Remediation
Various Counties in SC (2023-Present)
Performed 96-hour AFVR extraction events.

UST Well Monitoring Assessment and Sample Collection
Various counties in SC, NC, and GA (2023-present)
Performed UST Well Monitoring, groundwater sampling, and soil sampling for commercial, state, and federal mitigation in projects in South Carolina, North Carolina, and Georgia.

Jurisdictional Determination Requests
Various counties in South Carolina (2024)
Assisted in determining wetland areas across various counties in South Carolina.

Protected Species Assessments
Various counties in South Carolina and North Carolina
Assisted in conducting Protected Species Assessments for subject properties in South Carolina and North Carolina.

ENVIRONMENTAL

Exhibit W – Identification of Wetlands

EXHIBIT W

Identification of Wetlands

Development: Dogwood Senior Village II

Development Location: Mathis Rd, Parcel 6846-016-831

County: Greenwood Acres: 14.80

_____ I certify that the development listed above **does not** contain jurisdictional and non-jurisidictional wetlands.

✓ I certify that the development listed above **does** contain jurisdictional and/or non-jurisidictional wetlands and the proposed development will not disturb the wetlands. The wetlands are .11 (acres) in size.

I have attached a National Wetlands Inventory (NWI) map identifying the development location.

_____

Signature and Certification of Development
Owner
