1.0 EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) was conducted to identify recognized environmental conditions (RECs), controlled RECs (CRECs), historical RECs(HRECs), and *de minimis* conditions associated with a portion of the Judson Mill property in Greenville County, South Carolina (the "Subject Property"). This ESA's purpose is to fulfill certain due diligence requirements of the innocent landowner defense, contiguous owner defense, and bona fide prospective purchaser clause of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The general property information is provided below.

SUBJECT PROPERTY DATA	
ITEM	**PROPERTY INFORMATION**
Name	Judson Trace
Address	701 Easley Bridge Road, Greenville, South Carolina
Property Type	Undeveloped
Owner of Record	Judson Mill Ventures LLC
Number of Parcels	1 (Portion)
Parcel ID	Greenville County TMS No. 0114001000100 (portion)
Acreage	3 acres (approximate)
Number of Buildings	Undeveloped
Date of Regulatory Report	March 30, 2026
Date of Site Reconnaissance	April 1, 2026
Report Expiration Date	September 26, 2026

1.1 Findings and Conclusions

This Phase I ESA identified the following:

- The Subject Property is a portion of the former Milliken and Company Judson Mill (Judson Mill). Judson Mill manufactured cotton and polyester yarn between 1912 and 2015. The former use of the facility as a textile mill is considered a REC based on the processes and chemical of concern typically used in these operations and their potential to contaminate the soil and groundwater beneath the site.

  The Subject Property is currently developed with a dry stormwater basin and access driveways. The remainder of the Subject Property is maintained landscaping or vacant land.

- The Property is generally bound to the north by Easley Bridge Road and commercial businesses; to the south developed portions of the Judson Mill complex (the Annex, Lofts,

and Warehouse); to the east by undeveloped portions of the Judson Mill facility and residences; and to the west by 2nd Avenue, a parking lot, and a church.

- Prior to the sale of the Judson Mill facility, Milliken and Company retained ERM to conduct a Phase I ESA of the facility. The Phase I ESA identified multiple RECs in association with the former operation of the facility, and a Phase II ESA was conducted in 2015 to assess sitewide groundwater conditions. Several chemicals of concern (COCs) were detected in site groundwater; however, all detections were less than applicable screening criteria.

  Prior to the purchase of the Judson Mill facility, Judson Mill Ventures, LLC and Judson Mill Developer, LLC executed Non-Responsible Party Voluntary Cleanup Contract 17-6483-NRP (VCC) with the South Carolina Department of Environmental Services (SCDES). As part of the VCC, additional assessment was required of site soil, groundwater, sediment, surface water, sub-slab soil gas and indoor air.

  The *Baseline Site Assessment Report* and subsequent *Additional Sub-Slab Vapor and Indoor Air Evaluation,* conducted by GEL in 2018 and 2019 reported the following:

  - In general, site soils at Judson Mill contain concentrations of polynuclear aromatic hydrocarbons (PAHs) and metals in excess of applicable screening concentrations. The metals detections are primarily considered naturally occurring. Minor detections of tetrachloroethylene (PCE) and other chlorinated volatile organic compounds (VOCs) were identified in soil samples collected at Judson Mill. A single PAH collected from a sample on the Subject Property exceeded its EPA Residential Regional Screening Level (RRSL).
  - Several chlorinated VOCs were detected in site groundwater but all concentrations are less than applicable screening criteria. Several metals were also detected in site groundwater, but are interpreted to be predominantly naturally occurring. The VOC detections were located off-Subject Property.
  - Several VOCs were detected at concentrations exceeding screening criteria in the sub-slab soil gas and indoor air samples. No sub-slab or indoor air samples were collected from the Subject Property.
  - Sediment and surface water samples were collected from the fire suppression pond, located off the Subject Property included in this ESA. Several metals, PAHs, and carbon disulfide were detected in pond samples.
- During redevelopment of other portions of the Judson Mill complex, impacted soil was removed from the areas surrounding the structures. A majority of the impacted soils were placed on the north lawn between the parking lots at Judson Mill and Easley Bridge Road, which is located on a portion of the Subject Property. Upon relocation of the impacted soils, a demarcation barrier was placed over the soils, and a layer of clean soil from the site was placed atop the demarcation barrier. Soils with VOC impacts excavated from around the

former electric substation and dye house were staged, characterized, and disposed at an offsite municipal landfill.

During redevelopment of the Jenny and Westervelt buildings, additional impacted soils were relocated on the Judson Mill facility, including the gravel parking lot located near the southwest Subject Property boundary, the parking lot west of 2nd Avenue, the access road with parking located north of the Jenny and Westervelt buildings, and the parking lot located north of the Westervelt building.

- The documented presence of chemicals of concern in soils placed on the Subject Property and the remaining Judson Mill facility are considered onsite and offsite RECs. However, the site is part of the SCDES VCC program, which is working with the current owner to remediate and/or control these chemicals of concern in order to facilitate site redevelopment, as follows:
    - SCDES has stated that no further groundwater assessment will be required if the owner enters into land use restrictions to prohibit groundwater use.
    - A Media Management Plan has been prepared and approved by SCDHEC to address the areas where the elevated concentrations of chemical of concern remain in excess of industrial or residential Regional Screening Levels. Prior to redevelopment of the Subject Property, a Soil Disturbance Plans (SDP) should be submitted to SCDES documenting the planned activities for disturbing impacted soil on the Subject Property.
- GEL conducted an evaluation of the sub-slab soil vapor beneath the Westerfelt and Jenny Building located on Lot 3 located south of the Subject Property. Concentrations of PCE, 1,2-dichloropropane, and TCE were detected above VISLs and a vapor mitigation system was installed in both buildings. The Jenny and Westervelt buildings are located approximately 250-feet from the Subject Property. Thus, it is likely that a contaminant plume exists beneath the buildings which are located cross and upgradient of the Subject Property. The upgradient plume is considered a VEC with respect to the subject property. The VEC will be addressed by SCDES as part of the existing NRP-VCC's Media Management Plan and will include soil vapor testing in the vicinity of proposed onsite structures to evaluate the need for a vapor barrier.
- The regulatory information reviewed as part of this ESA listed Judson Mill in a database that identifies facilities in industries that may be handling per- and polyfluorinated substances (PFAS). The database (PFAS ECHO) listed Judson Mill as a potential PFAS-handling site due to its former use as a textile mill. A listing in the databases does not indicate that PFAS were handled or generated by the listed facility. There is no known record of PFAS being used at Judson Mill and there is no documented release of PFAS to the environment. However, no analysis for PFAS compounds was conducted on any of the environmental media sampled as a part of the VCC assessment process because it was not a requirement of the VCC at that time. Judson Mill did have dyeing operations at the facility and PFAS compounds can

be used in the dyeing process to aid in dye application and reduce foam. Thus, it is GEL's opinion that the potential PFAS use at the Subject property is considered a REC. The REC will be addressed by SCDES as part of the existing NRP-VCC's Media Management Plan and a project-specific soil disturbance plan to be approved by SCDES.

2.0 INTRODUCTION

2.1 Purpose

Taft Mills Groups retained GEL Engineering, LLC (GEL) to conduct a Phase I ESA to evaluate a portion of the Judson Mill property in Greenville County, South Carolina (Subject Property), and to a more limited scope surrounding properties, for the presence or absence of RECs, controlled RECs, historical RECs, and/or *de minimis* conditions.

A *recognized environmental condition* (REC) is described by the American Society for Testing and Materials (ASTM) Standard E 1527-21 as:

> the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or the ground, groundwater, or surface water of the property.

A *controlled recognized environmental condition* (CREC) is defined by the Standard as a:

> recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority.

A *historical recognized environmental condition* (HREC) is described by the ASTM Standard as:

> a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

According to the Standard, *de minimis* conditions:

> generally, do not present a material risk of harm to public health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

2.2 Detailed Scope of Services

GEL performed this Phase I ESA in accordance with ASTM Standard E 1527-21 "*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*," and in general accordance with 40 CFR Part 312 - "*Standards and Practices for All Appropriate Inquiries*". Any deletions and/or additional services that deviate from these standards are described in Section 13.0. These standards do not include an investigation into all areas of local, state, tribal, and federal environmental requirements. These requirements were not addressed within this report and GEL is not responsible for other legal obligations for non-compliance with regulations not addressed specifically herein.

2.3 Significant Assumptions

Our findings and opinions are based upon information provided to us by others and our observations of the Subject Property and are subject to, and limited by, the terms of the contract agreed upon by Taft Mills Group and GEL. We have not verified the completeness or accuracy of the information provided by others unless noted otherwise. Our observations were based upon conditions readily visible at the Subject Property at the time of our visit and did not include services typically performed during an Environmental Compliance Audit or a Phase II ESA. If additional information becomes available that may affect our conclusions and/or recommendations, we request the opportunity to review the information and reserve the right to modify our report, as warranted.

2.4 Limitations and Exceptions

GEL, by virtue of providing the services described herein, does not assume the responsibility of the person(s) in charge of the Subject Property or otherwise undertake responsibility for reporting to any local, state, or federal public agencies any conditions at the Subject Property which may present a potential concern to public health, safety, or the environment. GEL understands that the client will notify the appropriate regulatory agencies as required.

The ASTM Standard does not address whether requirements in addition to all appropriate inquiries (AAI) have been met in order to qualify for the Landowner Liability Protections (LLPs), for example, the duties specified in 42 U.S.C. §9607(b)(3)(a) and (b) including the continuing obligation not to impede the integrity and effectiveness of activity and use limitations (AULs), or the duty to take reasonable steps to prevent releases, or the duty to comply with legally required release reporting obligations.

Performance of the ASTM Standard is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property, and the ASTM Standard recognizes reasonable limits of time and cost. No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property.

Subject to the ASTM Standard, an environmental site assessment meeting or exceeding the ASTM Standard and completed less than 180 days before the date of acquisition of the property or, for transactions not involving an acquisition, the date of the intended transaction, is presumed to be valid.

2.5 Special Terms and Conditions

This Phase I ESA was conducted in general conformance with the proposal between Taft Mills Group and GEL dated March 16, 2026.

2.6 User Reliance

This report has been prepared for the exclusive use of Taft Mills Group and is subject to the terms and conditions agreed upon between GEL and Taft Mills Group for this specific project. These services have been provided in accordance with generally accepted environmental practices. No other warranty, expressed or implied, is made. The contents of this report should not be construed in any way to indicate GEL's recommendation to purchase, sell, or further develop the Subject Property. Reliance on this report cannot be transferred without the written permission of Taft Mills Group and GEL, and only if the other party agrees to the *Standard Terms and Conditions* agreed upon for this project.

3.0 SUBJECT SITE DESCRIPTION

3.1 Subject Property Information

SUBJECT PROPERTY INFORMATION	
ITEM	**PROPERTY INFORMATION**
Address	701 Easley Bridge Road, Greenville, South Carolina
County	Greenville County
Acreage	3 acres (approximate)

Elevation	Approximately 1,010 feet above sea level	USGS Quadrangle Map
General Topographic Gradient	Surface topography is generally flat	USGS Quadrangle Map
SOILS AND GEOLOGY		
Site Soils	Urban land, with deep and moderately deep, moderately well and well drained soils with moderately course textures; sandy loam, with soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.	EDR
Area Geology	Bedrock in the area consists of Paleozoic Era metamorphic felsic paragneiss and schist.	United States Geological Survey
WATER RESOURCES		
Nearest Water Body	Brushy Creek, approximately 920-feet northeast of Subject Property.	USGS Quadrangle Map
Presumed Groundwater Flow Direction	The groundwater at the site is presumed to flow to the northeast towards Brushy Creek.	USGS Quadrangle Map
Surface Water	None present on the Subject Property	Site Reconnaissance
Wetlands	Based solely on the NWI map, wetlands are not present on the Subject Property.	National Wetland Inventory Map
Flood Map	45045C0383E: The site is located in Flood Zone X.	Federal Emergency Management Agency (FEMA)

4.0 USER-PROVIDED INFORMATION

To qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the User must provide certain information, if available, to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiries" is not complete.

4.1 User Questionnaire

An interview was conducted in the form of a written User Questionnaire, which was completed by Nate Broman-Fulks of Taft Mills Group. A summary of the responses is provided in the table. The completed User Questionnaire is included in Appendix D.

TYPE OF INFORMATION	YES	NO	COMMENTS
Environmental Liens or Activity and Use Limitations		X	
Specialized Knowledge		X	
Valuation Reduction for Environmental Issues		X	
Commonly Known or Reasonably Ascertainable Information		X	
Degree of Obviousness of the Presence or likely Presence of Contamination		X	
Reason for Performing the Phase I ESA			
To satisfy CERCLA Provisions		X	
To understand environmental liabilities	X		
To satisfy lender requirements	X		
Additional User-Provided Documentation			
Chain of Title		X	
Other User-Provided Documentation (e.g., environmental reports)		X	

4.2 Title Records

The Greenville County, South Carolina Government website indicates the current owner of the Subject Property is Judson Mill Ventures, LLC. The prior owner is listed as Deering Milliken Inc. Judson Mill.

4.3 Other User Provided Information

No other information was provided by the User.

5.0 CURRENT ENVIRONMENTAL RECORDS REVIEW

Regulatory database information was provided by EDR, a contract information services company. Information in this section is subject to the accuracy of the data provided by EDR and the date on which the information is updated. The scope described herein did not include confirmation of facilities listed as "unmappable" by regulatory databases.

In some of the following subsections, the terms "up-gradient, "cross-gradient," and "down-gradient" refer to the assumed hydraulic gradient relative to the Site. The groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon seasonal variations in rainfall and the depth to the soil/bedrock interface.

5.1 Standard Environmental Record Sources

Publicly available and practically reviewable federal and state environmental databases and records were reviewed to evaluate if environmental incidents have been reported at the Subject Property or if properties with environmental liabilities are located in the vicinity of the Subject Property. A detailed summary of federal and state databases prepared by Environmental Data Resources (EDR) is presented in Appendix F. Federal and state regulatory databases have been researched and reported in accordance with the search radii specified by ASTM Standard E 1527-21.

The following table includes the approximate minimum search distances, and a list of the databases reviewed. These databases were selected based on the requirements of ASTM E 1527-21. The number of facilities indicates the number of regulated facilities identified by GEL to be present within the approximate minimum search distance for a particular database. The following table also includes additional databases, outside of the ASTM standards, as produced by EDR. Please note that some facilities may be listed in more than one database.

DATABASE	SEARCH RADIUS (MILES)	SUBJECT PROPERTY	ADJOINING AND SURROUNDING PROPERTIES
Federal National Priorities List (NPL) Site List (Superfund)	1.0	0	0
Federal Delisted NPL Site List	0.5	0	0
Federal sites subject to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) removal and CERCLA orders	0.5	0	0

DATABASE	SEARCH RADIUS (MILES)	SUBJECT PROPERTY	ADJOINING AND SURROUNDING PROPERTIES
Federal CERCLA No Further Remedial Action Planned (NFRAP) Site List	1.0	0	0
Federal Resource Conservation and Recovery Act (RCRA) Corrective Action Report (CORRACTS) Facilities List	1.0	0	0

GEL reviewed the regulatory information provided in the database report to identify listed facilities located within the approximate minimum search distances.

5.2 Subject Property Database Records

The identified facilities formerly or currently located on the Subject Property are listed in the following table. Pertinent details for each facility are provided.

NAME	ADDRESS	DATABASE LISTING	REC DETERMINATION
Milliken Judson Plant	701 Easley Bridge Road	SHWS, AUL, VCP, BROWNFIELDS, ALLSITES, RCRA NonGen / NLR, ICIS, FINDS< ECHO, AIRS, Asbestos, PFAS ECHO	See details below.

Milliken & Company Judson Plant

The Subject Property and immediately adjacent properties are part of the former Milliken & Company Judson Plant, which is listed in multiple databases due to its past industrial uses and assessments conducted as part of a Non-Responsible Party Voluntary Cleanup Contract (NRP-

VCC) with the South Carolina Department of Environmental Services (SCDES). Details of those assessments are provided in Section 5.7 below.

Judson Mill is also listed in a database that identifies facilities in industries that may be handling per- and polyfluorinated substances (PFAS). The database (PFAS ECHO) identifies industries that may be handling PFAS. Judson Mill appears to be identified as a potential PFAS-handling site due to its former use as a textile mill. There is no known record or PFAS being used at Judson Mill.

5.3 Adjoining Properties Database Records

The identified facilities formerly or currently located on the adjoining properties are listed in the following table. Pertinent details for each facility are provided.

NAME	ADDRESS	HYDRAULIC GRADIENT	DISTANCE FROM PROPERTY (MILE)	DATABASE LISTING	REC DETERMINATION
Milliken Judson Plant	701 Easley Bridge Road	Up- and cross-gradient	Southern and eastern adjoining	SHWS, AUL, VCP, BROWNFIELDS, ALLSITES, RCRA NonGen / NLR, ICIS, FINDS< ECHO, AIRS, Asbestos, PFAS ECHO	See details below.
PATS 7 (aka Piedmont Petroleum Corp. and MM Food Mart 2)	784 Easley Bridge Road	Down-gradient	Northern adjacent	UST, LUST, Financial Assurance, EDR Historical Auto, UST Finder, UST Finder Release	Release reported in December 2006 and issued letter of no further action (NFA) in the same month. Currently an active gas station. Located down-gradient of the Subject Property.
Piedmont Petroleum Corp.	667 Dorsey Avenue	Down-gradient	Northern adjacent	EDR Historical Auto	Same facility as PATS 7.
Moore's Dry Cleaners	810 Easley Bridge Road	Down-gradient	Northern adjoining	EDR Historic Cleaners	This property is not considered a REC due to its down-gradient location.

Milliken – Judson Plant

The Subject Property and adjoining property are identified as the Milliken & Company Judson Plant. Details regarding the facility are summarized in Section 5.7 below.

5.4 Surrounding Properties Database Records

The identified facilities formerly or currently on the surrounding properties within one-half mile of the Subject Property are listed in the following table. Pertinent details for each facility are provided.

NAME	ADDRESS	HYDRAULIC GRADIENT	DISTANCE FROM PROPERTY (MILE)	DATABASE LISTING	REC DETERMINATION
Abney Mill	2 Waco Street	Down-gradient	0.335-miles	SHWS, SPILLS	Not a REC based on down-gradient location.
Gaylord Container Corp.	100 Gordon Street	Down-gradient	0.423-miles	VCP, BROWNFIELDS, SHWS, ALLSITES, ASBESTOS, GWT	Not a REC based on down-gradient location.
Former Plush Mill Building 5	200 Easley Bridge Road	Down-gradient	0.430-miles	SHWS, AUL, ALLSITES, ASBESTOS	Not a REC based on down-gradient location.
Piedmont Plush Mill	200 Easley Bridge Road	Down-gradient	0.430-miles	VCP, BROWNFIELDS, ASBESTOS	Not a REC based on down-gradient location.

5.5 Orphan Sites

A section of unmappable sites is included in the EDR report. Unmappable, or orphan sites, are facilities that have not been geocoded due to a lack of specific location information provided by the regulatory agencies but are known to be in the general area of the Subject Property. Four orphan facilities are listed in the EDR report, but they are not considered RECs based on their distance from the Subject Property.

5.6 Regulatory Agency File Review

GEL has conducted multiple assessments of the Subject Property in the past; as such, a new Freedom of Information Act (FOIA) request was not submitted to the SCDES for records pertaining to the Subject Property and surrounding sites.

5.7 Additional Environmental Record Sources

Below is a summary of the historic uses of the Judson Mill and prior environmental assessments conducted at the Judson Mill, including a prior Phase I ESA, Phase II ESA, and assessments conducted as part of the Non-Responsible Voluntary Cleanup Contract 17-6483-NRP between the current owner and SCDHEC.

Historic Uses of the Judson Mill

The following site history was obtained from a 2017 Phase I ESA conducted by ERM. The Judson Mill was operated by Milliken from 1912 until 2015 to manufacture cotton and polyester yarn. According to Sanborn Maps from the 1920s, operations took place in multiple buildings including an office and buildings for spinning, weaving, twisting, and cotton warehousing. A boiler room, oil house, gasoline tanks, and a repair shop are identified in the southwest portion of the Plant. The repair shop, located in the southwest portion of the main building (currently the Lofts), continued to be the maintenance shop until the 1990s, and then was used as a forklift service area and oil storage area until the mill closed in 2015.

Operation of the mill utilized three railroad spurs in the western portion of the site for shipping products and for receiving coal for the boilers. The fire suppression reservoir was present in the southwest portion of the tract since the 1920s. Both the rail spurs and reservoir are located on the Subject Property in this ESA. This pond was fed by an adjacent onsite well. The expansion of the mill by 1928 included the addition of a dye house in the central portion of the main building (Buildings 5A and 4). Reportedly dye operations took place in this area until 1994. The dye house structure was demolished during construction of the adjacent apartments. Additional expansions to the building occurred by 1961 making it one contiguous structure, although activities conducted in each area remained essentially the same throughout the history of the mill. A filling station was previously located north of the Warehouse structure.

The railroad spurs and use of coal were discontinued by the early 1970s. A 60,000-gallon No. 6 fuel oil AST was installed during this time to supply fuel to a new fuel oil/natural gas boiler. A mixing room for polyvinyl alcohol (PVA), a starch used to coat yarn manufactured at the mill, was added on the southeast side of Building 5 in 1981 and continued operation until the mill closed in 2015. A warehouse was constructed on the southwest portion of the site in 1995. In addition to the Site history overview presented above, ERM (2017) further describes historical Site operations and features as follows:

Former operations at the Judson Mill included the manufacture of cotton and polyester yarn from raw bails purchased by Milliken. The raw materials were brought on-site by tractor-trailer. Manufacturing of yarn began by storing cotton and polyester bales in the building's basement and picking off the tops to open it (i.e., the "Opening" process) and blending it for uniform quality. It was then blown via chutes into card machines on the first floor that aligned fibers into slivers, which are rope-like strands that are wound into plastic containers. The slivers were transferred to roving machines that stretched the fibers, drawing them into a single thread and winding them onto bobbins. The bobbins were then placed on spinning machines that draw and twist the fibers until they reach the correct thickness. The yarn was then either wound onto final bobbins and packaged for temporary warehousing and then shipped to customers or was transferred to beam warpers. Up to 500 bobbins could be wound onto the beams, which were 5 to 8 feet in length. Up to 20 beams were then pulled together through a slasher that coated (dipped) the yarn with PVA size material, which was used as a stiffening agent (similar to starch). The starched material was wound onto a slashing beam and then transported to other Milliken facilities for further processing. The PVA was removed from the yarn at those offsite facilities and returned to the Judson Mill for reuse. The returned starch was placed in two 15,000-gallon ASTs formerly located at the southeast corner of Building 5. A mixing room for PVA was located on the southeast side of the building.

The areas containing the Subject Property were historically developed with residences and a boarding house.

Prior Environmental Assessments

<u>Phase II Environmental Site Assessment, Milliken – Judson Plant</u>
A Phase II ESA was conducted by ERM, dated September 21, 2015, as a result of RECs identified during a May 2015 Phase I ESA. The Phase II ESA references the following RECs:

- Former chlorinated solvent use (trichloroethylene (TCE) and tetrachloroethylene (PCE),
- Former oil storage building and gasoline tanks,
- Former coal unloading and storage, and
- Former maintenance shop.

Due to numerous subsurface utilities around the plant, the Phase II ESA focused on sitewide groundwater conditions, rather than individual areas of concern. The Phase II ESA included the installation of five temporary groundwater monitoring wells, as well as sampling the existing

water supply well. Four compounds were detected above the laboratory's minimum reporting limits: 1,2,4-trichlorobenzene, 2-hexanone, PCE, and chloroform. All compounds were less than applicable regulatory screening concentrations. The report states the Judson Mill has not been adversely impacted by historical operations and no further assessment was recommended by ERM. Monitoring well MW-1 was collected near the southeast corner of the Subject Property, which had a detection of chloroform.

Phase I Environmental Site Assessment, Milliken – Judson Plant

A Phase I ESA was conducted by ERM, dated June 28, 2017, for the entire Judson Mill facility. The report states that the Judson Mill was closed in 2016. The Phase I ESA identified one REC and several other potential issues. The REC identified in the ESA was the existing groundwater contamination, including the detections identified in a Phase II ESA conducted in July 2015. Several contaminants were identified in site groundwater, including 1,2,3-trichlorobenzene, 2-hexanone, and PCE. The source of the contaminants is not known and the potential for vapor intrusion had not yet been addressed. These compounds were not detected on the Subject Property.

Several other potential issues were identified in the ESA, including:

- Former chlorinated solvent use. TCE and PCE were formerly used to clean purchased socks that were dyed as part of QA/QC procedures. The socks were dipped into a small container of solvent, which was disposed of as a hazardous waste. Waste manifests reference waste solvents in 1991 and 1992 and also referenced drain sludge. Milliken personnel were not knowledgeable of the drain sludge.
- Former oil storage building and gasoline tanks. The 1928 Sanborn Map identified an oil house and two gasoline tanks in the area north of the reservoir. The building is still present and the tanks have reportedly been removed. The oil house is located off the Subject Property in this ESA.
- Former coal unloading and storage. From the 1920s to the 1950s, coal was brought in via rail and used for a coal-fired boiler. Although these prior uses were not identified, the potential storage and use of coal may have resulted in residual impacts. The coal storage was not on the Subject Property for the current ESA.
- Former maintenance shop. A former maintenance shop operated in the basement of Building 5 from at least the 1920s through the 1990s. No evidence of impacts were observed during the site reconnaissance, but these activities may have utilized

chlorinated solvents (based on hazardous waste manifests). The former maintenance shop is not part of the Subject Property for the current ESA.

- Asbestos-containing materials (ACMs). A 2015 asbestos survey identified ACMs throughout the facility, a majority of which were located in thermal insulation on piping and tanks.
- Several off-site facilities, including:
    - Massey's Auto Service located at 918 Easley Bridge Road, west of Judson Mill.
    - Neighborhood Cleans/Cook's Laundry and Cleaners located on Easley Bridge Road, northwest of Judson Mill.
    - Moore's Cleaners/Madden's Cleaners located at 810 Easley Bridge Road to the north-northwest of Judson Mill.
    - Two totes labeled as 'non-hazardous waste' and containing a liquid observed in the northeast side of the building.

Baseline Site Assessment Report, Former Milliken & Company Judson Mill

The purchaser of the Judson Mill, Judson Mill Ventures, LLC and Judson Mill Developer, LLC, entered into Non-Responsible Party Voluntary Cleanup Contract 17-6483-NRP with SCDES. As part of the VCC, a Baseline Site Assessment Report, dated April 4, 2018, was completed by GEL. The following was conducted as part of the assessment:

- Soil samples were collected from 22 hand augered borings. Each boring was advanced to 3 feet below land surface, and samples were collected from the upper foot and from 2 to 3 feet below land surface.
- Two surface water and two sediment samples were collected along the perimeter of the fire suppression pond.
- Five permanent, shallow groundwater monitoring wells were installed to assess groundwater quality and determine groundwater flow directions.
- Two indoor air and two sub-slab soil gas samples were collected from the former dye operation area and three indoor air samples and three sub-slab soil gas samples were collected from the former maintenance shop.

The following parameters were detected at concentrations exceeding applicable screening criteria:

- Arsenic was detected at concentrations exceeding its industrial regional screening level (RSL) in 41 of the 44 soil samples, and two of the three soil samples not exceeding the industrial RSL exceeded the residential RSL (R-RSL). The only other soil samples with metal results exceeding RRSLs were the surface soil sample from boring JM-SB-16 near the northern property boundary which exceeds the R-RSL for iron; the subsurface soil sample from JM-SB-16 which exceeds the R-RSLs for cobalt, iron, and vanadium; and the surface soil sample from boring JM-SB-18 near the western property boundary which exceeds the R-RSL for iron. JM-SB-18 is located on the Subject Property. All concentrations are predominantly within or near the range of natural background concentrations, except for copper, cobalt, and iron.
- The PAHs benzo(a)pyrene, benzo(a)anthracene, benzo(b)fluoranthene, dibenzo(a,h)anthracene, and indeno(1,2,3-cd)pyrene were detected above applicable residential and industrial RSLs in site soils, including one sample located on the Subject Property in this ESA, JM-SB-15.
- No VOCs were detected in site soil exceeding applicable RSLs, and the only constituents that exceed the Maximum Contaminant Level-based SSL for protection of groundwater (MCL-SSL) are methylene chloride and PCE (located off-Property).
- Several metals and PAHs exceeded applicable screening criteria in one of the two sediment samples from the fire suppression pond, and carbon disulfide exceeded its screening criteria in both sediment samples. The pond is not located on the Subject Property.
- Several VOCs were detected in the groundwater samples collected, however, no detected constituents detected in groundwater samples exceeded applicable screening criteria. Ten of the 21 metals detected in unfiltered groundwater samples exceed applicable screening criteria. Three metals exceeded applicable screening criteria in the filtered groundwater sample.
- The following VOCs exceeded applicable EPA Vapor Intrusion Screening Level in the sub-slab air samples: TCE in two samples, 1,1-dichloroethane in one sample, and PCE in one sample. A subsequent indoor air assessment focused on those parameters detected in the sub-slab air samples, in addition to 1,2,3-trichlorobenzene, which was detected in site groundwater at a low concentration. None of the VOC concentrations reported for

the indoor air samples exceed the residential or industrial screening levels. The sub-slab samples were all collected off-Subject Property.

A groundwater divide is interpreted to exist along the central/east-central portion of Judson Mill, with groundwater flowing to the southeast on the east side of the divide and groundwater flowing to the southwest on the west side.

Media Management Plan, dated March 31, 2020

GEL prepared a Media Management Plan (MMP) for the Judson Mill facility as part of the NRP-VCC process. The purpose of the MMP is to outline the protocols for management and reuse of soil of acceptable quality and disposal of environmental media containing constituents of potential concern exceeding established criteria during construction activities. Options allowing impacted environmental media to remain onsite include the use of asphalt and concrete exposure barriers and clean soil fill exposure barriers. For soils requiring disturbance, the MMP details worker and public protection, soil staging procedures, including sampling and analysis of stockpiles, and options for onsite reuse and offsite disposal. The plan also details the management of surface water, groundwater, sediment, and vapor intrusion.

The MMP also references that prior to additional development of the Judson Mill complex, a Soil Disturbance Plan will be submitted to SCDES that will either conclude that existing data demonstrates that the work area is free of soil impacts or present specific pertinent procedures to be used to address worker and public protection, in-situ soil characterization, soil staging and assessment, onsite use versus offsite disposal, and reporting.

SCDHEC Letter of Review of Media Management Plan, dated April 30, 2020

In its letter, SCDES approved the submitted MMP but included a reminder that a comprehensive report detailing all media management/corrective measures activities, including the final disposition of all impacted and non-impacted media and surveyed locations and descriptions of all exposure barriers should be provided to SCDES upon completion.

Media Management Report, dated June 15, 2022

GEL prepared a Media Management Report summarizing soil disturbance activities conducted for the redevelopment of the loft apartment structures (Buildings 5, 5A, and 2B). Impacted soils from a majority of the soil disturbance activities were placed in the northern portion of the Judson Mill, located on a portion of the Subject Property in this ESA. A demarcation barrier was placed on top of the impacted soils, and then covered with a barrier of clean soils from other portions of the Judson Mill site. The demarcation barrier and clean soils must be maintained,

unless otherwise approved by SCDES. The report also summarizes soil screening, staging, and the offsite disposal of soils from the former substation and dye areas impacted with VOCs.

West Courtyard Soil Disturbance Plan, dated November 21, 2022

GEL prepared a West Courtyard Soil Disturbance Plan (SDP) for construction of a courtyard in the area between the Jenny Building, which includes an area of the Subject Property in this ESA. The SDP details soil characterization, data evaluation and exposure barrier determination procedures to be used during construction.

The SDP was approved by SCDHEC in a letter dated December 2, 2022.

Campus-Wide Soil Disturbance Plans

GEL submitted a Campus-Wide SDP to SCDHEC on September 13, 2022. A Campus-Wide Soil Disturbance Plan, Revision 1 was submitted to SCDHEC on December 14, 2023, to provide an update of the list and description of the planned construction projects and addressed SCDES comments on the September 13, 2022, SDP that SCDES provided in a letter dated October 3, 2022. The SDP is for construction activities planned to the south of the Subject Property included in this ESA. The planned projects at the Judson Mill Complex are in locations that prior data indicate potential soil impacts from PAHs and metals. SCDES approved the Campus-Wide Soil Disturbance Plan, Revision 1 in a letter dated February 1, 2024.

Sub-Slab Soil Vapor Evaluation Report, Westerfelt Building (Lot 3), February 6, 2024

GEL conducted an evaluation of the sub-slab soil vapor beneath the Westerfelt Building located on Lot 3 located south of the Subject Property. The evaluation was conducted in accordance with a SCDHEC-approved work plan. The evaluation included the installation and sampling of eight sub-slab vapor pins and one duplicate sample. The samples were analyzed for VOCs by EPA Method TO-15. The results were compared against the Vapor Intrusion Screening Levels (VISLs) obtained by dividing the EPA residential and industrial RSLs for indoor air by the EPA recommended attenuation factor. The following results were obtained:

- Four samples exceeded the Industrial-VISL (I-VISL) for PCE and one sample exceeded the Residential-VISL (R-VISL) for PCE.
- One sample exceeded the I-VISL for 1,2-dichloropropane.
- One sample exceeded the I-VISL for TCE and one sample exceeded the R-VISL for TCE.

Sub-Slab Soil Vapor Evaluation Report, Jenny Building (Lot 3), February 6, 2024

GEL conducted an evaluation of the sub-slab soil vapor beneath the Jenny Building located on Lot 3 located south of the Subject Property. The evaluation was conducted in accordance with a SCDHEC-approved work plan. The evaluation included the installation and sampling of six sub-slab vapor pins and one duplicate sample. The samples were analyzed for VOCs by EPA Method TO-15. The results were compared against the Vapor Intrusion Screening Levels (VISLs) obtained by dividing the EPA residential and industrial RSLs for indoor air by the EPA recommended attenuation factor. Multiple compounds were detected above the method detection limit, but all concentrations are less than applicable R-VISLs and I-VISLs.

Vapor Intrusion Mitigation Plan

A Vapor Intrusion Mitigation Plan (VIMP) was prepared by Hanley Environmental Engineering & Consulting and submitted to SCDHEC on February 1, 2024. The VIMP presents the design of a vapor intrusion mitigation system (VIMS) for the Westervelt and Jenny buildings. The VIMP includes a basis of design along with quality assurance/quality control (QA/QC) procedures; system effectiveness testing requirements; and operation, maintenance, monitoring (OM&M), and reporting procedures.

Soil Disturbance Report, dated February 12, 2026

GEL prepared a Soil Disturbance Report summarizing soil disturbance activities conducted for the redevelopment of the loft apartment structures (Jenny and Westervelt Buildings) and the West Courtyard. Impacted soils from the soil disturbance activities were placed below the 3rd Avenue Parking Lot (located west of the Subject Property), under the temporary gravel parking lot (a portion of which is located at the southeast boundary of the Subject Property), the Jenny/Westervelt Parking Lot, and the access road with parking located north of the Jenny and Westervelt buildings. Additionally, the report summarizes the placement of soils on top of the North Lawn exposure barrier from a stormwater pond constructed east of the Subject Property. GEL conducted an evaluation of the soils placed in this area and a single PAH slightly exceeded its RRSL. However, SCDES approved the temporary placement of soil in this area.

6.0 HISTORICAL RECORDS REVIEW

GEL reviewed historical records to evaluate past uses of the Subject Property to determine all obvious uses of the site from the present day to either its first development or 1940, whichever is earlier. This review also included an examination of the adjoining and surrounding properties during that timeframe.

6.1 City Directories

City directories and County Cross References listing residents and businesses alphabetically by name, address, and telephone number are compiled annually for many cities and towns in the United States. Each directory is cross-indexed by street address, allowing prior residents or businesses to be determined for identifying past uses, typically associated with RECs.

The following table summarizes the past and current occupants of the Subject Property. Additionally, past, and current occupants of the adjoining and surrounding properties that potentially handled chemicals of concern are listed. City Directory listings not summarized in the table are residential and commercial businesses on the adjoining and surrounding properties that do not commonly present environmental concerns.

STREET ADDRESS	DIRECTION	YEAR / LISTING
701 Easley Bridge Road	Subject Property	Milliken Co/Milliken Judson Mill/Judson Plant (2000-2024)
401 Easley Bridge Road	North-northeast	1964-1975: Bryant's Shell Service Station
415 Easley Bridge Road	North-northeast	1964-1985: White Rose Oil Co. gas station
704 Easley Bridge Road	North	2014-2024: Quick Clean Laundry
784 Easley Bridge Road	North	1985-1992, 2000-2010: Piedmont Petroleum Co-op 2010-2017: MM Food Mart & Gas LLC 1992-2005: Corner Mart
810 Easley Bridge Road	North	1940-1975: Moore's Cleaners 1980: Madden's Cleaners 1990-1995: Harris Pest Eradication
812 Easley Bridge Road	North	812: Princess Cleaners & Dyers
908 Easley Bridge Road	Northwest	1964-1975: Neighborhood Cleaners
918 Easley Bridge Road	Northwest	1964-1970: Massey's Auto Service
1100 Easley Bridge Road	West	1964-1975: Nimmons Oil Co Bulk Plant 1964-1967: Jack's Service Station
66 Dorsey Avenue	North	2024: Mm Foodmart Liquor Store 2005, 2022: Piedmont Petroleum Corp.

The historic uses of the Property are considered an onsite and offsite REC due to the documented soil and groundwater impacts. Based on their regulatory status, hydraulic gradient, or distance from the Property, the offsite facilities are not considered RECs. No additional RECs were identified during a review of the directories. A copy of the City Directories is included in Appendix VIII.

6.2 Aerial Photographs

Aerial photographs were examined for evidence of practices or conditions that could potentially impact the Subject Property and adjoining properties. A summary of the observations on the Subject Property and adjoining sites is provided in the following table.

AERIAL PHOTO YEAR	SUBJECT PROPERTY DESCRIPTION	ADJOINING PROPERTIES DESCRIPTIONS	
1943	Developed with several structures that mostly appear to be residential. Southeastern portion appears to be developed with potin of Judson Mill facility.	North	Easley Bridge Road; residences
		East	Portion of Judson Mill facility and residences
		South	Portion of Judson Mill facility and residences
		West	Two large buildings; rail spur
1948	Structure in southeast of site is no longer present	North	Appear relatively similar to prior photograph.
		East

		West	
2023	Detention basin present in southwest corner of site.	North	Appears relatively similar to prior photograph
		East	Portion of site has been redeveloped into current Judson Mill facility.
		South	Portion of site has been redeveloped into current Judson Mill facility.
		West	Appears relatively similar to prior photograph

No RECs were identified during the review of the aerial photographs. Copies of the aerial photographs are included in Appendix IX.

6.3 Sanborn Fire Insurance Company Maps

From the late 1800s to the mid-1970s, the Sanborn Fire Insurance Company mapped industrial areas of cities and towns in the United States where the potential for loss was the greatest.

SANBORN MAP YEAR	SUBJECT PROPERTY DESCRIPTION	ADJOINING PROPERTIES DESCRIPTIONS	
1920	Developed with 12 dwellings, auto building, and a portion of 1st Avenue.	North	Easley Bridge Road
		East	Dwellings; Judson Mills facility (office, twister building, cotton warehouse, picker room and slashers room
		South	Railroad siding; store; dwellings
		West	School House; dwellings; railroad siding
1928	Developed with 12 dwellings, seven auto building, a boarding house, and a portion of 1st Avenue.	North	Dwellings north of Easley Bridge Road
		East	Dwellings; Judson Mills facility
		South	Appears relatively similar to prior map
		West	Judson Mill School, Judson Community Building, store
1961	Developed with six dwellings, boarding house, 8 auto buildings. Southeast corner labeled as Play Ground and northeast corner as Parking.	North	Dwellings and fire station
		East	Adjust dwellings no longer present. Office building at Judson expanded.
		South	Gas station is depicted on Judson facility.
		West	Judson Mill school no longer depicted.

SANBORN MAP YEAR	SUBJECT PROPERTY DESCRIPTION	ADJOINING PROPERTIES DESCRIPTIONS	
1964	Depicted with five dwellings and 4 auto buildings.	North	Appears relatively similar to prior map.
		East	Appears relatively similar to prior map.
		South	Gas station no longer depicted.
		West	Judson Community Building no longer depicted.

The Sanborn Fire Insurance Map report is included in Appendix X.

6.4 Topographic Maps

EDR provided a topographic map report of the area containing the Subject Property and adjoining and surrounding sites. The topography of the area remained unchanged throughout the timeframe of the maps reviewed for this Phase I ESA. A summary of the observations on the Subject Property and adjoining sites is provided in the following table.

TOPOGRAPHIC MAP YEAR	SUBJECT PROPERTY DESCRIPTION	ADJOINING PROPERTIES DESCRIPTIONS	
1935	Depicted as developed, but site-specific details cannot be determined.	North	Depicted as developed, but site-specific details cannot be determined.
		East	
		South	
		West	
1938	Depicted as developed, but site-specific details cannot be determined.	North	Developed with structures
		East	Large structures associated with Judson Mill
		South	Developed with structures
		West	Developed with structures
1957	Depicted within a developed area, but structure details not provided.	North	Depicted within a developed area, but structure details not provided aside from Judson Mill structure.
		East	
		South	
		West	
1976	Appears relatively similar to prior map.	North	Appears relatively similar to prior map.
		East	
		South	
		West	
1983	Five residences depicted.	North	Fire Station depicted
		East	Structures associated with Judson Mill
		South	Specific structures not depicted
		West	Churches
2014	No development depicted.	North	Road infrastructure depicted.
		East	
		South	

TOPOGRAPHIC MAP YEAR	SUBJECT PROPERTY DESCRIPTION	ADJOINING PROPERTIES DESCRIPTIONS	
		West	
2017	No development depicted.	North	Road infrastructure depicted.
		East	
		South	
		West	
2020	No development depicted.	North	Road infrastructure depicted.
		East	
		South	
		West	
2024	No development depicted.	North	Road infrastructure depicted.
		East	
		South	
		West	

No RECs were identified during the review of the topographic maps. Copies of the topographic maps are included in Appendix XI.

7.0 SITE RECONNAISSANCE

7.1 Methodology and Limiting Conditions

Mr. Reggie Reeves of GEL conducted a visual inspection of the Subject Property and surrounding properties on April 1, 2026. The Subject Property and surrounding properties, shown in Figures 1 and 2, were observed for evidence of RECs and potential sources of environmental impact on the groundwater and soil at the Property. Photographs of the Subject Property are provided in Appendix XII.

7.2 General Property Setting

The Subject Property and surrounding properties are a portion of the Judson Mill facility. The former textile mill has been redeveloped into a mixed use development with loft apartments and commercial space. The surrounding areas are a mix of residential, commercial, and civic space.

7.3 Subject Property Observations

The Subject Property is mostly undeveloped. The southwest portion of the Subject Property contains a stormwater detention basin. At the time of site reconnaissance, no water was in the basin. A portion of the site is developed with roadways accessing parking lots. Overhead power lines are located along the northern and western boundaries. The remainder of the Subject Property is undeveloped.

SUBJECT PROPERTY RECONNAISSANCE FINDINGS	
FEATURE	**OBSERVED ON SUBJECT PROPERTY**
Underground Storage Tanks (USTs)	No
Aboveground Storage Tanks (ASTs)	No
Hazardous Substances and Petroleum Products in Connection with Identified Uses	No
Strong, Pungent, or Noxious Odors	No
Standing Surface Water and Pools or Sumps	No
Drums, Totes, and Intermediate Bulk Containers	No

SUBJECT PROPERTY RECONNAISSANCE FINDINGS	
FEATURE	**OBSERVED ON SUBJECT PROPERTY**
Hazardous Substances and Petroleum Products Not in Connection with Identified Uses	No
Unidentified Substances/Containers	No
PCB-Containing Equipment	No
Hydraulic Equipment	No
Heating / Cooling Systems	No
Pits, Ponds, or Lagoons	No
Stains or Corrosion on Floors, Walls, or Ceilings	No
Drains or Sumps	No
Stained Soil or Pavement	No
Stressed Vegetation	No
Solid Waste (fill or onsite solid waste disposal)	No
Water/Wastewater (including stormwater)	Yes
Wells	No
Septic Systems or Cesspools	No
Other Items	Yes

7.3.1 Water/Wastewater (including stormwater)

The southwest portion of the Subject Property is developed with a stormwater detention basin; however, at the time of site reconnaissance, the basin contained no water.

7.4 Current and Past Uses and Observations of Adjoining Properties

The Subject Property is currently bound to the east and south by portions of the former Judson Mill facility. The mill has been converted into a mixed use development with apartments and commercial space. The areas to the north are developed with commercial businesses (heating and air, gas station, laundry, and cell phone store) and the areas to the west are developed with a parking lot, church, and residences.

7.5 Current and Past Uses and Observations of Surrounding Properties

The surrounding facilities are mostly residential. The current surrounding properties are not considered RECs.

8.0 VAPOR ENCROACHMENT SCREENING

A Vapor Encroachment Screening (VES) was performed to identify releases or potential releases of chemicals of concern on the Subject Property, adjoining, or surrounding properties, and to evaluate the likelihood of contaminant vapors migrating from the identified release(s) via the subsurface to the Subject Property. The presence or likely presence of vapors containing chemicals of concern (COC) in the vadose zone of the Subject Property would constitute a Vapor Encroachment Condition (VEC), and may also constitute a REC, if identified. The VES was accomplished utilizing procedures described in ASTM E2600-22, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*.

The VES includes a review of the following data to identify releases or potential releases of chemicals of concern on or near the Subject Property and to evaluate the likelihood of contaminant vapors migrating through the subsurface to the site:

- The type of contaminant known or suspected to have been stored on-site or at identified off-site sources,
- The distance between identified off-site sources and the nearest boundary of the Subject Property,
- Known or assumed groundwater flow direction(s) with respect to the Subject Property,
- The potential for preferential pathways or barriers to exist between the identified off-site sources and the subject property line, and,
- The physical setting and other information sources which may impact the subsurface contaminant migration.

ASTM E2600-22 recommends initial screening distances based on the type of contaminants. Chemicals of concern that are non-petroleum based are screened within 1,760 feet of the Subject Property and petroleum hydrocarbon constituents are screened within 528 feet of the closest property line.

PLUME LOCATION ADDRESS	TYPE OF CONTAMINANT	DISTANCE TO CLOSEST BOUNDARY OF SUBJECT PROPERTY	LIKELIHOOD OF VAPOR ENCROACHMENT
A contaminant plume was identified within 250-feet of the subject property beneath the Jenny and Westervelt buildings. Thus, a potential VEC exists for the Subject Property.			

GEL conducted an evaluation of the sub-slab soil vapor beneath the Westerfelt and Jenny Building located on Lot 3 located south of the Subject Property. Concentrations of PCE, 1,2-dichloropropane, and TCE were detected above VISLs and a vapor mitigation system was installed in both buildings. The Jenny and Westervelt building are located approximately 250-feet from the Subject Property. Thus, it is likely that a contaminant plume exists beneath the buildings which are located cross and upgradient of the Subject Property. The upgradient plume is considered a VEC with respect to the subject property. As a part of the NRP-VCC, SCDES may request a soil vapor assessment in areas of future planned structures.

9.0 INTERVIEWS

People with knowledge of the Subject Property were interviewed to evaluate the presence or absence of RECs, controlled RECs, historical RECs, and/or de minimis conditions associated with the Subject Property. GEL's interview with the User is documented in Section 4.0.

NAME	ROLE	AFFILIATION	INTERVIEWER	DATE OF INTERVIEW
Ken Reiter	Owner	Judson Mill Ventures, LLC	Reggie Reeves	April 14, 2026
GEL contacted Ken Reiter, owner of the Subject Property about this knowledge of the site. GEL has conducted environmental work for Mr. Reiter since his ownership of the Subject Property. Mr. Reiter stated that he is unaware of any environmental issues associated with the Subject Property that has not already been disclosed to GEL. These issues have been summarized in Section 5.				
		Parker Fire Department	Reggie Reeves	
GEL contacted the Parker District Fire Department to inquire about whether the department has responded to any incidences at the Subject Property. At the time of completing this report, a response has not yet been received.				

These interviews did not identify any additional RECs in relation to the subject Property or surrounding sites.

10.0 DATA GAPS AND FAILURES

ASTM Standard E 1527-21, and 40 CFR Part 312, "*Standards and Practices for All Appropriate Inquiries*," specifically require that all data gaps and/or data failures in the research be identified and comments regarding the significance of the data gaps on the ability of the environmental professional to identify RECs be provided. The following data gaps were identified during the completion of this Phase I ESA.

- GEL was unable to determine the use of the Subject Property back to 1940 or its first use, which is considered a data gap. The 1920 Sanborn Fire Insurance map depicts with Subject Property with residences and it is expected that uses prior to 1920 were similar in nature. As such, the data gap is not expected to impact the findings of this report.
- GEL contacted the Parker District Fire Department to request information about any responses to the Subject Property. At the time of completing this report, a response had not yet been received, but the lack of information about fire department responses is not expected to impact the findings of this assessment.

11.0 FINDINGS AND OPINIONS

Findings of this Phase I ESA indicate:

- The Subject Property is a portion of the former Milliken and Company Judson Mill (Judson Mill). Judson Mill manufactured cotton and polyester yarn between 1912 and 2015. The former use of the facility as a textile mill is considered a REC based on the processes and chemical of concern typically used in these operations and their potential to contaminate the soil and groundwater beneath the site.

  The Subject Property is currently developed with a dry stormwater basin and access driveways. The remainder of the Subject Property is maintained landscaping or vacant land.

- The Property is generally bound to the north by Easley Bridge Road and commercial businesses; to the south developed portions of the Judson Mill complex (the Annex, Lofts, and Warehouse); to the east by undeveloped portions of the Judson Mill facility and residences; and to the west by 2nd Avenue, a parking lot, and a church.

- Prior to the sale of the Judson Mill facility, Milliken and Company retained ERM to conduct a Phase I ESA of the facility. The Phase I ESA identified multiple RECs in association with the former operation of the facility, and a Phase II ESA was conducted in 2015 to assess sitewide groundwater conditions. Several chemicals of concern (COCs) were detected in site groundwater; however, all detections were less than applicable screening criteria.

  Prior to the purchase of the Judson Mill facility, Judson Mill Ventures, LLC and Judson Mill Developer, LLC executed Non-Responsible Party Voluntary Cleanup Contract 17-6483-NRP (VCC) with the South Carolina Department of Environmental Services (SCDES). As part of the VCC, additional assessment was required of site soil, groundwater, sediment, surface water, sub-slab soil gas and indoor air.

  The *Baseline Site Assessment Report* and subsequent *Additional Sub-Slab Vapor and Indoor Air Evaluation,* conducted by GEL in 2018 and 2019 reported the following:

  - In general, site soils at Judson Mill contain concentrations of polynuclear aromatic hydrocarbons (PAHs) and metals in excess of applicable screening concentrations. The metals detections are primarily considered naturally occurring. Minor detections of tetrachloroethylene (PCE) and other chlorinated volatile organic compounds (VOCs) were identified in soil samples collected at Judson Mill. A single PAH collected from a sample on the Subject Property exceeded its EPA Residential Regional Screening Level (RRSL).

  - Several chlorinated VOCs were detected in site groundwater but all concentrations are less than applicable screening criteria. Several metals were also detected in site groundwater, but are interpreted to be predominantly naturally occurring. The VOC detections were located off-Subject Property.

- Several VOCs were detected at concentrations exceeding screening criteria in the sub-slab soil gas and indoor air samples. No sub-slab or indoor air samples were collected from the Subject Property.
- Sediment and surface water samples were collected from the fire suppression pond, located off the Subject Property included in this ESA. Several metals, PAHs, and carbon disulfide were detected in pond samples.

- During redevelopment of other portions of the Judson Mill complex, impacted soil was removed from the areas surrounding the structures. A majority of the impacted soils were placed on the north lawn between the parking lots at Judson Mill and Easley Bridge Road, which is located on a portion of the Subject Property. Upon relocation of the impacted soils, a demarcation barrier was placed over the soils, and a layer of clean soil from the site was placed atop the demarcation barrier. Soils with VOC impacts excavated from around the former electric substation and dye house were staged, characterized, and disposed at an offsite municipal landfill.

  During redevelopment of the Jenny and Westervelt buildings, additional impacted soils were relocated on the Judson Mill facility, including the gravel parking lot located near the southwest Subject Property boundary, the parking lot west of 2nd Avenue, the access road with parking located north of the Jenny and Westervelt buildings, and the parking lot located north of the Westervelt building.

- The documented presence of chemicals of concern in soils placed on the Subject Property and the remaining Judson Mill facility are considered onsite and offsite RECs. However, the site is part of the SCDES VCC program, which is working with the current owner to remediate and/or control these chemicals of concern in order to facilitate site redevelopment, as follows:
  - SCDES has stated that no further groundwater assessment will be required if the owner enters into land use restrictions to prohibit groundwater use.
  - A Media Management Plan has been prepared and approved by SCDHEC to address the areas where the elevated concentrations of chemical of concern remain in excess of industrial or residential Regional Screening Levels. Prior to redevelopment of the Subject Property, a Soil Disturbance Plans (SDP) should be submitted to SCDES documenting the planned activities for disturbing impacted soil on the Subject Property.

- GEL conducted an evaluation of the sub-slab soil vapor beneath the Westerfelt and Jenny Building located on Lot 3 located south of the Subject Property. Concentrations of PCE, 1,2-dichloropropane, and TCE were detected above VISLs and a vapor mitigation system was installed in both buildings. The Jenny and Westervelt buildings are located approximately 250-feet from the Subject Property. Thus, it is likely that a contaminant plume exists beneath the buildings which are located cross and upgradient of the Subject Property. The

upgradient plume is considered a VEC with respect to the subject property. The VEC will be addressed by SCDES as part of the existing NRP-VCC's Media Management Plan and will include soil vapor testing in the vicinity of proposed onsite structures to evaluate the need for a vapor barrier.

- The regulatory information reviewed as part of this ESA listed Judson Mill in a database that identifies facilities in industries that may be handling per- and polyfluorinated substances (PFAS). The database (PFAS ECHO) listed Judson Mill as a potential PFAS-handling site due to its former use as a textile mill. A listing in the databases does not indicate that PFAS were handled or generated by the listed facility. There is no known record of PFAS being used at Judson Mill and there is no documented release of PFAS to the environment. However, no analysis for PFAS compounds was conducted on any of the environmental media sampled as a part of the VCC assessment process because it was not a requirement of the VCC at that time. Judson Mill did have dyeing operations at the facility and PFAS compounds can be used in the dyeing process to aid in dye application and reduce foam. Thus, it is GEL's opinion that the potential PFAS use at the Subject property is considered a REC. The REC will be addressed by SCDES as part of the existing NRP-VCC's Media Management Plan and a project-specific soil disturbance plan to be approved by SCDES.

12.0 CONCLUSIONS

GEL has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-21 of a portion of the Judson Mill property in Greenville County, South Carolina. Any exceptions to, or deletions from, this practice are described in Section 13.0.

This assessment has identified the following:

- The documented presence of chemicals of concern in soils placed on the Subject Property and the remaining Judson Mill facility are considered onsite and offsite RECs. However, the site is part of the SCDES VCC program, which is working with the current owner to remediate and/or control these chemicals of concern in order to facilitate site redevelopment, as follows:
    - SCDES has stated that no further groundwater assessment will be required if the owner enters into land use restrictions to prohibit groundwater use.
    - A Media Management Plan has been prepared and approved by SCDHEC to address the areas where the elevated concentrations of chemical of concern remain in excess of industrial or residential Regional Screening Levels. Prior to redevelopment of the Subject Property, a SDP should be submitted to SCDES documenting the planned activities for disturbing impacted soil on the Subject Property.
- GEL conducted an evaluation of the sub-slab soil vapor beneath the Westerfelt and Jenny Building located on Lot 3 located south of the Subject Property. Concentrations of PCE, 1,2-dichloropropane, and TCE were detected above VISLs and a vapor mitigation system was installed in both buildings. The Jenny and Westervelt buildings are located approximately 250-feet from the Subject Property. Thus, it is likely that a contaminant plume exists beneath the buildings which are located cross and upgradient of the Subject Property. The upgradient plume is considered a VEC with respect to the subject property. The VEC will be addressed by SCDES as part of the existing NRP-VCC's Media Management Plan and will include soil vapor testing in the vicinity of proposed onsite structures to evaluate the need for a vapor barrier.
- The regulatory information reviewed as part of this ESA listed Judson Mill in a database that identifies facilities in industries that may be handling PFAS. The database (PFAS ECHO) listed Judson Mill as a potential PFAS-handling site due to its former use as a textile mill. A listing in the databases does not indicate that PFAS were handled or generated by the listed facility. There is no known record of PFAS being used at Judson Mill and there is no documented release of PFAS to the environment. However, no analysis for PFAS compounds was conducted on any of the environmental media sampled as a part of the

VCC assessment process because it was not a requirement of the VCC at that time. Judson Mill did have dyeing operations at the facility and PFAS compounds can be used in the dyeing process to aid in dye application and reduce foam. Thus, it is GEL's opinion that the potential PFAS use at the Subject property is considered a REC. The REC will be addressed by SCDES as part of the existing NRP-VCC's Media Management Plan and a project-specific soil disturbance plan to be approved by SCDES.

13.0 LIMITING CONDITIONS / DEVIATIONS

GEL is not aware of any deviations from ASTM Standard E 1527-21, or 40 CFR Part 312 in the text or preparation of this report.

14.0 ADDITIONAL SERVICES AND NON-SCOPE ISSUES

The following non-scope issues were neither requested by Taft Mill Group nor addressed by this Phase I ESA: endangered species, regulatory compliance audits, ecological resources, industrial hygiene, indoor air quality, biological agents, mold, health and safety, power lines, and electromagnetic fields, wetlands, asbestos survey or abatement, lead-based paint, and related services, lead-in-drinking-water, radon, cultural and historical resources, surveying for line and grade, quantity estimates, detailed plans and specifications, waste characterization and treatment schemes, and geotechnical or structural engineering services, media sampling (soil, sediment, surface water, groundwater, air, building materials, etc.), vapor intrusion, assessment of Continuing Obligations or compliance with Activity and Use Limitations if present.

16.0 ENVIRONMENTAL PROFESSIONAL DECLARATION

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312, “Innocent Landowners, Standards for Conducting All Appropriate Inquiries.”

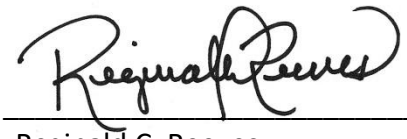

Robert E. MacPhee

17.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

This report, entitled "Phase I Environmental Site Assessment," has been prepared for a portion of the Judson Mill facility in Greenville County, South Carolina, at the request of and for the exclusive use of Taft Mills Group. It has been prepared in accordance with the guidelines set forth in the ASTM Standard E 1527-21, "*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*," and 40 CFR Part 312, "*Standards and Practices for All Appropriate Inquiries*". It has been prepared in accordance with accepted quality control practices and has been reviewed by the undersigned.

USER-PROVIDED INFORMATION

ASTM E 1527-21 USER QUESTIONNAIRE

INTRODUCTION: In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *"Brownfields Amendments"*), the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that *"all appropriate inquiry"* is not complete.

INSTRUCTIONS: Indicate your response by initialing the appropriate box. For each questions answered "Yes," please include an explanation in the space provided.

Site Name: Judson Trace	Client Name: Taft Mills Group
Address/Location: 701 Easley Bridge Road, Greenville, SC	

Item	Yes	No
1. Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25). Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?	○	◉
2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26). Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?	○	◉
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	○	◉
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).		
a.) If applicable, does the purchase price being paid for this property reasonably reflect the fair market value of the property?	◉	○
b.) If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	○	○
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,		
a.) Do you know the past uses of the property? If so, please list known past uses.	○	◉
b.) Do you know of specific chemicals that are present or once were present at the property?	○	◉
c.) Do you know of spills or other chemical releases that have taken place at the property?	○	◉
d.) Do you know of any environmental cleanups that have taken place at the property?	○	◉

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	○	◉
7. This ESA is being performed: (check all that apply)		
In order to satisfy the due diligence requirements of the innocent landowner defense and bona fide prospective purchaser provisions of CERCLA.	○	◉
In order to understand the potential environmental liabilities that could materially impact the operation of the business associated with the property.	◉	○
In order to satisfy lender requirements.	◉	○
Other: (please explain)		
8. Do you have, or are you aware of, any prior environmental reports for the property? Please provide copies, if possible.	○	◉

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state- and tribal hazardous waste facilities

SHWS: State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

A review of the SHWS list, as provided by EDR, and dated 03/04/2025 has revealed that there are 14 SHWS sites within approximately 1 mile of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

ALLSITES: The South Carolina Department of Health and Environmental Control is pleased to have the Public Record for your review. The purpose of this database is two-fold. First, it will provide to communities another form of notice of cleanup activity, allowing them to have more information about assessment and cleanup activities in their area and in the State. Second, it can assist those seeking to redevelop brownfield properties within South Carolina.

A review of the ALLSITES list, as provided by EDR, and dated 11/21/2025 has revealed that there are 2 ALLSITES sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER RELEASE site within approximately 0.5 miles of the target property.

MM FOOD MART 2	***784 EASLEY BRIDGE RD***	***NW 0 - 1/8 (0.027 mi.)***	***B22***	***107***

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The South Carolina Department of Health and Environmental Control (DHEC) Environmental Facility Information System (SC-EFIS) integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

FINDS:
Registry ID: 110071921425

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/26/2025
Date Data Arrived at EDR: 01/05/2026
Date Made Active in Reports: 01/22/2026
Number of Days to Update: 17

Source: EPA
Telephone: N/A
Last EDR Contact: 03/02/2026
Next Scheduled EDR Contact: 07/06/2026
Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/26/2025

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State and tribal institutional control / engineering control registries

RCR: Registry of Conditional Remedies

The Bureau of Land and Waste Management established this Registry to help monitor and maintain sites that have conditional remedies. A Conditional Remedy is an environmental remedy that includes certain qualifications. These qualifications are divided into two major categories: Remedies requiring Land Use Controls and Conditional No Further Actions.

AUL: Land Use Controls

The term Land Use Controls or "LUCs" encompass institutional controls, such as those involved in real estate interests, governmental permitting, zoning, public advisories, deed notices, and other legal restrictions. The term also includes restrictions on access, whether achieved by means of engineered barriers (e.g., fence or concrete pad) or by human means (e.g., the presence of security guards). Additionally, the term includes both affirmative measures to achieve the desired restrictions (e.g., night lighting of an area) and prohibitive directives (e.g., restrictions on certain types of wells for the duration of the corrective action). Considered altogether, the LUCs for a facility will provide a tool for how the property should be used in order to maintain the level of protectiveness that one or more corrective actions were designed to achieve.

VCP: Voluntary Cleanup Sites

Sites participating in the Voluntary Cleanup Program. Once staff and a non-responsible party have agreed upon an approved scope of work for a site investigation and/or remediation, the party enters into a voluntary cleanup contract. Staff oversees the cleanup efforts to ensure that activities are performed to our satisfaction. Upon completion of the negotiated work in the voluntary cleanup contract, the non-responsible party receives State Superfund liability protection.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

JUDSON MILL
701 EASLEY BRIDGE ROAD
GREENVILLE, SC 29611

TARGET PROPERTY COORDINATES

Latitude (North):	34.837795 - 34° 50' 16.06''
Longitude (West):	82.429096 - 82° 25' 44.75''
Universal Tranverse Mercator:	Zone 17
UTM X (Meters):	369328.1
UTM Y (Meters):	3855789.2
Elevation:	1007 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50050178 GREENVILLE, SC
Version Date:	2024

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

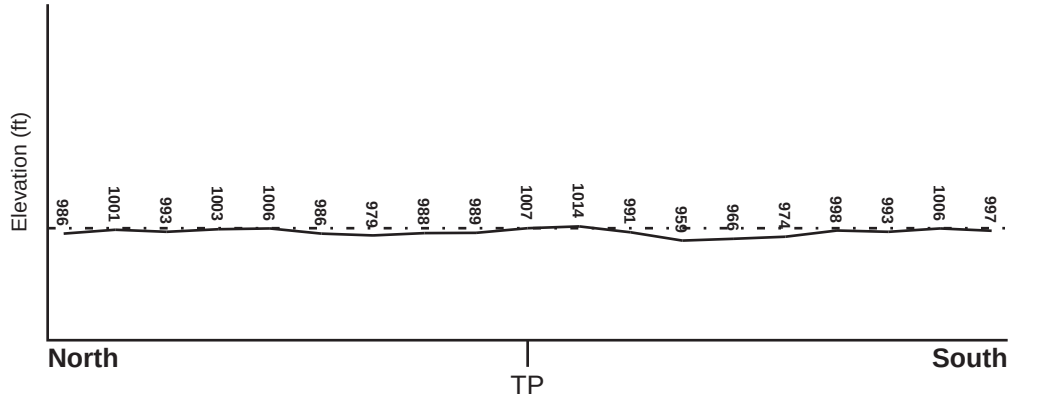

TOPOGRAPHIC INFORMATION

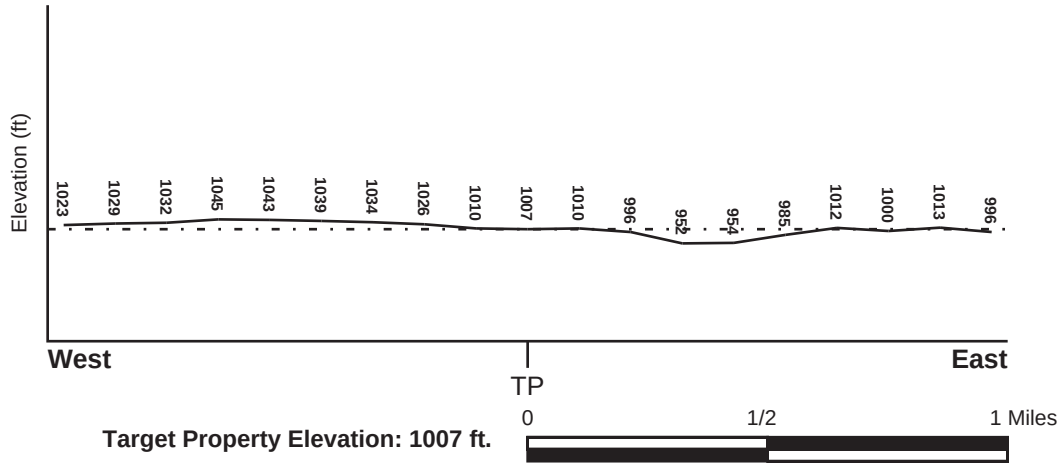

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 1007 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
45045C0383E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
45045C0381E	FEMA FIRM Flood data
45077C0330D	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
GREENVILLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
5	1/2 - 1 Mile WSW	Not Reported
6	1/2 - 1 Mile WSW	NE
7	1/2 - 1 Mile SSE	Not Reported
1G	1/2 - 1 Mile WSW	Not Reported
2G	1/2 - 1 Mile WSW	NE
3G	1/2 - 1 Mile SSE	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

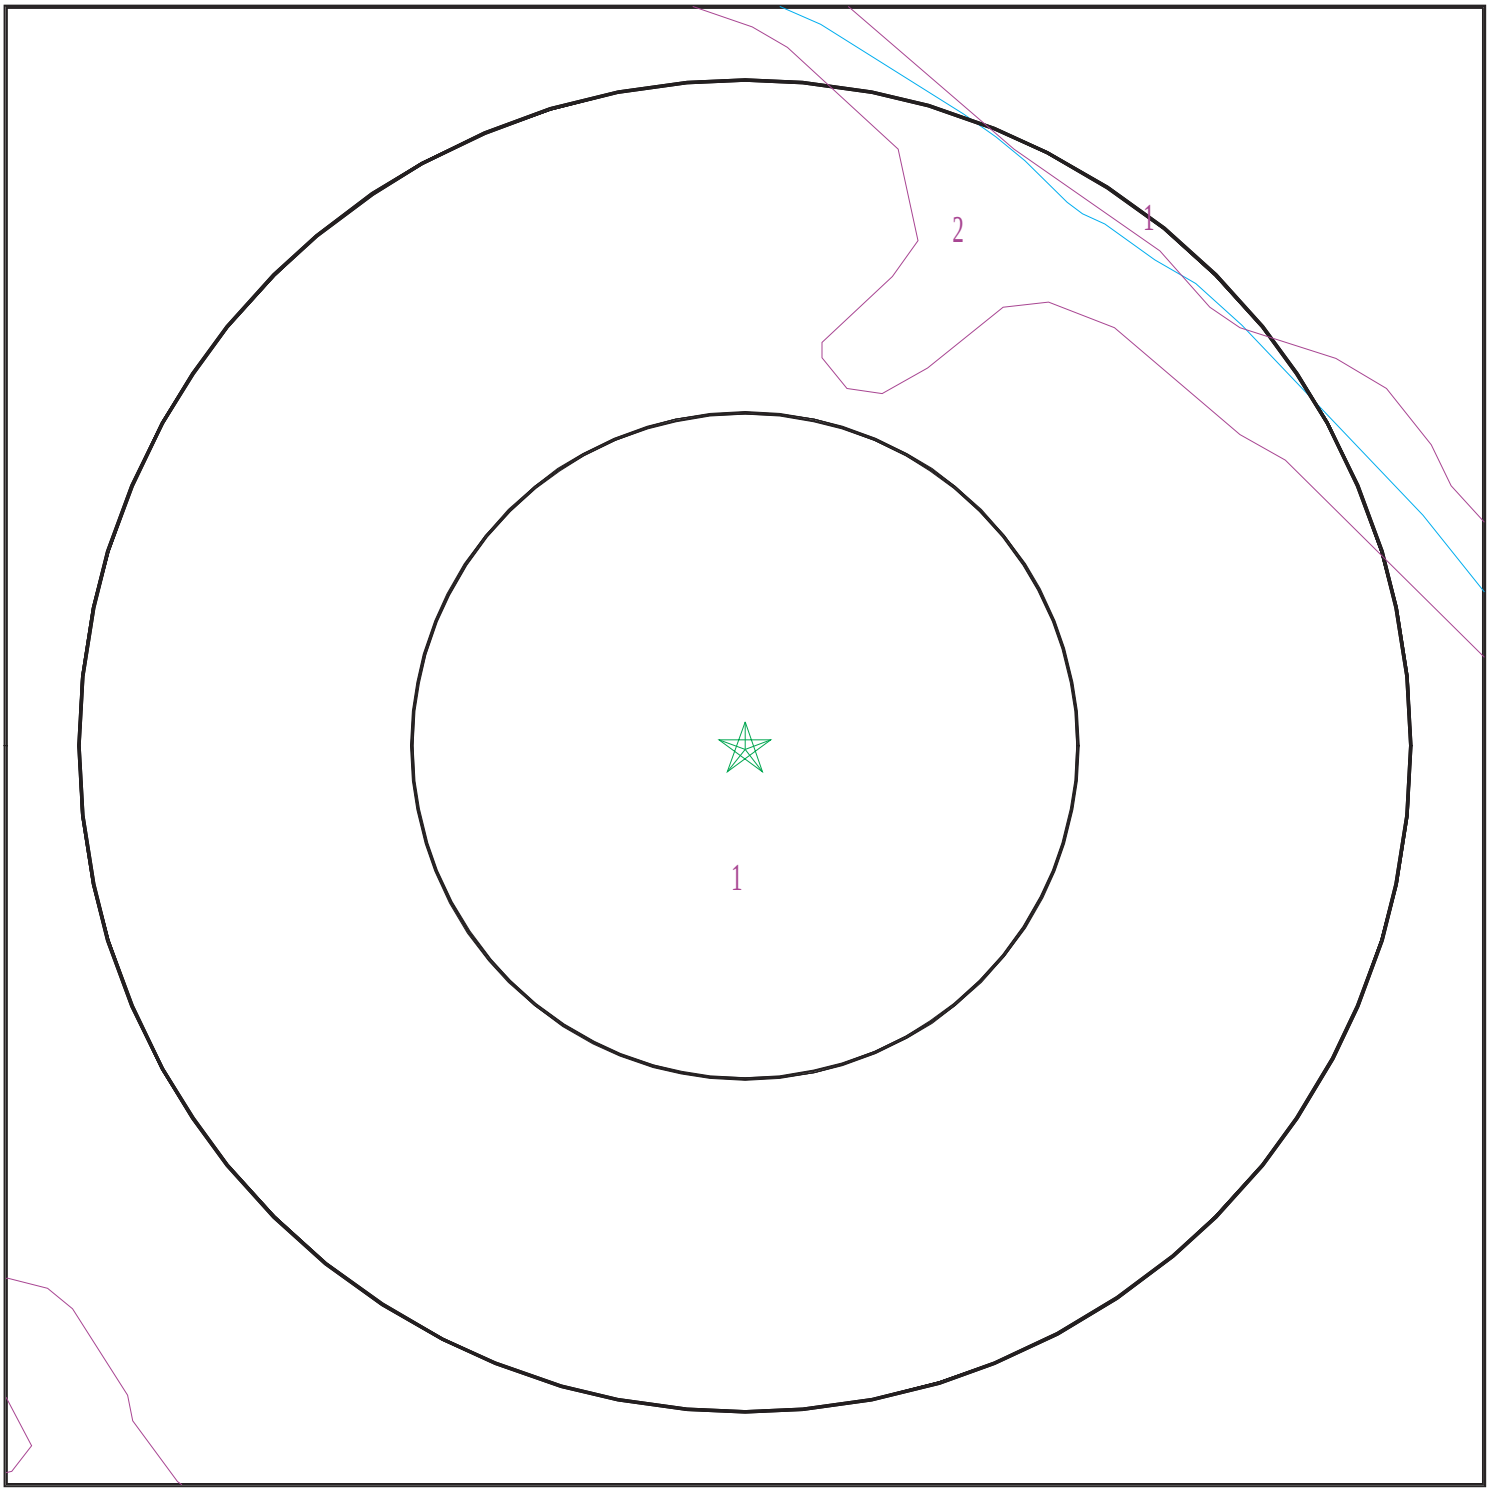

Era:	Paleozoic

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: URBAN LAND

Soil Surface Texture:

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	59 inches		Not reported	Not reported	Max: Min:	Max: Min:

Soil Map ID: 2

Soil Component Name: CARTECAY

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 48 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy loam	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 5.1
2	7 inches	27 inches	sandy loam	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 5.1
3	27 inches	55 inches	sandy loam	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 5.1

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Telephone: 803-734-9494

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EXECUTIVE SUMMARY

DESCRIPTION

The LightBox City Directory Report is designed to assist environmental professionals in evaluating potential liabilities on select properties resulting from past activities. The report includes a search of available business directory data at approximately five-year intervals.

SOURCES

Through agreements with major city directory publishers, including Cole Information, InfoUSA, and Bresser, as well as our own collections (Haines & Stewart), the LightBox City Directory Report offers comprehensive national coverage.

LightBox is authorized to reproduce and redistribute all works featured in this report. The purchaser of this LightBox City Directory Report may include it in their final report(s).

This report includes a search of the following sources:

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GEL Engineering, LLC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

APPENDIX XIV

PERSONNEL QUALIFICATIONS PHOTOGRAPHS

Reginald C. Reeves | Senior Project Manager / Environmental Scientist

Mr. Reeves is a member of the Environmental Business Unit at GEL Engineering. Mr. Reeves has experience with due diligence activities, including Phase I and II ESAs, Voluntary Clean-up Contracts, and brownfields redevelopment. He also conducts wetlands, waterfront, and dredge permitting and related projects for the United States Army Corps of Engineers and the South Carolina Department of Health and Environmental Control. Mr. Reeves also conducts dredge planning and coordination, as well as dredge feasibility studies. He also has experience with the administration and implementation of EPA Brownfields Assessment Grants, including stakeholder outreach, site inventory, environmental site assessments, and regulatory agency coordination. He also has experience with collection and/or analysis of sediment, stormwater, groundwater, low-level mercury and soil samples.

Education

M.S., Environmental Studies, College of Charleston, 2008
B.S., Biological Sciences, Clemson University, 2004

Registrations, Certifications, Training

Arc GIS Spatial Analysis and 3D Analyst Training

GEL Tenure: 15
Industry: 17

Relevant Project Experience

The Boeing Company, Morrisville, North Carolina
Assisted in completing a Transaction Screen Assessment in support of a lease-termination of a warehouse in Morrisville, North Carolina. Additional services included completion of an Assessment Summary Report. The project was completed on time and budget.

Evening Post Industries, Salisbury, North Carolina
Completing a Phase I ESA of multiple properties located in downtown Salisbury, North Carolina. The ESA was conducted as part of a property transaction and the project was completed on time and budget.

North Carolina Department of Transportation, Asheville, North Carolina
Assisted in the completion of a site investigation of a former landfill located along the French Broad River in Asheville, North Carolina. The investigation included the excavation of approximately 25 test pits to evaluate the depth of buried debris and the types and quantity of buried debris. The test pit locations were selected based on the results of various geophysical investigations at the site. The investigation results will be used in the design of upcoming roadway improvements.

North Carolina Department of Transportation, Asheville and Arden, North Carolina
Assisted in the completion of a site investigation as part of a road improvement project at Mills Gap and Sweeten Creek Roads in Asheville and Arden, NC. Site activities included geophysical investigation, soil boring installation at 25 locations, and assisting in the preparation of assessment reports.

North Carolina Department of Transportation, Multiple Sites, North Carolina
Assisted in conducting background research for multiple site investigations conducted to evaluate potential site contaminants that could impact roadway improvements. The background research included locating and reviewing existing documentation, if any, for former

underground storage tanks, and/or prior spills or releases of potential contaminants. The research is used to inform the locations for site sampling efforts.

The Boeing Company, Project Mallard, Charleston, South Carolina
Assisted in the completion of due diligence activities for Project Mallard. The overall project included due diligence activities on 10 separate tracts owned by the Charleston County Aviation Authority. Specific activities include Phase I and Phase II ESAs, Non-Responsible Party Voluntary Clean-up Contracts, and Assessment Summary Reports. The projects have been completed on time and budget.

The Boeing Company, Project Pintail, Charleston, South Carolina
Assisted in the completion of due diligence activities for Project Pintail. The overall project included due diligence activities on separate tracts owned by two entities. Specific activities include Phase I and Phase II ESAs, Non-Responsible Party Voluntary Clean-up Contracts, Assessment Summary Reports, and remediation activities. The projects have been completed on time and budget.

The Boeing Company, Palmetto Commerce Park, Charleston, South Carolina
Assisted in the completion of multiple Phase I and Phase II ESAs in association with the client's due diligence activities at three tracts at the Palmetto Commerce Park. The projects have also included the completion of Assessment Summary Reports. The projects have been completed on time and budget.

The Boeing Company, Plum Creek, Charleston, South Carolina
Completed a Phase I ESA, Assessment Summary Report, and Voluntary Cleanup Contract planning for a tract located between Projects Mallard and Pintail. The projects have been completed on time and budget.

The Boeing Company, Charleston and Ladson, South Carolina
Completed a Google-Earth based analytical database of all environmental data obtained through soil, groundwater, and soil vapor investigations. The database allows to real-time, efficient decision making during site redevelopment activities.

The Boeing Company, Jacksonville, Florida
Assisted in completing a Phase I ESA in support of a lease-termination of a warehouse in Jacksonville, Florida. Additional services included completion of an Assessment Summary Report. The project was completed on time and budget.

The Boeing Company, Fort Walton Beach, Florida
Assisted in completing a Transaction Screen Assessment in support of a lease-termination of a warehouse in Fort Walton Beach, Florida. Additional services included completion of an Assessment Summary Report. The project was completed on time and budget.

The Boeing Company, Okaloosa County, Florida
Assisted in completing a Phase I ESA of a portion of the Duke Airfield, as part of lease agreement with the US military. Additional services included completion of an Assessment Summary Report. The project was completed on time and budget.

The Boeing Company, Doral, Florida
Assisted in completing a Transaction Screen Assessment in support of a sub-lease of a warehouse in Doral, Florida. Additional services included completion of an Assessment Summary Report. The project was completed on time and budget.

The Boeing Company, North Charleston, South Carolina
Assisted in completing a Phase I ESA in support of a land swap with the Charleston County Aviation Authority, as part of a project to develop a new airport entrance road. The project was completed on time and budget.

Dominion Energy South Carolina, Irmo, South Carolina
Responsible for conducting a Phase I ESA on a 1.93-mile-long former rail easement for Dominion Energy. The report was completed on time and budget.

Robert E. MacPhee | Principal, Environmental Business Unit Manager

Mr. MacPhee has over thirty-two years of environmental consulting experience working on a wide variety projects for clients in the industrial, commercial, telecommunications and governmental sectors. He is experienced in dealing with complex contaminant distributions and sources, including chlorinated solvents, metals and hydrocarbon contamination. Mr. MacPhee has managed projects under CERCLA, RCRA, Subtitle D, State Superfund, Federal and State Drinking Water, Storm Water and Underground Storage Tank (UST) regulations. Mr. MacPhee has extensive experience in the redevelopment of contaminated property and has managed several EPA Brownfield grants and is an expert in Brownfield Voluntary Cleanup Contracts.

Education

B.S., University of New Hampshire; Durham NH, College of Engineering and Physical Science, Major: Geology, Minor: Hydrology, 1988

Registrations, Certifications, Training

Professional Geologist
HUD Lead Based Paint Inspector/Risk Manager – 2002
Certified Indoor Environmentalist CIE

GEL Tenure: 14
Industry: 32

Relevant Project Experience

Delta Mills. Wallace South Carolina – VCC Assessment and Vapor Intrusion Assessment
Project manager for the Voluntary Cleanup Contract (VCC) for the former Delta Mills Plants 2 & 3 and the associated water treatment plant (WTP) and wastewater treatment plant (WWTP) located in Wallace, South Carolina. Marlboro County intends to redevelop the Property as part of its economic development plan. Environmental investigations included a Baseline Site Assessment, soil management plan, and Indoor Air Quality (IAQ) and sub-slab soil vapor testing. IAQ and sub-slab testing was conducted in approximately 800,000 square feet of former manufacturing space to evaluate the space for future occupancy due to a chlorinated solvent plume beneath the plant. Assessment included sampling indoor air and sub-slab soil gas and comparing the results against screening levels derived by using the EPA Vapor Intrusion Screening Level (VISL) Calculator (May 2020) in accordance with the Technical Guide for Assessing and Mitigating the Vapor Intrusion Pathway from Subsurface Vapor Sources to Indoor Air (EPA, June 2015) and supplemental EPA guidance, Vapor Intrusion Technical Guide.

Florence SC Manufacturing facility – VCC Assessment and Remediation
Project manager for the evaluation of IAQ and sub-slab soil gas to evaluate the potential impacts to indoor air from a chlorinated solvent groundwater plume beneath the building. Assessment included sampling indoor air and sub-slab soil gas and comparing the results against screening levels derived by using the EPA Vapor Intrusion Screening Level (VISL) Calculator (May 2020) in accordance with the Technical Guide for Assessing and Mitigating the Vapor Intrusion Pathway from Subsurface Vapor Sources to Indoor Air (EPA, June 2015) and supplemental EPA guidance, Vapor Intrusion Technical Guide. Additionally, the results were input into the North Carolina DEQ Risk Calculator to evaluate the risk to human health associated with the detected compounds.

Partans LLC Spartanburg SC – VCC Assessment
Project manager for the environmental investigations for this multifamily apartment complex constructed over a former textile mill site. A VCC was negotiated and a Baseline Site Assessment was conducted that indicated a former release of petroleum to groundwater beneath the building footprint. Assessment included sampling soil gas and comparing the results against screening levels derived by using the EPA Vapor Intrusion Screening Level (VISL) Calculator (May 2020) in accordance with the Technical Guide for Assessing and Mitigating the Vapor

Intrusion Pathway from Subsurface Vapor Sources to Indoor Air (EPA, June 2015) and supplemental EPA guidance, Vapor Intrusion Technical Guide. Due to the risks associated with the IAQ results a GEO-Seal vapor barrier was installed beneath the slab and confirmation IAQ sampling was conducted to confirm the efficacy of the vapor barrier prior to occupancy.

Town of Cheraw, SC – Petroleum and Hazardous Materials Assessment Grant and VCC Assessments
Project Manager and senior environmental professional for this Town of Cheraw's $300,000 assessment grant. Conducted numerous Phase I and Phase II ESAs with an emphasis on commercial and industrial properties. Project included project management and administration of the grant, preparation of a Work Plan, Preparation of Quality Assurance Project Plans (QAPP), Health and Safety Plans, creation of a Public Participation Plan, assembling a large task force, Quarterly Reports, EPA MBE/WBE Reporting, and Final Grant Status Report. The project was completed on time and at budget and succeeded in bringing several large sites toward redevelopment. GEL is continuing to write grant applications for the Town in order to continue the City's Brownfields Program.

Sonoco Products Co., SC – Land Application Site Expansion/NPDES Permitting
Project Manager and senior environmental professional for an evaluation and expansion of Sonoco's sludge application site. Sonoco is a global manufacturer of consumer and industrial packaging and provider of packaging services. The manufacturing facility at the world headquarters located in Hartsville, South Carolina contains six (6) paper machines, core winders, and power generation infrastructure. These processes are water users and the effluent requires treatment at the onsite waste water treatment facility. A component of the waste water treatment operation is the land application of sludge on the spray fields that Sonoco owns and maintains. A portion of the existing spray field was removed from service to accommodate construction of the new landfill permitted by DHEC. Therefore, Sonoco needed to relocate a portion of the existing spray field acreage to new areas within Sonoco property adjacent to the existing field. The project included a complete site wide hydrogeologic evaluation of the property, assessment of nitrate migration in groundwater which included the installation of numerous shallow and deep monitoring wells and piezometers, and an analysis of soils to evaluate nitrate loading and mineralization. GEL worked with a renowned agronomist/soil scientist to prepare an agronomic scope of work to initiate an active and aggressive program of agricultural management of the site to design and improve procedures to reduce nutrient loading and enhance vegetative uptake in spray fields.

Boeing, North Charleston, SC – Environmental Due Diligence and Remediation and VCC Assessments.
Project manager for all Phase I ESAs, Phase II ESAs, Voluntary Cleanup Contracts (VCC), and Baseline Investigations for all of Boeings Property acquisitions in North Charleston, South Carolina since 2013. Projects have also included soil remediation.

Sonoco Products Co., SC – Ash Landfill Permitting
Project Manager and senior environmental professional for permitting of this new ash landfill for Sonoco's boiler ash. Project consisted of a complete site hydrogeological characterization, demonstration of consistency, installation of monitoring well network, sampling and analysis plan, and NPDES permitting. The landfill was designed by HHNT.

City of Spartanburg, SC – Petroleum and Hazardous Materials Assessment Grant
Project Manager and senior environmental professional for this City of Spartanburg's $400,000 assessment grant. Conducted numerous Phase I and Phase II ESAs with an emphasis on Spartanburg's old textile mill sites. Project included project management and administration of the grant, preparation of a Work Plan, Preparation of Quality Assurance Project Plans (QAPP), Health and Safety Plans, creation of a Public Participation Plan, assembling a large task force, Quarterly Reports, EPA MBE/WBE Reporting, and Final Grant Status Report. The project was completed on time and at budget and succeeded in bringing several large sites toward redevelopment. GEL is continuing to write grant applications for the City in order to continue the City's Brownfields Program.

Due Diligence
Performed numerous Phase I and Phase II site assessments for properties in the Carolinas and throughout the United States. Due Diligence activities also included asbestos and lead based paint building inspections Property Condition Surveys and indoor air quality investigations for mold and other contaminants. Clients included state and local governments, industry, developers and commercial and industrial clients.
