Subject: Evergreen Villas- phone/cable service

Good morning Laura,

For Evergreen Villas in Sumter, SC there is a new phone/internet/cable provider called Farmers. We are researching the providers and we think Farmers could provide better service for the residents. One difference in Farmers is that everything is wireless. We are reaching out because the QAP calls for cables to living room, we checked box for cable to bedrooms, etc. The system with Farmers would work accordingly:

1. There would be no tv cables in the interior walls. The TV boxes will achieve signal via wireless internet (from transmitter to tv receiver box)
2. Every unit will have state of the art wifi and internet - if the resident elects to subscribe to internet.
3. Plugs in locations will be available on the router interface unit for ethernet (computer)
4. There will still be power at TV locations so residents can plug in a TV and run an antenna to the window.

Please advise if we can move forward with engaging this provider for cable/internet services.

Thanks,

Holly
